A D V E R T I S E M E N T .

This work is the twenty-third of a series of papers intended to illustrate the collections of natural history and ethnology belonging to the United States, and constituting the National Museum, of which the Smithsonian Institution was placed in charge by the act of Congress of August 10, 1846.

It has been prepared at the request of the Institution, and printed by authority of the honorable Secretary of the Interior.

SPENCER F. BAIRD,

Secretary of the Smithsonian Institution.

SMITHSONIAN INSTITUTION,

Washington, February 1, 1853.

1883.

PREFATORY NOTE.

The writer, since 1874, has been collecting materials for a work to be entitled "An Index Bibliography of American Ichthyology," the object of which will be to render as easily accessible as possible to the investigator and the student the literature relating to American fishes. Its scope embraces not only anatomical and descriptive ichthyology, but the literature of the fisheries, angling, fishery legislation and diplomacy, fishery statistics, and the commerce of the fisheries. References will be made not only to separate works and papers in scientific periodicals and the transaction of societies, but to all accessible articles and paragraphs in narratives of voyages and books of travel in America, and to pertinent references in literary and sporting periodicals. Briefly, it is the intention to enumerate by title every writing ever published which refers to American fish or fisheries. The work will be called an "index-bibliography," because it is intended to form a comprehensive index to the works it describes. Each title will be followed by a brief descriptive or critical paragraph, which will supplement the title and indicate in a general way the scope of its author's effort. In the case of an important paper a synopsis of its contents may be given. Under each descriptive paper will be printed the names of the new species described, with the locality whence the types were obtained, and the page of the reference. In important works, containing critical remarks, similar references may be given for each species discussed. References to every engraving published will be made.

The pressure of other engagements has delayed the completion of this work, which it was at first intended to publish in 1876. It is now expected that it may be finished in 1884. Titles of works published before July, 1884, will be included. In the mean time it is proposed, from time to time, to publish special bibliographies of the writings of the most prominent naturalists, for convenience of current reference, and to invite criticism of methods, corrections of any kind, and the co-operation of those who are interested in the successful completion of the undertaking.

The first of these special bibliographies is now presented. No one will be likely to question the propriety of selecting for its subject the

works of Professor BAIRD, since it is he who, more than any one else, has carried on the work of identifying and describing the material in the National Museum, and since he has probably been one of the most prolific of all contributors to the systematic zoology of the United States.

The writer has in preparation special bibliographies of CHARLES GIRAUD and THEODORE GILL, but it is possible that before these can be published others, by other writers, will be assigned a place in the series. The one now most nearly ready for publication is that of ISAAC LEA, prepared by Mr. Newton P. Scudder.

WASHINGTON, *January 1, 1882.*

BIOGRAPHICAL SKETCH OF SPENCER FULLERTON BAIRD.

ANALYSIS.

- I. Outline of his public career.
- II. Honors and dignities.
- III. Ancestry and development of character.
- IV. Early friendships and their influence.
- V. Analysis of his work and its results.
- VI. Contributions to science and scientific literature.
- VII. Educational and administrative works.
- VIII. Work as Commissioner of Fisheries.
- IX. Epilogue.

I.

Spencer Fullerton Baird was born in Reading, Pennsylvania, February 3, 1823. In 1834 he was sent to a Quaker boarding-school kept by Dr. McGraw, at Port Deposit, Maryland, and the year following to the Reading Grammar School. In 1836 he entered Dickinson College, and was graduated at the age of seventeen. After leaving college, his time for several years was devoted to studies in general natural history, to long pedestrian excursions for the purpose of observing animals and plants and collecting specimens, and to the organization of a private cabinet of natural history, which a few years later became the nucleus of the museum of the Smithsonian Institution. During this period he published a number of original papers on natural history. He also read medicine with Dr. Middleton Goldsmith, attending a winter course of lectures at the College of Physicians and Surgeons, in New York, in 1842. His medical course was never formally completed, although in 1848 he received the degree of M. D., *honoris causa*, from the Philadelphia Medical College. In 1845 he was chosen professor of natural history in Dickinson College, and in 184— his duties and emoluments were increased by election to the chair of natural history and chemistry in the same institution. In 1848 he declined a call to the professorship of natural science in the University of Vermont. In 1849 he undertook his first extensive literary work, translating and editing the text for the "Iconographic Encyclopedia," an English version of Heck's *Bilder Atlas*, published in connection with Brockhaus's *Conversations Lexikon*.

July 5, 1850, he accepted the position of Assistant Secretary of the Smithsonian Institution, and October 3, at the age of twenty-seven years, he entered upon his life work in connection with that foundation—"the increase and diffusion of useful knowledge among men."*

His work as an officer of the Institution will be discussed more fully below. It was constant and arduous, but did not prevent the publication of many original memoirs, among the most elaborate of which are the Catalogue of North American Serpents (1853); the "Birds of North America" (1858); the "Mammals of North America" (1859); the "Review of North American Birds" (1864-'66); the "Geographical Distribution of North American Birds" (1865); the History of North American Birds, in connection with Thomas M. Brewer and Robert Ridgway (1874), and the preparation of numerous official reports. From 1870 to 1878 he was scientific editor of the periodicals published by Harper Brothers, of New York, and the author of their yearly cyclopedia of science, entitled "The Annual Record of Science and Industry." In 1871 he was appointed by President Grant to the position of United States Commissioner of Fish and Fisheries, an unsalaried office, to the duties of which he has for eleven years devoted a large portion of his time. In 1876 he served as one of the Government Board of Commissioners to the International Exhibition at Philadelphia, and was also a member of the international jury. In 1877 he was present, as advisory counsel, at the session of the Halifax Fishery Commission.

In May, 1878, after the death of Professor Henry, he was, by the unanimous vote of the Regents, elected Secretary of the Smithsonian Institution.

II.

Professor Baird, in 1856, received the degree of Doctor of Physical Science from Dickinson College, and in 1875 that of Doctor of Laws from Columbian University. He was, in 1878, awarded the silver medal of the Acclimatization Society of Melbourne; in 1879 the gold medal of the *Société d'Acclimatation* of France, and in 1880 the Erster Ehrenpreis of the *Internationale Fischerei Ausstellung* at Berlin, the gift of the Emperor of Germany. In 1875 he received from the King of Norway and Sweden the decoration of "Knight of the Royal Norwegian Order of St. Olaf." He was one of the early members of the National Academy of Sciences, and ever since the organization has been a member of its council. In 1850 and 1851 he served as permanent secretary of the American Association for the Advancement of Science, and since 1878 has been one of the trustees of the Corcoran Gallery of Art in Washington. He has been president of the Cosmos Club, and for many years a trustee of Columbian University. Among his honorary relations to numerous scientific societies of the United States and other countries are included those of foreign membership in the Linnæan

* The motto of the Smithsonian Institution and of its founder, JAMES SMITHSON.

Society of London, and the Zoological Society of London, honorary membership in the Linnæan Society of New South Wales, and corresponding membership in the *K. K. Zoologisch-botanische Gesellschaft*, Vienna; the *Sociedad de Geographia*, Lisbon; the New Zealand Institute, the *Koninklijke Natuurkundige Vereeniging in Nederlandsch Indië*, Batavia; the *Magyar Tudományos Akadémia*, Buda-Pesth; the *Société Nationale des Sciences Naturelles*, Cherbourg; the *Academia Germanica Naturæ Curiosorum*, Jena; the *Naturforschende Gesellschaft*, Halle; the *Naturhistorische Gesellschaft*, Nuremberg; the Geographical Society of Quebec; the Historical Society of New York; the *Deutsche Fischerei Verein*, Berlin.

The nomenclature of zoology contains many memorials of his connection with its history. A partial enumeration shows that over twenty-five species and one genus of fishes bear his name.

A post-office in Shasta County, California, located near the McCloud River Salmon Hatching Station of the United States Fish Commission, was named "Baird" by the Postmaster-General in 1877.

III.

His ancestry upon the one side was English, upon the other Scotch and German. His paternal grandfather was Samuel Baird, of Pottstown, Pa., a surveyor by profession, whose wife was Rebecca Potts. The Bairds were from Scotland, while the Potts family removed from Germany to Pennsylvania at the close of the seventeenth century. His great grandfather on the mother's side was the Rev. Elishu Spencer, of Trenton, one of the war preachers of the Revolution, whose patriotic eloquence was so influential that a price was set on his head by the British Government; his daughter married William M. Biddle, a banker, of an English family for many generations established in Pennsylvania, and identified with the banking interests of Philadelphia. Samuel Baird, the father of the subject of this sketch, established himself as a lawyer at Reading, Pennsylvania, and died when his son was ten years old. He was a man of fine culture, a strong thinker, a close observer, and a lover of nature and of out-of-door pursuits. His traits were inherited by his children, but especially by his sons Spencer and William. The latter, who was the elder, was the first to begin collecting specimens, and as early as 1836 had in hand a collection of the game-birds of Cumberland County. His brother soon became his companion in this pursuit, and six years later they published conjointly a paper entitled "Descriptions of two species, supposed to be new, of the Genus *Tyrannula* Swainson, found in Cumberland County, Pennsylvania."*

There are still in the museum at Washington specimens of birds prepared by these boys forty-five years ago by a simple process of evisceration, followed by stuffing the body-cavities full of cotton and arsenical

*See list on a subsequent page.

soap. The brother, William M. Baird, diverged into other paths, and at the time of his death in 1872 was United States collector of internal revenue at Reading.

The inheritance of a love of nature and a taste for scientific classification, the companionship of a brother similarly gifted, tended to the development of the young naturalist, and a still more important element was the encouragement of a judicious mother by whom he was permitted to devote the five years immediately following his graduation to his own devices and plans instead of being pushed at once into a profession. In 1841, at the age of eighteen, we find him making an ornithological excursion through the mountains of Pennsylvania, walking 400 miles in twenty-one days, the last day 60 miles between daylight and rest. The following year he walked more than 2,200 miles. His fine physique and consequent capacity for work are doubtless due in part to his outdoor life during these years.

IV. •

An important stimulus to the efforts of this young naturalist was the friendship which he formed as early as 1838 with Audubon, with whom he was for many years in correspondence, and who, in 1842, gave to him the greater part of his collection of birds, including most of his types of new species. Young Baird contributed many facts and specimens for the History of North American Quadrupeds at that time in preparation, as well as to the Ornithological Biography, and was only prevented by ill health from accompanying Audubon as his secretary on his six months' expedition to the Yellowstone in 1840. In those days were formed many of the friendships and partnerships with scientific men which influenced his after life. Among his early correspondents were George N. Lawrence (1841), John Cassin (1843), John G. Morris (1843), Thomas M. Brewer (1845), and S. S. Haldeman (1845). In 1847 he met Agassiz, then just arrived from Switzerland in company with Desor and Girard. At this time or a year later was projected the work of Agassiz and Baird on "The Fresh-water Fishes of the United States," which was, however, never published, although a number of illustrations and some pages of text were elaborated. In 1843 he translated Ehrenberg's "Corals of the Red Sea" for J. D. Dana, who was then preparing his reports for the United States exploring expedition. As early as 1846 we find him engaged in the preparation of a synonymy of North American birds, and visiting Boston to consult the libraries of Amos Binney and the Boston Society of Natural History for works not possessed by the Philadelphia Academy of Natural Sciences. This material was utilized twelve years later in the "Birds of North America."

As professor of natural history in Dickinson College he taught the seniors in physiology, the sophomores in geometry, and the freshmen in zoology. He found time, however, to carry on the works begun in pre-

vious years, and to make in summer extended collecting expeditions: To the Adirondacks in 1847; to Ohio in 1848, to collect, in company with Dr. Kirtland, from the original localities of the types, the fishes described by him in his work on the fishes of Ohio; to the mountains of Virginia in 1849; and to Lake Champlain and Lake Ontario in 1850.

When in 1850, upon the urgent recommendation of the late George P. Marsh, he was elected an officer of the Smithsonian Institution, he brought with him to Washington methods of work, developed in his personal experience, which became at once the methods of the establishment, and are still employed in many of its departments.

V.

There may be noted in the career of Professor Baird several distinct phases of activity, namely, (1) a period of twenty-six years, 1843-1869, occupied in laborious investigation and voluminous publication upon the vertebrate fauna of North America; (2) forty years of continuous contribution to scientific literature, of which at least ten were devoted to scientific editorship; (3) five years, 1845-1850, devoted to educational work; forty years, 1842-1883, devoted to the encouragement and promotion of scientific enterprises, and the development of new workers among the young men with whom he was brought into contact; (5) thirty-three years, 1850-1883, devoted to administrative work as an officer of the Smithsonian Institution, and in charge of the scientific collections of the government—twenty-eight as principal executive officer and five as Secretary and responsible head; (6) twelve years as head of the Fish Commission, a philanthropic labor for the increase of the food-supply of the world, and incidentally in promoting the interests of biological and physical investigation of the waters.

VI.

The extent of Professor Baird's contributions to science and scientific literature may be at least partially comprehended by an examination of the succeeding pages of the present work. The list of his writings is complete to the end of the year 1882, and contains 1,063 titles. Of this number 775 are brief notices and critical reviews contributed to the "Annual Record of Science and Industry," while under his editorial charge, 31 are reports relating to the work of the Smithsonian Institution, 7 are reports upon the American fisheries, 25 are schedules and circulars officially issued, and 25 are volumes or papers edited. Out of the remaining 200 the majority are formal contributions to scientific literature.

It seems scarcely necessary to remark that most of the official reports above referred to, as well as many of the brief articles in the Annual Record, contain important original matter.

Nineteen of the descriptive papers were published conjointly with Charles Girard, while the most elaborate work, "The Birds of North America," was prepared in its first edition with the aid of Messrs. Cassin and Lawrence, and in its second with that of Messrs. Brewer and Ridgway.

Of the total number of papers enumerated in the list 73 relate to mammals, 80 to birds, 43 to reptiles, 431 to fishes, 61 to invertebrates (these being chiefly reviews), 16 to plants, 88 to geographical distribution, 46 to geology, mineralogy, and paleontology, 45 to anthropology, 31 to industry and art, 109 to exploration and travel.

While the number of new species described does not necessarily afford any clue to the value of the work accomplished, it may not be uninteresting to refer to it as an indication of the pioneer work which it was necessary to do even in so prominent a group as the vertebrates. I note among mammals 49, birds 70, reptiles 186, fishes 56. Forty-nine of 220, or nearly one-fourth, of the mammals discussed in the "Mammals of North America," were there described for the first time. In the catalogue of serpents not more than 60 per cent. had been named, and in in preparation for studying the specimens, each was carefully ticketed with its locality, and then the 2,000 or more individuals were thrown indiscriminately into one great pile, and the work of sorting them out by resemblances was begun. Not the least valuable have been the numerous accurate figures of North American vertebrates, prepared under Professor Baird's supervision. These include representatives of 170 species of mammals and 160 species of reptiles, besides still many hundreds of birds.*

VII.

Passing to the consideration of the influence of Professor Baird on the encouragement of scientific enterprise, it seems scarcely necessary to call attention to the manner in which this influence has been exerted, since the relation of the Smithsonian Institution to scientific exploration, particularly in the lines of natural history and ethnology, is a part of the scientific history of the country, and since this department of the work of the Institution was always from its inception under the direction of the assistant secretary. The first grant made by the Institution for scientific exploration and field research was in 1848 to Spencer F. Baird, of Carlisle, for the exploration of the bone caves and the local natural history of Southeastern Pennsylvania.

From the start the Department of Explorations was under his charge; and in his reports to the Secretary, published year by year in the annual report of the Institution, may be found the only systematic record of government explorations which has ever been prepared. From 1850 to 1860 several extensive government expeditions were sent to

* In the bibliography below all these figures are thoroughly indexed.

the western territories, and it became the duty of Professor Baird to enlist the sympathies of the commanders of these expeditions in the objects of the Institution, to supply them with all the appliances for collecting, as well as with instructions for their use, and also in most cases to organize the natural history parties, nominate the collectors, employ and supervise the artists in preparing the plates, and in many instances to edit the zoological portions of the reports.

The fitting out of such expeditions was only a small part of the work; from the beginning until now there have been numerous private collectors, deriving their materials, their literature, and, to a considerable extent, their enthusiasm from the Smithsonian Institution, and consequently in correspondence with its officers. The Smithsonian "Instructions to Collectors," which has passed through several large editions, as well as numerous circulars written with a similar purpose, were prepared by Professor Baird in connection with this department of his work.

As a result of this extensive work of organization, a large number of young men have been trained as collectors and observers, and among them not a few have become eminent in various departments of science.

In addition to this special branch of his work, the assistant secretary had, from the start, the charge of certain departments of the routine work of the Institution; the system of international exchanges, for instance, which had ever been one of the leading objects of the Smithsonian Institution, was organized by him in its details. His first task, after entering upon his duties, was to distribute the second volume of the "Smithsonian Contributions to Knowledge." Already in connection with his private enterprises he had developed a somewhat extensive system of exchanges with European and American correspondents, and the methods thus established were expanded for the wider needs of the Institution. The main duty of the assistant secretary, however, was the development of the natural history collections. As has already been indicated, the private collection which he brought with him to Washington formed the nucleus of the Smithsonian museum. The only specimens in possession of the Institution at the time of his arrival were a few boxes of minerals and plants. The collections of the Wilkes Exploring Expedition, which constitute the legal foundation of the National Museum of the United States, were at that time under the charge of the National Institute; and, although by the act of incorporation the Smithsonian Institution was the legal custodian of the national cabinet of curiosities, it was not until 1857 that the Regents finally accepted the trust and the National Museum was definitely placed under the control of the Smithsonian Institution and transferred to its building. Until this time Congress had granted no funds for the support of the Smithsonian cabinets, and the collections had been acquired and cared for at the expense of the endowment fund. They had, however, become so

large and important in 1857 that the so-called "National Collection" at that time acquired were small in comparison.

The National Museum then had a double origin. Its actual although not its legal nucleus was the collection gathered in the Smithsonian building prior to 1857. Its methods of administration, which were in fact the very same that had been developed by Professor Baird in Carlisle as early as 1845, are those which are still in use, and which have stood the test of thirty years without any necessity for their modification becoming apparent. In the bibliography below is reprinted from the fifth annual report of the Smithsonian Institution, now exceedingly rare, a report by the assistant secretary in charge of the natural history department for the year 1850, which enumerates the specimens belonging to the Museum on January 1, 1851, including a full account of his own deposit.

Having thus almost from the very outset been associated with Professor Henry in the organization of the Smithsonian Institution, his course since his accession to the secretaryship has been a consistent continuation of that which had for twenty-eight years been adopted.

VIII.

The work of the Fish Commission, in one of its aspects, may perhaps be regarded as the most prominent of the present efforts of the government in aid of aggressive biological research.

On the 9th of February, 1874, Congress passed a joint resolution which authorized the appointment of a Commissioner of Fish and Fisheries. The duties of the Commissioner were thus defined: "To prosecute investigations on the subject (of the diminution of valuable fishes) with the view of ascertaining whether any and what diminution in the number of the food-fishes of the coast and the lakes of the United States has taken place; and, if so, to what causes the same is due; and also whether any and what protective, prohibitory, or precautionary measures should be adopted in the premises, and to report upon the same to Congress."

The resolution establishing the office of Commissioner of Fisheries required that the person to be appointed should be a civil officer of the government, of proved scientific and practical acquaintance with the fishes of the coast, to serve without additional salary. The choice was thus practically limited to a single man. Professor Baird, at that time assistant secretary of the Smithsonian Institution, was appointed and at once entering upon his duties soon developed a systematic scheme of investigation.

The Fish Commission now fills a place tenfold more extensive and useful than at first. Its work is naturally divided into three sections:

1. The systematic investigation of the waters of the United States and the biological and physical problems which they present. The scientific studies of the Commission are based upon a liberal and phi-

philosophical interpretation of the law. In making his original plans the Commissioner insisted that to study only the food-fishes would be of little importance, and that useful conclusions must needs rest upon a broad foundation of investigations purely scientific in character. The life history of species of economic value should be understood from beginning to end, but no less requisite is it to know the histories of the animals and plants upon which they feed or upon which their food is nourished; the histories of their enemies and friends, and the friends and foes of their enemies and friends, as well as the currents, temperatures, and other physical phenomena of the waters in relation to migration, reproduction, and growth. A necessary accompaniment to this division is the amassing of material for research to be stored in the national and other museums for future use.

2. The investigation of the methods of fisheries, past and present, and the statistics of production and commerce of fishery products. Man being one of the chief destroyers of fish, his influence upon their abundance must be studied. Fishery methods and apparatus must be examined and compared with those of other lands, that the use of those which threaten the destruction of useful fishes may be discouraged, and that those which are inefficient may be replaced by others more serviceable. Statistics of industry and trade must be secured for the use of Congress in making treaties or imposing tariffs, to show to producers the best markets, and to consumers where and with what their needs may be supplied.

3. The introduction and multiplication of useful food-fishes throughout the country, especially in waters under the jurisdiction of the general government, or those common to several States, none of which might feel willing to make expenditures for the benefit of the others. This work, which was not contemplated when the Commission was established, was first undertaken at the instance of the American Fish Cultural Association, whose representatives induced Congress to make a special appropriation for the purpose.

IX.

Comment upon the facts presented in this biographical sketch seems to be unnecessary. Future historians of American science will be better able than are we to estimate justly the value of the contributions to scientific literature which are enumerated in the bibliography; but no one not living in the present can form an accurate idea of the personal influence of a leader upon his associates, and upon the progress of thought in his special department, nor can such an influence as this well be set down in words. This influence is apparently due not only to extraordinary skill in organization, to great power of application and concentration of thought constantly applied, and to a philosophical and comprehensive mind, but to an entire and self-sacrificing devotion to the interests of his own work and that of others.

A LIST OF GENERA AND SPECIES NAMED IN HONOR OF
PROFESSOR BAIRD.

- Bairdiella*, GILL. Proc. Acad. Nat. Sci. Phila., xiii, 1861, p. 83. (Type. *Bodianus argyroleucus*, Mitchill.)
A genus of the family *Scienuidae* was represented by one species on the east coast of the United States.*
- Acanthidops Bairdi*, RIDGWAY. Proc. U. S. National Museum, iv, 1882, p. 336.
A bird of the family *Dendrocolaptidae*, inhabiting Costa Rica.
- Actodromus Bairdii*, COUES. Proc. Acad. Nat. Sci. Phila., 1861, p. 494. (*Atodromus*) Sclater, Proc. Zool. Soc. 1867, p. 332.
A bird of the family *Scelopacidae*, inhabiting North America, chiefly in the interior.
- Alepocephalus Bairdii*, GOODE & BEAN. Proc. U. S. National Museum, ii, p. 55, July 1, 1879.
A fish of the family *Alepocephalidae*, inhabiting the deep waters of the northwestern Atlantic.
- Auchitherium Bairdii*, LEIDY. Owen's Rep. Geol. Surv. Wis., &c., 1852, p. 572. Ext. Vert. Fauna, Wash. Terr., 1873, p. 322, pl. vii, fig. 15.
A fossil mammal of the order *Perissodactyli*, family *Auchitheriidae*, found in the Manvaises Terres of White River, Dakota, and the tertiary formations on John Day's River, Oregon.
- Archaster Bairdii*, VERRILL. Amer. Journ. Sci., xxiii, p. 139, February, 1882.
A star-fish of the family *Astropectinidae*, inhabiting the deeper waters off the New England coast.
- Buteo Bairdi*, HOY. Proc. Acad. Nat. Sci. Phila., vi, 1853, 451.
A bird of the family *Falconidae*, inhabiting
= *Buteo Swainsoni*, Bonap.
- Calliostoma Bairdii*, VERRILL & SMITH. Amer. Journ. Sci., xx, p. 396, November, 1880.
A gastropod mollusk of the family *Trochidae*, inhabiting the deep waters off the New England coast.
- Campephilus Bairdi*, CASSIN. Proc. Acad. Nat. Sci. Philadelphia, 1863, p. 322.
A bird of the family *Picidae*, inhabiting
- Certhiola Bairdi*, CABANIS. Journ. Ornitho., 1865, p. 412.
A bird of the family *Sylatricolidae*, a member of the West Indian fauna.
= *Certhiola bahamensis*, Reich.
- Coccygus Bairdi*, SCLATER. Proc. Zool. Soc., March, 1864, p. 120.
A bird of the family *Cuculidae*, described from Jamaica.
- Coluber Bairdi*, YARROW. Bull. U. S. Nat. Museum, No. 17, 1880, p. 41.
A serpent of the family *Colabridae*, inhabiting Texas.

* The name BAIRDIA was dedicated to Dr. Baird of the British Museum.

- Cottus Bairdii*, GIRARD. Proc. Amer. Assoc. Adv. Sci. ii, 1850, p. 410. Proc. Acad. Nat. Sci. Phila., iii, 1850, p. 189. Smithsonian Contributions, iii, 1852. Mon. Cott., p. 44, pl. i, figs. 5, 6.
A fish of the family *Cottidae*, inhabiting the streams of Ohio and Cayuga Lake, N. Y.
- Delphinus Bairdii*, DALL. Proc. Cal. Acad. Sci., v, Jan., 1873. Seamon, Marine Mammals of the Northwest Coast, 1874, p. 283 (and 99), pl. xix, fig. 1.
A cetacean of the family *Delphinidae*, found in the Pacific waters of the United States.
- Dolium Bairdii*, VERRILL & SMITH. Amer. Journ. Sci., xxii, p. 296, Oct., 1881.
A gastropod mollusk of the family *Buccinidae*, inhabiting the deep waters off the New England coast.
- Elasmognathus Bairdii*, GILL. Proc. Acad. Nat. Sci. Phila., 1865, p. 183.
A mammal of the family *Tapiridae*, inhabiting Central America.
- Emberiza Bairdii*, AUDUBON. Birds of North Am., vii, 1843, p. 359, pl. 500.
Baird, Brewer & Ridgway. Birds of North America, i, 1874, p. 531, pl. xxv, fig. 3.
A bird of the family *Fringillidae*, inhabiting the central plains of North America. = *Centronyx Bairdii*, (Audubon).
- Empidonax Bairdii*, SCLATER. Proc. Zool. Soc. Lond., 1858, p. 301.
A bird of the family *Tyrannidae*, inhabiting the mountains of Central America.
- Graculus Bairdi*, "GRUBER, MSS.", COOPER. Proc. Phil. Acad. 1865, p. 5.
A bird of the family *Graculidae*, inhabiting the Farallone Islands, California.
= *Phalacrocorax Bairdi*, (Gruber).
- Junco Bairdi*, BELDING, MSS. Proc. U. S. Nat. Mus., 1883.
A bird of the family *Fringillidae*, inhabiting Lower California
- Lepus Bairdi*, HAYDEN. Amer. Nat., iii, 1869, 115. Bull. Essex Inst., vi, 1874, pp. 61-66.
A mammal of the family *Leporidae*, inhabiting the Rocky Mountains.
= *Lepus americanus*, var. *Bairdi*, ALLEN.
- Macrurus Bairdii*, GOODE & BEAN. Amer. Journ. Sci. and Arts, xiv, p. 471, Dec., 1877.
A fish of the family *Macruridae*, inhabiting the deep waters of the north-western Atlantic.
- Melanerpes formicivorus Bairdi*, RIDGW. Bull. U. S. Nat. Mus., No. 21, 1881, 34.
A bird of the family *Picidae*, inhabiting California.
- Mus Bairdii*, HOY & KENNICOTT. Agricultural Report, U. S. Patent Office for 1856 (1857), p. 92, pl. xi.
A mammal of the family *Muridae*, inhabiting the Mississippi valley.
= *Hesperornys michiganensis*, Wagner (A. & B.).

- Octopus Bairdii*, VERRILL. Amer. Journ. Sci. and Arts, 1873, p. 5.
A cephalopod mollusk of the family *Octopodidae*, inhabiting the deep waters off the New England coast.
- Palæotherium Bairdii*, LEIDY. Proc. Acad. Nat. Sci. Phila., v, p. 122, and 6th Ann. Rep. Smithsonian Institution, 1852, p. 64.
A fossil mammal of the family *Palæotheriidae*, found in the territory of the Manvaises Terres of Dakota.
- Papilio Bairdii*, EDWARDS. Proc. Ent. Soc. Phila., 1866.
A butterfly of the family *Papilionidae*, inhabiting Arizona and New Mexico.
- Picus Bairdi*, SCLATER (MS). Malherbe, Mon. Pic., I, p. 188, vol. xxvii, figs. 7, 8.—*Picus scalaris*, Wagler.
A bird of the family *Picidae*.
- Pomacentrus Bairdii*, GILL. Proc. Acad. Nat. Sci. Phila., 1862, 148.
A fish of the family *Pomacentridae*, inhabiting the waters of Lower California.
- Pyruia Bairdi*, MEEK & HAYDEN. Proc. Acad. Nat. Sci. Phila., vii, 1856, p. 66, fig. —, in Meek's Invertebrate Paleontology, U. S. Geol. Surv. of the Territories, ix, pl. xxxi, fig. 10 a. b.
A fossil mollusk of the family *Pyruilidae* from the Fox Hills group of the Upper Missouri cretaceous series.
=*Pyropsis Bairdi*, (M. & H.) MEEK.
- Salmo Bairdii*, SUCKLEY. Am. Lyc. Nat. Hist. N. Y., vii, 1869, p. 309 (*Salmo*).
A fish of the family *Salmonidae*, inhabiting the streams of the Pacific coast of North America.
- Saurophagus Bairdii*, GAMBEL, Journ. Phila. Acad., i, second ser., 1847, p. 40.
- Syngnathus Bairdianus*, DUMERIL. Hist. Nat. Poiss., ii, 1870, p. 574.
A fish of the family *Syngnathidae*, inhabiting the Pacific coast of Mexico.

BIBLIOGRAPHY OF THE PUBLICATIONS

OF

PROFESSOR SPENCER FULLERTON BAIRD, LL. D.

I. CHRONOLOGICAL CATALOGUE.

1.

1843. BAIRD, SPENCER F., and WILLIAM M. BAIRD.* Descriptions of two Species, supposed to be new, of the Genus *Tyrannula* Swainson, found in Cumberland County, Pennsylvania. By William M. & Spencer F. Baird, of Carlisle, Pa. < *Proc. Acad. Nat. Sci. Phila.*, i, pp. 283-285, 1843. Presented for publication July 11; ordered printed July 25.

<i>Tyrannula flaviventris</i> , Baird, n. s.	283
Carlisle, Pa., 1840.	
<i>Tyrannula minima</i> , Baird, n. s.	284
Near Carlisle, Pa., May, 1839.	

2.

1844. BAIRD, SPENCER F., and WILLIAM M. BAIRD. List of Birds found in the vicinity of Carlisle, Cumberland County, Penn., about Lat. 40° 12' W., Lon. 77° 11' W. By William M. & Spencer F. Baird. < *Amer. Journ. Sci. and Arts*, xlii, 1844, No. 2, Jan.-Mar., art. vi, pp. 261-273.

201 species are enumerated, the times of appearance and relative abundance of each being mentioned. Breeders marked. The following summation is made:—

"Species spending the summer	112
Species resident all the year	38
Winter visitors	14."

4 other species are indicated, as well as a number supposed to have been observed by B. S. Barton and others.

3.

1844. BAIRD, SPENCER F., and WILLIAM M. BAIRD. Descriptions of two species, supposed to be new, of the genus *Tyrannula* (Swainson), found in Cumberland Co., Penn. By Wm. M. & Spencer F. Baird, of Carlisle, Pa. < *Amer. Journ. Sci. and Arts*, xlii, 1844, No. 2, Jan.-Mar., pp. 273-276.

Same as No. 1.

<i>Tyrannula flaviventris</i>	274
<i>Tyrannula minima</i>	275

4.

1844. BAIRD, SPENCER F. On the application of bi-chromate of potassa to photographic purposes. < *Literary Record and Journal of the Linnæan Association of Pennsylvania College*, i, No. 2, Dec., 1844., pp. 17-19.

"By Spencer F. Baird of Carlisle, Pa." Describes the process of copying other flat objects on paper sensitized by bi-chromate of potassa.

* WILLIAM M. BAIRD, brother of Prof. S. F. Baird, born in Reading, Pa., Aug. 4, 1817, died in Reading Oct. 19, 1872. Entered Lafayette College 1834. Graduated at Dickinson College 1837. Admitted to Berks County bar, Reading, April 12, 1844. Mayor of Reading 1855-56. Collector of Internal Revenue, 8th District of Pennsylvania, 1869-1872.

1844. BAIRD, SPENCER F.—Continued.

"To the purpose of copying a coarse print, a piece of music, an embroidering pattern or a leaf this process is admirably adapted. It is for the latter object that the art has been mostly used by the writer, who last summer copied leaves of nearly all the trees and shrubs of Cumberland County (Pennsylvania), amounting to nearly two hundred species. These photographs are as valuable for scientific purposes as good engravings of the same would be, perhaps more so, as not only is the outline perfectly given, but in most cases the fine and delicate nervation, whose arrangement frequently forms a specific character, is distinctly preserved."

This collection of leaf photographs, still preserved in the National Museum, has been one of the standard resources of American paleophytologists, and has been used in the preparation of many of the works on the Fossil Botany of the United States.

5.

1845. BAIRD, SPENCER F. Contributions towards a catalogue of the trees and shrubs of Cumberland County, Pa. < *Lit. Rec. and Journ. Linnæan Assoc. Pennsylvania College*, i, No. 4, Feb., 1845, pp. 57-63.

After introductory remarks on the geology and topography of Cumberland County and the relations of peculiarities of vegetation to the soil, a list of the trees and shrubs is given, with common names, stations, and notes regarding abundance. The whole number of species enumerated is 150, 20 of which had been found in Chester County.

The collection of woods, cut and polished, prepared in connection with this paper is preserved in the National Museum.

6.

1845. BAIRD, SPENCER F. Catalogue of birds found in the neighborhood of Carlisle, Cumberland Co., Pa. < *Lit. Rec. and Journ. Linnæan Assoc. Pennsylvania College*, i, No. 12, Oct., 1845, pp. 249-257.

A revision of No. 2.

A list of the species of birds collected by the writer between 1840 and 1845 (with a very few exceptions) within a few miles of Carlisle. "None are admitted without having been actually killed and preserved; in no case have any been admitted on the authority of others. A residence nearer the Susquehanna would no doubt have enabled us to increase this number considerably, as we have heard of several not in this list which have been killed about Harrisburg. Some of these will be found in a catalogue of additional species procured at Marietta, Pa. (25 miles south of Cumberland Co., by Mr. J. Libhart), most if not all of which touch our eastern border. The nomenclature employed is based on that of Prince Bonaparte, . . . with the additions, however, of the authority for each species, and various alterations called for by a strict regard to the law of priority. The name immediately succeeding each species is that of its first describer, and if in parenthesis, under a different genus. The second name is his who first placed that particular specific appellation under its present genus. A (h) prefixed shows that this bird breeds here."

The list of species is supplemented by references to Audubon's names, by the common names, and notes on relative abundance and season of appearance. The paper is summed up as follows (p. 257):

"Total of species in Cumberland Co	202
of which:—Breeding	104
Summer visitors	66
Resident	38
Transitory in spring	90
Seen in autumn only	8."

The Marietta list includes 9 species, and 6 others are mentioned "of whose existence in our vicinity we have had strong proof (but) are not included for want of specimens." None of these are included in the summation.

The following combinations appear in this paper for the first time:—

<i>Myiodiactes pusillus</i> (Wils.) Baird. R.	252
<i>Carpodagus purpureus</i> (Gim.) Baird. R.	254
<i>Pluvialis virginianus</i> (Bork) Baird. R.	
<i>Nycticorax discors</i> (Nutt.) Baird. R.	255
<i>Porzana carolina</i> (Linn.) Baird. R.	
<i>Porzana noveboracensis</i> (Gim.) Baird. R.	
<i>Porzana jamaicensis</i> (Briss.) Baird. R.	257

7.

1846. B[AIRD], S[PENCER] F. The sea-serpent in Norway. < *Lit. Rec. and Journ. Linnæan Assoc. Pennsylvania College*, ii, No. 5, Mar., 1846, pp. 106-107.
 Notice of information obtained by Dr. H. Boie, while on a tour through Norway in 1817.

8.

1846. BAIRD, SPENCER F. Hints | for Preserving | Objects of Natural History | prepared | by Prof. S. F. Baird, | for | Dickinson College, | Carlisle, Pa. | Carlisle: | Printed by Gitt & Hinckley, | 1846. 8vo. pp. 12.
 Reptiles and Fish, pp. 7, 8.
 A supplementary schedule without title-page was published in 1848.

9.

1847. BAIRD, SPENCER F. Dr. Leidy read a letter from Prof. Spencer F. Baird, of Carlisle, Pa., describing a Hybrid between the Canvass back Duck and the Common Duck. < *Proc. Acad. Nat. Soc. Phila.*, iii, 1846 and 1847, p. 209 (May 4, 1847).
 Nothing additional to the above ever published.

10.

1849. BAIRD, SPENCER F. Revision of the North American Tailed-Batrachia, with descriptions of new genera and Species. < *Journ. Acad. Nat. Sci. Phila.*, 2d ser., i, pp. 281-294, Oct., 1849.

Issued also as excerpt, without title or repagination.

"The following notes, introductory to a more detailed memoir on the same subject, will, it is hoped, throw some light upon this obscure portion of American zoology. To this we would refer for the descriptions of species, with their anatomical and physiological characters, giving only in this place brief outlines of the genera and the synonymy of the species."

The various genera are defined, and a synonymic list of species is given, with notes upon habitats.

<i>Desmognathus</i> (Baird), n. g. (on <i>S. niger</i> and <i>S. fuscus</i> , auct.).....	282
The following new combinations are made:—	
<i>Ambystoma punctata</i> (Linn.) Baird. R.....	283
<i>Ambystoma opaca</i> (Gravenhast) Baird. R.	
<i>Ambystoma jeffersoniana</i> (Green) Baird. R.	
<i>Ambystoma macrodactyla</i> , Baird, n. s. (name given only, species described below).	
<i>Ambystoma tigrina</i> (Green) Baird. R.....	284
<i>Ambystoma lurida</i> (Sager) Baird. R.	
<i>Ambystoma mavortia</i> , Baird, n. s. (name only, described below).	
<i>Ambystoma episcopus</i> , Baird, n. s. (name only, described below).	
<i>Notophthalmus viridescens</i> (Rafin) Baird. R.	
<i>Notophthalmus torosus</i> (Eschscholtz) Baird. R.	
<i>Plethodus erythronota</i> (Green) Baird. R.....	285
<i>Desmognathus niger</i> (Green) Baird. R.	
<i>Desmognathus fuscus</i> (Rafin.) Baird. R.	
<i>Desmognathus auriculatus</i> (Holbrook) Baird. R.	
<i>Pseudotriton montanus</i> , Baird, n. s. (name only, described below).....	287
<i>Pseudotriton salmoneus</i> (Stover) Baird. R.	
<i>Spelerpes longicauda</i> (Green) Baird. R.	
<i>Spelerpes guttolineata</i> (Holbrook) Baird. R.	
<i>Spelerpes bilineata</i> (Green) Baird. R.	
<i>Spelerpes cirrigera</i> (Green) Baird. R.	
<i>Batrachoseps quadridigitata</i> (Holbrook) Baird. R.	
<i>Necturus lateralis</i> (Say) Baird. R.....	290
<i>Necturus maculatus</i> (Barnes) Baird. R.	
<i>Siredon maculatus</i> (Owen) Baird. R.....	292

11.

1849. BAIRD, SPENCER F. Descriptions of four new species of North American Salamanders, and one new species of Scink. < *Journ. Acad. Nat. Sci. Phila.*, 2d ser., i, Oct., 1849, pp. 292-294.
Ambystoma macrodactyla, Baird, n. s. 292
 Astoria, Oreg. J. K. Townsend, M. D.

1849. BAIRD, SPENCER F.—Continued.

Ambystoma mavortia, Baird, n. s.

New Mexico. Dr. Witzlizenus.

Ambystoma episcopus, Baird, n. s. 293
Kemper County, Miss. Clinton Lloyd.*Pseudotriton montanus*, Baird, n. s.

South Mountain, near Carlisle, Pa. S. F. Baird.

Plestiodon anthracinus, Baird, n. s. 294
South Mountain, near Carlisle, Pa. S. F. Baird.

12.

1850. BAIRD, SPENCER F. Descriptions of four new species of North American Salamanders, and one new species of Sciuk. <*Amer. Journ. Sci. and Arts*, ix, 2d ser., Jan., 1850, pp. 137-139.The memoir in the *Journal of the Academy of Natural Sciences*, (2) i, pp. 292-294, is given in full, prefixed by a commendatory notice by the editor of the *Journal*, of this paper and the one on the Tailed Batrachians.

13.

1850. BAIRD, SPENCER F. On the Bone Caves of Pennsylvania. <*Proc. Amer. Assoc. Adv. Sci.*, ii, 1850, pp. 352-355. (Cambridge Meeting, Aug., 1849.) Read Aug. 20, 1849.

Explorations of a cave near Carlisle, Pa., and two others in Pennsylvania.

14.

1850. BAIRD, SPENCER F. On the Urodelian Batrachians. <*Proc. Amer. Assoc. Adv. Sci.*, ii, 1850, p. 402.

A verbal abstract of this paper was presented to the Association and only the title was published.

14a.

1850. [BAIRD, SPENCER F.] Registry of Periodical Phenomena.

(Printed on a half-sheet of thin, blue letter-paper.) Published by the Smithsonian Institution.

"The Smithsonian Institution, being desirous of obtaining information with regard to the periodical phenomena of animal and vegetable life in North America, respectfully invites all persons who may have it in their power to record their observations and to transmit them to the Institution. The points to which particular attention should be directed are the first appearance of leaves and of flowers in plants; the dates of appearance and disappearance of migratory or hibernating animals—Mammalia, Birds, Reptiles, Fishes, Insects, &c.; the time of nesting of Birds; of moulting of and littering of Mammalia; of utterance of characteristic cries among Reptiles and Insects, and anything else which may be deemed noteworthy.

"A list of plants is appended to which particular reference should be had in making observations. It has been prepared from materials furnished by Dr. John Torrey and others, and will be found to contain many species distributed throughout the United States, together with an indigenous number to, or cultivated in Europe. For the present, attention may be paid alone to the time of flowering of these species, this period in all cases being indicated by the first appearance of the anther in the expanding flower.

"The Smithsonian Institution is also desirous of obtaining detailed list of all the animals and plants of any locality throughout this continent. These, when practicable, should consist of the scientific names as well as those in common use; but when the former are unknown, the latter alone may be employed. It is in contemplation to use the information thus gathered in construction of a series of species, showing the geographical distribution of the animal and vegetable kingdoms of North America."

15.

1850. BAIRD, SPENCER F. General Directions for Collecting and Preserving Objects of Natural History.

Published by the Smithsonian Institution. Printed on a half-sheet of blue letter-paper. On the back a list of "special desiderata."

A letter from the Quartermaster-General, dated March 31, 1848, granting facilities for transportation in accordance with request of Professor Baird.

16.

1851. BAIRD, SPENCER F. Report of the Assistant Secretary in charge of the natural history department [of the Smithsonian Institution] for the year 1850. <Fifth Annual Report of the Secretary of the Smithsonian Institution for the years 1850, 1851, pp. 41-50.

Contains a list of the principal accessions to the Museum of the Smithsonian Institution made prior to January 1, 1851, p. 41, and summary of Specimens belonging to S. F. Baird and deposited by him in the cabinet of the Smithsonian Institution.*

To JOSEPH HENRY, LL. D.,

Secretary of the Smithsonian Institution:

SIR: I beg leave to present to you a report of operations up to January 1, 1851, in the Department of Natural History, assigned to my charge.

I commence with a list of the most important specimens of natural history received at the Smithsonian Institution prior to January 1, 1851. The dates of reception have not been given, owing to the fact that most had arrived before July 1, 1850, the period when my official connection with the Institution commenced. More detailed accounts of these objects will hereafter be furnished, as well as of those which may in future be received.

LIST OF THE PRINCIPAL ACCESSIONS TO THE MUSEUM OF THE SMITHSONIAN INSTITUTION MADE PRIOR TO JANUARY 1, 1851.

Lieutenant Lynch, U. S. N. Sealed bottles containing water from the Dead Sea; cones of the cedar of Lebanon.

Miss D. L. Dix. Box of minerals from North Carolina.

Dr. F. B. Hough. Box of minerals and fossils from St. Lawrence County, New York.

Mr. Guest. Box of minerals from same locality.

Mr. Polkinhorn. Box of Tertiary fossils from North Carolina.

Dr. James Eights, Albany, N. Y. Box of sands, clays, and concretions from the vicinity of the city of Albany, N. Y.

Dr. William B. Smith, Indiana. Silurian fossils from Indiana.

William Phillips, Esq., Augusta, Ga. Box of minerals from Georgia.

Oscar Freeman and Gilbert Taylor, civil engineers. Very large specimens of crystallized calcareous spar coated with quartz, found in tunnelling St. Anthony's Nose, Peekskill, N. Y.

Faxon D. Atherton, Esq. Specimens of native silver from Chili.

Maj. B. Alvord, Fort Gratiot, Mich. Keg containing fishes from Lake Huron, caught in the vicinity of Fort Gratiot.

Col. J. J. Abert. Box of minerals from Arkansas.

R. J. Pollard, Washington City. Skeleton of gazelle (*Antilope saiga* Pall.) from Turkey.

Thomas Whelpley, Brest, Mich. Cask of Unionidæ and other shells from Lake Erie.

John G. Pendergast, Sackett's Harbor. Box of minerals.

Dr. Jared P. Kirtland, Cleveland, Ohio. Jar of rare salamanders.

Maj. J. H. Carleton, Fort Leavenworth. Skull of bighorn (*Ovis montana*); horns of bighorn; antlers of black-tailed deer (*Cervus macrotis*); skull of Antelope (*Antilope americana*), from Black Hills, Fort Laramie.

W. Pidgeon, Iowa. Crania and other relics from various aboriginal mounds; paintings in oil on cloth, of various mounds in the Northwest, by a native Sioux Indian.

Robert Howell, Nichols, Tioga County, N. Y. Box of minerals and fossils from Tioga County, N. Y.

THE FOLLOWING SPECIMENS HAVE BEEN RECEIVED FROM COLLECTORS WHO WERE ASSISTED IN THEIR EXPLORATIONS BY THE SMITHSONIAN INSTITUTION:

Augustus Fendler. Collections of plants made in the vicinity of Santa Fé, N. Mex., in 1846 and 1847.

Charles Wright. Plants collected in an expedition from Texas to El Paso in 1849.

Thaddeus Culbertson. Skins, skulls, and skeletons of mammalia from the Upper Missouri fossil vertebrate animals from White River.

Many specimens brought back by Mr. Culbertson were presented to the Institution through him by members of the American Fur Company. Among them may be mentioned Messrs. Alexander Culbertson, Ferdinand Culbertson, Edward T. Denig, Schlegel and Gilbert. Messrs. Denig and F. Culbertson, at the request of Mr. Alexander Culbertson, prepared skins of the grizzly bear and other large mammalia.

* This list and summary, not having been included with the Secretary's report in the volume of reprints issued in 1857, is here reproduced, being of much interest as a record of the collections which formed the nucleus of the National Museum.

1851. BAIRD, SPENCER F.—Continued.

THE FOLLOWING SPECIMENS HAVE BEEN DEPOSITED IN CONFORMITY WITH THE PROVISIONS OF THE ACT ESTABLISHING THE SMITHSONIAN INSTITUTION:

General Land Office. Minerals illustrating the geological survey of the mineral region of Lake Superior, by Dr. Charles T. Jackson, contained in nineteen boxes.

Possessing myself large collections in different branches of zoology, I have deposited them with the Institution. The following list contains a brief enumeration of the most important of these. It will thus be evident to the naturalist that the objects already secured by the Smithsonian Institution, if not as numerous as in other collections, are yet valuable as being more than usually complete in certain neglected branches of natural history.

SUMMARY OF SPECIMENS BELONGING TO S. F. BAIRD, AND DEPOSITED BY HIM IN THE CABINET OF THE SMITHSONIAN INSTITUTION.

MAMMALIA.

Skins of the principal mammalia of the Northern and Middle States and of Eastern Europe, with numerous specimens of the smaller species preserved in alcohol.

BIRDS.

A collection of about five hundred species of North American birds in skins, consisting of about twenty-five hundred specimens in the various stages of age, sex, and season.

About two hundred and fifty species of European birds in one thousand specimens.

Eggs of about one hundred and fifty species of North American birds. Duplicates of many of them, in some cases amounting to over a hundred of a single species. The nests accompany the eggs of many of these species.

Nests and eggs of about seventy-five species of European birds, likewise in duplicate.

REPTILES AND FISHES.

A collection of the reptiles and fishes of the United States, at present contained in more than five hundred glass jars, and in numerous barrels, kegs, and tin vessels. Most of these species are represented by numerous specimens, amounting in certain cases to hundreds and even thousands of a single species. No approximation can, at present, be formed as to the number, either of the specimens or of the species. Very many, especially of the fishes, are still undescribed. Most of them have been personally collected in special expeditions to various parts of the country, such as Eastern and Western Pennsylvania, the great lakes, Northern and Eastern Ohio, Southern and Western Virginia, &c.; others have been furnished by contributors in Georgia, Florida, Mississippi, Arkansas, and other States. This collection is especially rich in batrachian reptiles, which are preserved in large numbers in all their peculiar conditions of transformation. There is, in addition to these, a good collection of the fresh-water fishes and reptiles of Central and Eastern Europe.

EMBRYOLOGY.

Embryos of many birds, mammals, and batrachian reptiles.

OSTEOLOGY.

Skulls and skeletons of many North American vertebrata, amounting to some six hundred specimens. A considerable number also belonging to European species.

Also, microscopical sections of teeth and bone of various species of North American vertebrata.

FOSSIL REMAINS.

A large collection of fossil bones from various caves in Pennsylvania and Virginia. This includes nearly all the species of mammalia now living in the United States, with quite a number of those which are now entirely extinct. Chelonian remains likewise in large number.

* * * * *

Some general suggestions in regard to future operations of the Smithsonian Institution in the Department of Natural History, as follows:

"I beg leave, in conclusion, to present some general suggestions in regard to future operations of the Smithsonian Institution, in the Department of Natural History. It is a fundamental principle in its organization, as presented in the programme and your annual reports, not to

1851. BAIRD, SPENCER F.—Continued.

attempt complete collections of all natural objects, but rather to gather up such materials for investigation as have been comparatively neglected by others. It may, indeed, be desirable, for purposes of general examination, to have extensive series of specimens from the three kingdoms of nature—animal, vegetable, and mineral—so far as they can be procured and exhibited without undue expense of time, money, and space. For the present, however, attention should be directed mainly to such branches as hitherto may not have had their due share of attention.

"A prominent object in making collections should be to furnish to travelers the means of determining the character of objects collected in various parts of North America.

"Hitherto, officers of the Army returning to Washington have generally been obliged to send or carry these objects out of the city for the purpose of identification or verification, thus involving a considerable loss of time and credit. These specimens becoming widely scattered rarely return hither, and, when another occasion arises, the whole labor has to be repeated. By retaining them here and combining with them such series of specimens from North America, and other parts of the world, as may be specially procured for the purpose, very little delay in making up reports need hereafter arise. It will, of course, be necessary to call in the aid of the library in procuring all the general and special works which may be required in these investigations. Towards such help the rich collection of transactions of learned societies, already in the library of the Institution, and augmenting daily, will greatly tend.

"Collections illustrating the general natural history of North America become, then, an object of primary importance. Much valuable material of this kind is now on hand and much, it is hoped, will be procured in the various ways hereafter specified. An exceedingly important aid to this is furnished by the act of Congress establishing the Smithsonian Institution, which specifies that all objects of natural history belonging, or hereafter to belong, to the United States, in whosever's custody the same may be, shall be delivered to such persons as are authorized by the Board of Regents to receive them. This entrusts to the Institution the custody of all collections publicly and officially made; but there are many valuable specimens procured in a private way whose acquisition must depend on the co-operation and assistance of officers of the various expeditions and of heads of departments. Officers stationed at the various military posts have it in their power to do much by procuring the objects of natural history in their vicinity and forwarding them to Washington. It is earnestly hoped that this co-operation may be obtained generally.

"Next in importance to North American objects of nature are those of Europe. The ties uniting the two continents are not merely those of moral, civil, and political relationship, for the connection existing between the natural history of the two is almost as intimate. A large proportion of the genera found in the one occur in the other—often the same species—or those that are very closely allied. This is true of all orders of animals and of most families of plants.

"Next to Europe comes Japan, a region which, in some respects, is more closely allied to our country than even Europe. This is especially the case with respect to reptiles, some of which, as species of *Plestiodon* and others, have been considered by eminent herpetologists absolutely identical with North American. Unfortunately there are at the present time almost insuperable difficulties in the way of procuring Japanese specimens; the Dutch naturalists being the only ones who have succeeded in exploring even the shores of this country. Little can be done, therefore, except by exchange with the museums of Holland.

"With regard to collections from other countries than those specified, the best rule will be to seek for those series which the other museums of the country do not possess. What these are I do not, at present, feel prepared to state; but hope to have it in my power in a future report to illustrate more fully this subject in a general account of the different collections in North America.

"It may, perhaps, be well to indicate briefly the branches of North American natural history which have received most attention. Mammalia have been ably investigated by Godman, Harlan, Audubon, Bachman, and others; the present state of our knowledge of the subject being exhibited in the works of the two last-named gentlemen. There is, however, no good collection of these animals; that of the Academy of Natural Sciences of Philadelphia being much the best in the country. The private collection of Mr. Audubon is more complete than any other. It is a mortifying fact that this gentleman was obliged to have recourse to foreign museums for the purpose of figuring and describing certain North American species which should have been accessible in one collection, at least, in this country.

"The ornithological collections of the country, both public and private, are very numerous. Among the former that of the Academy of Natural Sciences is by far the best. The New York Lyceum and the Boston Natural History Society have pretty good collections. Of private collections, among the best are those of Messrs. Bell, Giraud, and Lawrence, of New York. The ornithology of North America, east of the Mississippi, has been pretty well worked up, but much remains to be done west of this boundary.

1851. BAIRD, SPENCER F.—Continued.

"General collections of North American reptiles are very rare in this country; that of the Philadelphia Academy, as usual, being the best among public museums.

"Fishes have been preserved in several museums throughout the country. The Boston Natural History Society has the best series of North American marine species. The New York Lyceum comes next. Neither possesses many fresh-water species, being vastly exceeded in this respect by the collections of Professor Agassiz and my own. There is more difficulty in preserving alcoholic specimens, as collections of reptiles and fishes must for the most part necessarily be, than those that are dried; it is to this fact that the scanty representation of these classes of vertebrata is owing.

"Among insects, Coleoptera have been almost exclusively studied. The private collections of Messrs. Leconte, Haldeman, Morris, Harris, Melsheimer, and many others are rich in species. The Messrs. Leconte, father and son, have the largest of these, embracing many hundreds and indeed thousands of undescribed species. The public collection of the Academy of Natural Sciences at Philadelphia and others are of less value. Lepidoptera, or butterflies and moths, come next. The best collection, perhaps, of these is that of Mr. Titian Peale, of Washington. Messrs. Harris, Morris, and Haldeman, and the Academy of Natural Sciences of Philadelphia, have also good collections.

"Comparatively little is known of the other orders of insects. The Neuroptera and Orthoptera of New England have been collected by Dr. Harris; Diptera, Hemiptera, and Hymenoptera have been almost entirely neglected. Say is almost the only American naturalist who has occupied the whole field of entomology.

"Spiders have been ably investigated and abundantly collected by Hentz, who is still continuing his labors in this department. Much, however, remains to be done.

"The Podophthalmian Crustacea are preserved in various cabinets, although many species yet await discovery. Messrs. Say, Dana, and Gibbes are the principal workers in this field. The remaining orders, as Amphipoda, Entomostraca, Isopoda, &c., &c., have been almost wholly neglected.

"The North American worms have never been collected to any extent.

"Of all invertebrata the hard parts of mollusca or shells have received most attention in this country. There are numerous valuable cabinets, public and private, including both domestic and foreign species. The best public collection of American species is probably that of the Academy of Natural Sciences. Among private ones, may be named those of Dr. John C. Jay, John S. Philips, Isaac Lea, Major John Leconte, J. G. Anthony, Professor Haldeman, and others. Most of these gentlemen have had especial reference to Unionidae in their collections. Nothing, however, has been done towards preserving a series of the animals of shells.

"Very little is known of the Radiata of North America. A few species are preserved in public museums, but by far the most extensive collection is that belonging to Professor Agassiz.

"Phanerogamic plants have received much attention, and the private collections of Doctors Torrey, Gray, and others, with numerous public ones of greater or less extent, leave comparatively little to be desired in this respect. Great additions are continually being received from the country west of the Mississippi, in collections made by officers of the Army and private individuals. Among these should be mentioned Colonel Fremont, Colonel Emory, Captain Stansbury, Major Rich, Messrs. Lindheimer, Wright, Fendler, Gregg, Wislizenus, Drummond, and others.

"Cryptogamic botany has been considerably neglected, until within a few years past. The best collections are in the hands of private individuals, as Messrs. Sullivan, Tuckerman, Curtis, Bailey, Lesquereux, and others. A great deal remains still to be done in this branch of botany. The work of Doctor Harvey on North American Alga, in preparation for the Smithsonian Institution, will tend greatly to stimulate collectors to pay attention to this order.

"Collections in palaeontology are quite numerous, though principally local. The best general collection is that of the Academy of Natural Sciences. Their museum is incomparably richer, than any other in this country, in collection of fossil vertebrata. The only collection of any extent, of the fossil bones found in the caves of the United States, is in the cabinet of this Institution. Of the interesting Eocene species of the Upper Missouri, Doctor Evans, of Washington, has made an exceedingly valuable collection under direction of the Land Office. Next to this comes a similar one made by Mr. Culbertson for the Smithsonian Institution. An excellent collection of Tertiary fossils is in possession of Prof. F. S. Holmes, of Charleston, S. C. The Tertiary and Cretaceous fossil shells in the Philadelphia Academy are very numerous in species.

"Many of the mineralogical collections of this country are very complete, both as respects domestic and foreign species. Such are the cabinets of Yale College, of the Academy of Natural Sciences, of Dartmouth College, of Bowdoin College, of Messrs. Markoe, Vaux, Clay, Ashmead, Alger, Bouve, and others. The general interest in the subject of mineralogy is such as scarcely to require any additional stimulus, except so far as relates to geology.

1851. BAIRD, SPENCER F.—Continued.

“There are various ways in which collections may be made by the Smithsonian Institution the principal of which are as follows:

- “Deposits by government,
- “ by individuals,
- Exchange,
- Purchase,
- Employment of collectors,
- Donations.

“To the first of these, I have already briefly referred. Up to the present time nothing has been received, save the series of specimens illustrating Dr. Jackson's report on the mineral lands of Lake Superior.

“In some collections, specimens deposited by individuals form a conspicuous feature. These, when of considerable extent and completeness, or when illustrating some special researches or publications, are often very important, particularly as they are, in most cases, ultimately presented. Single specimens, unless of much value, are not generally desirable as deposits. Free choice must, of course, be left the Institution, to say what shall be received and what rejected.

“To the individual collector, exchange with other individuals or with societies forms the principal mode of forming his cabinet, beyond what may be personally procurable. This of course implies that the specimens be gathered in larger quantities than would be necessary for a single collection. By a judicious system of exchange, based upon a large stock of duplicates, it seems possible to procure almost any species, domestic or foreign, at little expense beyond that of transportation. To this end it is desirable to secure large numbers of such objects as may be specified hereafter.

“Purchase is an excellent method of increasing a collection in a short time. It not unfrequently happens, however, that acquisitions thus made are of comparatively little value, as is found to be the case in regard to most of the miscellaneous museums, public and private, which are offered for sale. It is of course different with respect to collections made for a specific purpose by practised naturalists, particularly when they contain undescribed species or serve as the types of standard works. Considerable operations of this kind require large sums of money, as will be seen by reference to the annual statement of expenditures made by the British Government in behalf of the National Museum;* and, with numerous

1851. BAIRD, SPENCER F.—Continued.

drafts on its income, it is not deemed expedient for the Smithsonian Institution ever to do much more for its cabinet by direct purchase. It is confidently believed, too, that the museum will increase almost as rapidly as accommodations can be furnished, by donations of individuals who may have it in their power to make collections, as well as by the special efforts of its officers. This hope is strengthened by the actual experience of other institutions.

"The employment or assistance of collectors in visiting particular portions of country is productive of very important results at very little expense. In illustration of this, I would refer to the acquisitions made by the Institution through Messrs. Lendler, Lindheimer, Wright, Culbertson, and others. In this I am also borne out by my own experience. For several years past I have been in the habit of visiting different portions of the United States, mainly in search of vertebrate animals. Accompanied on such occasions by zealous volunteers, I have succeeded in accumulating very extensive collections, including very many rare and even undescribed species, besides obtaining much valuable information in regard to the general history of animals and plants.

"It is mainly to the employment of collectors that the great European museums owe their richness. In most of these a regular corps is employed continually in traveling through various portions of the world and gathering large numbers of duplicates, which are ultimately distributed in exchange to other institutions.

"In cases where memoirs containing descriptions of animals or plants are presented to the Institution for publication, it should, as far as possible, be made a condition of their acceptance that a series of the objects described be deposited for the purpose of being placed on record and as authenticating the species. These should be labeled by the author, and the names thus attached be ever afterwards retained, even though they may have been incorrect or may have been modified by subsequent discoveries. Individuals, too, should be requested to present similar specimens, to be kept in the same manner, illustrating descriptions published elsewhere than by the Smithsonian Institution.

"At some future period, when the number of duplicates is sufficiently large, it may be possible to furnish lyceums, schools, and other institutions with series of specimens, properly labeled and arranged, of various branches of natural history. Individuals, too, engaged in special investigations may hereafter find it practicable to procure objects in such quantities or of such character as to render material if not indispensable aid. This feature will, however, require the cordial co-operation of naturalists and collectors to render it practicable.

"I may remark that, for the assistance of those who may be unskilled in the collecting, preservation, and packing of specimens, a pamphlet containing the directions is now in preparation and will shortly be issued by the Institution. This will be of considerable size, and, in addition to the merely taxidermy portions, will contain notices of special desiderata in particular portions of the world, a brief indication of the principal divisions of natural history, and notices of the most accessible sources to which the beginner must apply for information respecting the different branches of the subject, the whole illustrated by figures.

"Respectfully submitted.

"SPENCER F. BAIRD.

1851. BAIRD, SPENCER F. *Iconographic | Encyclopædia | of | Science, Literature, and Art. | Systematically arranged by | J. G. Heck, | translated from the German with additions | and edited by | Spencer F. Baird, A. M., M. D., | Professor of Natural Sciences in Dickinson College, Carlisle, Pa. | Illustrated by five-hundred steel plates, | containing upwards of twelve thousand engravings. | In four vols. | New York: 1852. | Rudolph Garrigue, Publisher | 2 Barclay St., Astor House. In four vols. Svo of text and two vols. oblong 4to of plates.*

Vol. II contains the part relating to "Zoology," pp. 502, plates 74-118.

P R E F A C E .

"The text of the work which is now presented to the American public is based upon the well known "Bilder Atlas zum Conversations Lexicon," just published in Leipsic, by F. A. Brockhaus, and edited by Mr. John G. Heck. The engravings are impressions from the original steel plates.

"The object steadily kept in view in preparing the *Iconographic Encyclopædia* has been to furnish a book to which the general reader may apply for an explanation of the principal physical facts which come under his notice. To do this satisfactorily, pictorial representation is necessary, which it is hoped the five hundred quarto plates, with their 12,000 figures, will abundantly furnish.

"Much of the utility of an *Encyclopædia* depends on its arrangement. The method which the editor's experience of works of this kind has shown to be most convenient, is that of a systematic grouping of distinct treatises, according to their natural affinities. The work thus becomes, as it were, a series of text-books, capable of being used as such, and to which recourse may be had for all the general information required on a given subject.

"To enable the reader, however, to refer readily to any individual fact a copious alphabetical index, or series of indexes, is indispensable. By including numerous cross references, it will be possible to furnish all the facilities of a strictly alphabetical arrangement without any of its disadvantages.

"This, then, is the plan which has been adopted in the arrangement of the *Iconographic Encyclopædia*. Each article falling within its scope has been treated of independently, and, as far as it goes, is complete in itself. It will not be expected that in the extensive range of subjects involved, even with the exclusion of biography, speculative philosophy, and all abstract sciences in general, any one can be treated in its fullest extent. All that has been aimed at, and indeed all that could have been looked for, was to present a general view of each subject, essentially popular in character, and fitted, more particularly, for those who wish to have the principal facts of numerous works condensed in a single one. Nevertheless, it will be found, on examination, that many of the subdivisions of this *Encyclopædia* are much fuller in their details than most of the text-books or popular treatises of the day.

Tables of contents and indexes have been prepared for each volume, and no pains have been spared to make these more than usually accurate. The indexes do not refer to words merely, but to facts and ideas, so that the text can be readily consulted upon any given topic. The lists of the figures on the plates will be found under the contents of the text which they are intended to elucidate, with references to the pages in the letter-press where explanations may be looked for. They furnish an immediate explanation of any figure that may arrest the eye. A glossary of German terms and phrases used in a few of the plates is also added to these lists. It would undoubtedly have been more convenient if the few plates which have caused the necessity of such translations had been re-engraved in English; but the expense of doing so would have more than doubled the price of the work, whose unparalleled cheapness could only be secured by a liberal contract for impressions from the excellent German plates.

"To Mr. Heck belongs exclusively the credit of the conception and execution of the original work; and whether we regard its magnitude, or the regularity and efficiency of its performance, it is one that has rarely, if ever, been excelled.

"In undertaking an English version of the *Iconographic Encyclopædia* it was soon found that a literal translation of the original would not satisfy the wants of the American public. Written in and for Germany, the different subjects were treated of much more fully in relation to that country than to the rest of the world. In some articles, too, owing to the lapse of time or other causes, certain omissions of data occurred, which did not allow of their being considered as representing the present state of science, or as suiting the wants of the United States. This, therefore, has rendered it necessary to make copious additions, alterations, and abridgements in the respective translations; while, in some instances, it has been thought proper to rewrite entire articles. Several of these original papers have been

1851. BAIRD SPENCER F.—Continued.

prepared by the editor, and the remainder kindly furnished by some of his friends. Some of these again have relieved him of the burden of translating, and have added much to the merit of their work by judicious alterations and additions; while others have revised his MSS. and enriched them with important suggestions. The authority and value of the assistance thus obtained will be sufficiently evident from the names of those who have so kindly rendered it. To all he here takes the opportunity of returning his warmest acknowledgements.

"The second volume, or the one containing botany, zoology, and anthropology, has been entirely rewritten. The articles in it not prepared by the editor are *Invertebrate Zoology*, by Prof. S. S. Haldeman; *Ornithology*, by John Cassin, Esq.; and *Mammalia*, by Charles Girard, Esq.

"The friends to whom he is indebted for careful revision of his MSS. are Prof. Wolcott Gibbs (*Chemistry*); Prof. J. D. Dana (*Mineralogy*); Prof. L. Agassiz (*Geognosy and Geology*); Dr. Asa Gray (*Botany*); Dr. T. G. Wormley (*Anatomy*); and Herman Lindewig, Esq. (*Geography*).

"Those who have assisted him by translating and editing entire articles are Wm. M. Baird, Esq. (*Ethnology of the Present Day*); Major C. H. Larned, U. S. Army (*Military and Naval Sciences*); F. A. Petersen, Esq. (*Architecture*); Prof. Chas. E. Blumenthal (*Mythology and Religious Rites*); Prof. Wm. Turner (*Fine Arts*); and Samuel Cooper, Esq. (*Technology*).

The editor is likewise under very great obligations to the publisher, not only for affording him every facility in the prosecution of his task, but for unwearied and invaluable assistance in the discharge of his editorial duties. He here also takes occasion to acknowledge his indebtedness to Mr. Wm. H. Smith for revision of the proof-sheets and preparation of the alphabetical indexes; and also to Mr. Robert Craighead for the care which he has displayed in the typographical execution.

1851. BAIRD, SPENCER F. Outlines | of | General Zoology | Mammals by Charles Girard | Birds " John Cassin | Reptiles " Spencer F. Baird | Fishes " Spencer F. Baird | Invertebrates " S. S. Haldeman | — | Reprinted from the Iconographic Encyclopædia | of Science, Literature, and Art | — | —New York: | Rudolph Garrigue, Publisher, | 2 Barclay St., Astor House | 1851. [8vo. pp. xxii, 502, xvi.]

"This extract constitutes the Zoological portion of the work entitled 'Iconographic Encyclopædia, xxx.' Much of the Encyclopædia, instead of being translated, has been entirely rewritten, with special reference to adaptation to this country. The part on Zoology, among others, has been compiled entirely anew by its authors, and will be found to contain much original matter never before published. The references to the plates are retained in this extract, though the plates themselves are not supplied." (Spencer F. Baird in preliminary "Notice", p. vii.)

The section relating to Fishes, pp. 197-247, contains many allusions to the fishes of North America, besides presenting a comprehensive view of the state of ichthyological science at the time of its preparation, and many important critical biological and economical notes.

The chapter on Reptilia, pp. 244-289, contains a full discussion of the classification of the group and many important biographical and critical observations, particularly so with reference to the Amphibians.

A new genus of salamanders from the Sandwich Islands is described.

Aneides, new genus. p. 256

1852. BAIRD, SPENCER F. List of birds inhabiting America, west of the Mississippi, not described in Audubon's Ornithology. < *Stansbury's Exploration and Survey of the Valley of the Great Salt Lake, etc.* Philadelphia, 1852. [App. C.] pp. 327-335.

"The list includes a few specimens recently described from the regions east of the Mississippi."

153 species are enumerated by name, with citation of description and note on habitat.

"This list of 153 spp. contains a large proportion of synonyms or species not since satisfactorily determined to inhabit North America north of Mexico. The list makes no apparent claim to critical precision, ostensibly showing which species have been ascribed to the region in question, but not necessarily vouching for their occurrence there. 'California' long remained a vague term with ornithologists." COUES, 1878.

Girard. | — | [Seal of the Smithsonian Institution.] | Washington: | Smithsonian Institution. | January, 1853. | January 1, 1853. [Accepted for publication November, 1852.] 8vo, pp. xvi, 172.

CONTENTS.

	Page.
Preface	v
Introduction	vii
Explanation of Terms used.	
Synopsis of families and genera and systematic order of species of North American Serpents	ix
Catalogue of Serpents.....	1-144
Appendix A.—Species examined, of which no Specimens are in possession of the Smithsonian Institution.....	145
Appendix B.—Species described by authors, but of which no Specimens could be obtained	150
Appendix C.—Species collected on the United States and Mexican Boundary Survey by John H. Clark and Arthur Schott, under Maj. Wm. H. Emory, and received too late for insertion in their proper places	158
Appendix D.—Index of Sources from which the Specimens have been received.....	162
Appendix E.—Index of States and Territories from which Specimens have been received	164
Alphabetical Index.....	165
1. Vernacular Names	165
2. Systematic Names	167

Although published under the names of the two authors as a joint production, this work is a series of monographs for which the individual authors only claimed to be responsible. The record of authorship is lost. *In the following list of species discussed, the parts written by Professor Baird, so far as he can recall the matter to memory, are printed in italic type, those by Girard in heavy-face type.*

"In the present catalogue it is proposed to present a systematic account of the collection of North American Serpents in the museum of the Smithsonian Institution. In the Appendix will be found such species not in possession of the Institution, as could be borrowed for description, as well as notes on more or less authentic species of which no specimens could be found.

"A complete synonymy of all the species has not been attempted, as tending to swell the bulk of a catalogue too much. All those, however, necessary to a proper understanding of the history or character of the species, have been introduced, and all the synonyms quoted have been actually verified by original reference.

"Owing to the want of osteological preparations, it has been a difficult task to arrange the genera in a natural succession. In many cases forms are now combined which will hereafter necessarily be widely separated. The almost entire deficiency of modern general works upon the *Colubridæ*, has also been a serious obstacle to any correct idea of a natural system. The forthcoming work of M. M. Duméril will undoubtedly clear up much of the obscurity which now exists. But when systematic writers all carefully avoid the subject of the Ophidians, each waiting for the others to make the first step, the attempt to combine genera by well-marked, though perhaps artificial points of relation, will it is hoped be looked upon with indulgence, even after more comprehensive and extended investigations shall render it necessary to break up the combinations here adopted.

"The collections upon which the original descriptions of the present catalogue have been based are as follows:—

- Spencer F. Baird. Species from Massachusetts, New York, Ohio, and Pennsylvania.
- Charles Girard. Maine, Massachusetts, and South Carolina.
- Rev. Charles Fox. Species from Eastern Michigan.
- Dr. P. R. Hoy. Species from Eastern Wisconsin.
- Prof. L. Agassiz. Lake Superior, Lake Huron, and Florida.
- Dr. J. P. Kirtland. Northern Ohio.
- G. W. Fahnestock. Western Pennsylvania.
- Miss Valeria Blaney. Eastern Shore of Maryland.
- Dr. C. B. R. Kennerly. Northern Virginia.
- John H. Clark. Maryland, Texas, New Mexico, and Sonora.

1853. BAIRD, SPENCER F., and CHARLES GIRARD—Continued.

- John Varden. District of Columbia and Louisiana.
 Dr. J. B. Barratt. Western South Carolina.
 Miss Charlotte Paine and Mrs. M. E. Daniel. Western S. Carolina.
 Dr. S. B. Barker. Charleston, S. C.
 Prof. F. S. Holmes and Dr. W. J. Burnett. South Carolina.
 R. R. Cuyler and Dr. W. L. Jones. Georgia.
 D. C. Lloyd. Eastern Mississippi.
 Dr. B. F. Shumard and Col. B. L. C. Wailes. Mississippi.
 James Fairie. Mexico and Western Louisiana.
 Capts. R. B. Marcy and G. B. McClellan, U. S. A. Red River, Ark.
 Ferdinand Lindheimer. Central Texas.
 Col. J. D. Graham, U. S. A. The specimens collected while on the U. S. and Mex. Boundary Survey, by Mr. J. H. Clark, viz., in Texas, New Mexico, and Sonora.
 Maj. W. H. Emory. Specimens collected on the U. S. and Mexican Boundary Survey, by Arthur Schott, at Eagle Pass, Tex., and by J. H. Clark, in Texas and New Mexico.
 Gen. S. Churchill, U. S. A. Valley of the Rio Grande.
 Dr. L. Edwards, U. S. A. Northern Mexico.
 Dr. Wm. Gambel. New Mexico and California.
 Dr. John L. Le Conte. Littoral California.
 Dr. C. C. Boyle and J. S. Bowman. Central California.
 Dr. A. J. Skilton. Species collected in California by Henry Moores, Esq.
 U. S. Exploring Expedition. Littoral California and Oregon.
 Academy of Natural Sciences of Philad. Various unique specimens described by Dr. Holbrook.
 Boston Society of Natural History. California.
 "SMITHSONIAN INSTITUTION, January 5, 1853."

SYSTEMATIC INDEX OF WELL-ASCERTAINED SPECIES OF NORTH AMERICAN SERPENTS.

CROTALUS, Linn.

	Page.
1. <i>Crotalus durissus</i> , Linn.	Penna., Louisiana, Mississippi 1
2. " <i>adamanteus</i> , Beauv.	South Carolina. 3
3. " <i>atrox</i> , B. & G., n. s.	Texas 5

1854. BAIRD, SPENCER F., and CHARLES GIRARD. Descriptions of new species of Fishes collected in Texas, New Mexico and Sonora, by Mr. John H. Clark, on the U. S. and Mexican Boundary Survey, and in Texas by Capt. Stewart Van Vleit, U. S. A. Second Part. < *Proc. Acad. Nat. Sci. Phila.*, vii, 1854-55, pp. 24-29. (Read March 28, 1854.)

55.

1854. BAIRD, SPENCER F. Descriptions of New Genera and Species of North American Frogs. < *Proc. Acad. Nat. Sci. Phila.*, vii, pp. 59-62. Presented for publication April 4, ordered printed April 25, 1854.
Seventeen new species and one new genus are characterized.
- Hyladæ* 59
1. *Aeris crepitans*, Baird, n. s.
Northern States generally.
2. *Aeris acheta*, Baird, n. s.
Key West, Florida.
- Chorophilus*, Baird, n. s. 60
Type, *Chorophilus nigratus* (Baird) Holbrook.

1854. BAIRD, SPENCER F.—Continued.

Helocætes, Baird, n. s.

- 3. *Helocætes feriærum*, Baird, n. s.
Carlisle, Pa.
- 4. *Helocætes triseriatus* (Max. von Wied.), Baird, n. s.
Michigan, Illinois, Wisconsin, and the Upper Missouri.
- 5. *Helocætes Clarkii*, Baird, n. s.
Galveston and Indianola, Tex.
- 6. *Hyla Richardii*, Baird, n. s.
Cambridge, Mass.
- 7. *Hyla Andersonii*, Baird, n. s.
Anderson, South Carolina.
- 8. *Hyla eximia*, Baird, n. s. p. 61
City of Mexico.
- 9. *Hyla Vanclitti*, Baird, n. s.
Brownsville, Tex.
- 10. *Hyla affinis*, Baird, n. s.
Northern Sonora.

Ranidae.

- 11. *Rana montezuma*, Baird, n. s.
City of Mexico.
- 12. *Rana septentrionalis*, Baird, n. s.
Northern Minnesota.
- 13. *Rana sinuata*, Baird, n. s.
Sackett's Harbor, New York.
- 14. *Rana pretiosa*, B. and G. 62
Washington Territory.
- 15. *Rana cantabrigensis*, Baird, n. s.
Cambridge, Mass.
- 16. *Rana Doylii*, Baird, n. s. 62
California, interior.
- 17. *Scaphiopus Couchii*, Baird, n. s.
Coahuila and Tamaulipas.

56.

1854. BAIRD, SPENCER F. Descriptions of New Birds collected between Albuquerque, N. M., and San Francisco, California, during the winter of 1853-54, by Dr. C. B. R. Kennerly and H. B. Möllhausen, Naturalists attached to the Survey of the Pacific R. R. Route, under Lt. A. W. Whipple. < *Proc. Acad. Nat. Sci. Phila.*, vii, pp. 118-20. Presented for publication June 20, ordered printed June 27, 1854.

Eight new species are characterized.

- Cypselus melanoleucus*, Baird, n. s. p. 118
Camp 123, West of San Francisco Mountains.
- Culicivora Plumbea*, Baird, n. s. 118
Bill-Williams' Fork.
- Psaltria Plumbea*, Baird, n. s.
Little Colorado, N. M.
- Cyanocitta maculolopha*, Baird, n. s.
100 miles west of Albuquerque, N. M.
- Carpodacus Cassinii*, Baird, n. s. 119
Pueblo Creek, N. M.
- Zonotrichia fallax*, Baird, n. s.
Pueblo Creek, N. M.
- Pipilo mesoleucus*, Baird, n. s.
Copper Mines, n. s.
- Centurus uropygialis*, Baird, n. s. 121
Bill-Williams' Fork of Colorado, N. M.

Six new species are described.

17. <i>Gila conocephala</i> , B. and G., n. s.	p. 135
Rio San Joaquin, Cal.	
18. <i>Pogonichthys maequibolus</i> , B. and G., n. s.	136
San Joaquin River, Cal.	
19. <i>Pogonichthys symmetricus</i> , B. and G., n. s.	
Fort Miller, Cal.	
20. <i>Lavinia exilicauda</i> , B. and G., n. s.	137
Sacramento River, Cal.	
21. <i>Lavinia crassicauda</i> , B. and G., n. s.	
San Francisco, Rio San Joaquin, &c.	
22. <i>Leucosomus occidentalis</i> , B. and G., n. s.	
Posa and Grove Creeks, Cal.

1854. BAIRD, SPENCER F. Characteristics of some New Species of Mammalia, collected by the U. S. and Mexican Boundary Survey, Major W. H. Emory, U. S. A., Commissioner. Part I. < Proc. Acad. Nat. Sci. Phila., vii, pp. 331-333. Read and ordered printed April 24, 1854.

The following eleven species are described:

<i>Sciurus limitis</i> , Baird, n. s.	p. 384
Devil's River, Texas.	
<i>Sciurus castanotus</i> , Baird, n. s.	
Mimbres.	
<i>Tamias dorsalis</i> , Baird, n. s.	
On the Mimbres.	
<i>Spermophilus spilosoma</i> , Bennet.	
El Paso.	
<i>Spermophilus Couchii</i> , Baird, n. s.	
Santa Caterina, Mex.	
<i>Perognatus flavus</i> , Baird, n. s.	
El Paso.	
<i>Geomys Clarkii</i> , Baird, n. s.	
Presidio del Norte, on the Rio Grande.	
<i>Thomomys umbrinus</i> (Rich.), Baird.	
El Paso.	
<i>Sigmodon Berlanderi</i> , Baird, n. s.	363
Between San Antonio and El Paso.	
<i>Neotoma mexicana</i> , Baird, n. s.	
Chihuahua.	
<i>Neotoma micropus</i> , Baird, n. s.	
Charco Esecundido and Santa Rosalio, Mex.	

60.

1854. BAIRD, SPENCER F. Characteristics of some New Species of North American Mammalia, collected chiefly in connection with the U. S. Surveys of a Railroad Route to the Pacific. Part I. < Proc. Acad. Nat. Sci. Phila., vii, pp. 333-6. Read and ordered printed April 24, 1854.

Fifteen species are described, twelve of which are new.

<i>Lepus washingtonii</i> , Baird, n. s.	333
Puget Sound and Shoalwater Bay.	

1854. BAIRD, SPENCER F.—Continued.

<i>Lepus Trowbridgii</i> , Baird, n. s. Coast of California.	
<i>Sciurus Suckleyi</i> , Baird, n. s. Puget Sound.	
<i>Tamias Cooperi</i> , Baird, n. s.	p. 334
Cascade Mountains, Wash.	
<i>Spermophilus Gunnisoni</i> , Baird, n. s. Cochitope Pass, Rocky Mountains.	
<i>Spermophilus grammurus</i> , Say. Western Texas.	
<i>Spermophilus Beecheyi</i> , Richardson. California.	
<i>Dipodomys montanus</i> , Baird, n. s. Fort Massachusetts.	
<i>Dipodomys agilis</i> , Gambel	334-35
San Diego, or Monterey.	
<i>Geomys breviceps</i> , Baird, n. s.	335
Morehouse Parish, La.	
<i>Thomomys bottæ</i> (Egd. and Gerv.), Baird. R. Monterey.	
<i>Thomomys rufescens</i> , Max. Fort Pierre.	
<i>Thomomys laticeps</i> , Baird, n. s. Humboldt Bay.	
<i>Neotoma occidentalis</i> , Cooper (mss.), n. s. Shoalwater Bay.	
<i>Reithrodon montanus</i> , Baird, n. s. Rocky Mountains.	
<i>Hesperomys Boylii</i> , Baird, n. s. American River, Cal.	
<i>Hesperomys austerus</i> , Baird, n. s.	336
Fort Steilacoom, Puget Sound.

1855. BAIRD, SPENCER F. Report on the fishes observed on the coasts of New Jersey and Long Island during the summer of 1854, by Spencer F. Baird, Assistant Secretary of the Smithsonian Institution. < *Ninth Annual Report of the Smithsonian Institution* [for 1854], 1855, pp. 317-325 + *337.

Reprinted as a pamphlet, with an index, and the following title:

Report | to | the Secretary of the Smithsonian Institution, | on the | Fishes of the New Jersey Coast, | as observed in the Summer of 1854, | by Spencer F. Baird, | Assistant Secretary S. I. | From the Ninth Annual Report of the Smithsonian Institution | for 1854. | — | Washington: | Beverly Tucker, Senate Printer, | June, 1855. | [8vo, 40 pp.]

68 species, of which 58 are marine, or brackish-water, and 10 fresh-water, were observed, and valuable notes on habits and color in a fresh state were recorded, during a period of six weeks spent on the coast of New Jersey, principally at Beesley's Point and Long Island, New York, and also on the Hudson River.

Notice > *Ninth Annual Report Smithsonian Institution* (1854), 1855, pp. 16-38.

"A period of six weeks spent on the coast of New Jersey, principally at Beesley's Point,

1855. BAIRD, SPENCER F.—Continued.

and Long Island, New York, furnished an opportunity of studying the habits and distribution of the principal species of fishes that are found on that portion of our shores during the summer.

"Although many others, doubtless, are to be found in the same region, yet none have been introduced except those which were actually caught and carefully examined. A considerable number of the species whose habits and peculiarities are given at some length, have hitherto had nothing placed on record concerning them; and it is hoped that the present article may be found to contain some interesting information, given here for the first time, in addition to its character as a contribution to our knowledge of the geographical distribution of species.

"The difference of the names applied to the same species of fish at various points of our coast, even when these happen to be connected very closely, both commercially and geographically, must strike every one with astonishment.

"It is scarcely too much to say that no one species of fish bears the same vernacular appellation from Maine to Maryland, still less to Florida or the coast of Texas. This is probably owing to the fact that our shores have been originally settled by various nations from widely remote parts of Europe, each introducing its peculiar nomenclature, or deriving names from the equally isolated aboriginal tribes with their various languages. Thus the names of blue-fish, white fish, perch, blackfish, bass, king-fish, porgee, hake, tailor, whiting, horse-mackerel, shad, smelt, dog-fish, &c., may apply equally to two or more very different species. Among the synonyms of the species will be found the vernacular equivalents in the regions visited, together with some from other localities. It will be sufficiently evident, therefore, that before any species referred to under a trivial name can be identified, the origin of the fish or that of the writer must be ascertained.

"Although most of the facts recorded in the following paper have reference to Great Egg Harbor, New Jersey, during a period extending from the middle of July to the end of August, it has been thought not amiss to incorporate the results of a visit to Brooklyn, Riverhead, and Greenport, Long Island, as well as to some points on the Hudson River, in September. Some valuable information was thus obtained, tending to illustrate more fully the natural history and distribution of the species found on the New Jersey coast.

"And here I take occasion to render an acknowledgment for much kind assistance and important information derived from various gentlemen at the different points of operation. Among these I will particularly mention Messrs. Samuel and Charles Ashmead, at Beesley's Point, who devoted all their time to the furtherance of my objects in this exploration. I may also mention Messrs. John Stites, Willis Godfrey, Washington Blackman, John Johnson, in fact, most of the residents of Beesley's Point. Much benefit was derived at Greenport, Long Island, from the companionship of Mr. E. D. Willard, of the National Hotel, Washington; while to Mr. J. Carson Brevort, of Bedford, Long Island, well known as the first ichthyologist in New York, and surpassed by no one in his knowledge of our marine species, I am under the greatest obligations. Through the kindness of Mr. John G. Bell, of New York, and Smith Herring, of Piermont, I was enabled to make a complete collection of the fishes of the Upper Hackensack and Sparkill.

"It must be understood that the present article does not aim at giving a complete account of the species referred to. Such descriptions of color as have been given were in every case taken from the fresh and living fish, the object being to place on record features not usually preserved in alcoholic specimens. Of the species whose colors were known not to fade or alter in spirits, no notes of their peculiarities in this respect were taken, while the tints of others were so evanescent as to have escaped or altered before a description could be noted down.

"Very little respecting the habits or history of the species has been added from other authors, nor does the nomenclature profess to be at all final as to critical accuracy. To have accomplished this latter object, would have required more time than is at present at my disposal, involving, as it would, the entire revision of American ichthyology generally. The names given are principally those of De Kay in his history of the fishes of New York, and can thus be readily identified.

"As will be seen in the course of the article, several of the species collected appear new to science; to these I have been obliged to give names for the sake of proper reference, without at the same time furnishing a complete scientific description. * * *

"The coast of New Jersey is well known to consist, for most of its extent, of a low beach, with sand-hills, separated from the mainland by a wide strip of low meadows filled with small ponds, and intersected by creeks and thoroughfares, which traverse it in every direction. There is no rock or stone of any description, and, consequently, there is a deficiency in the plants and animals which frequent rocky localities. At Beesley's Point there is scarcely a pebble of the smallest size to be seen.

1855. BAIRD, SPENCER F.—Continued.

"The meadows are densely coated with grass, and are covered with water only during unusually high tides.

"Beesley's Point is situated at the mouth of Egg Harbor river, where it empties into Great Egg Harbor bay. The water is, of course, salt at this point, though somewhat diluted by the volume of fresh water brought down by the river.

"The distance from the mouth of the river, or head of the bay, to the inlet on the beach, is about two or three miles; the extreme width about the same, although extending into thoroughfares, through which a boat may be taken to Absecon on the one side, and to Cape May on the other, without going outside of the beach. The mouth of the river is occupied by very extensive beds of oysters, which are celebrated for their excellent flavor. The bottom of the bay is in some part hard and shelly, in others sandy, or again, consists of a soft mud; the latter condition prevails near the shore, or wherever the current is of little strength.

"There are numerous mud-flats or sand-bars in the bay, some of them bare at low tide, or nearly so, and occupied by various species of water-fowl. These flats, continuing to increase in height, and at length acquire a growth of grass, which fixes still more the accumulating mud and sand, so that in time what was formerly a bar becomes an island elevated some feet above the water.

"This transition is, in fact, so rapid that many of the inhabitants now living have known islands several acres in extent to form within their own recollection.

"The greater part of the bottom of the bay and of the thoroughfares, generally, is a soft mud, rich in organic matter, and covered with a profuse growth of *Zostera marina* and algae of various species. Mr. Samuel Ashmead, who has been engaged for some years in studying the sea-weeds of our coast, has found a much greater variety of species at Beesley's Point than Professor Harvey allots to the New Jersey coast. The water being generally shallow except in the channels, the submarine vegetation can be seen to great advantage, while sailing over the surface. The water becomes very warm during the summer, and supplies all the conditions necessary for the development of young fishes of many species. The young of all the large fish of the bay may thus be found in greater or less numbers along or near the shore.

"The ponds in the meadows, like the waters of the bay itself, are generally muddy at the bottom, sometimes bare of vegetation, and sometimes covered with a thick growth. The fishes found in these ponds consist almost entirely of cyprinodonts of various species, with occasional specimens of *Atherina*, small mullets, or sticklebacks. The creeks likewise contain cyprinodonts, generally of different species from those of the ponds, with young fish of various kinds. Crabs and eels are found everywhere.

"The line of beach is two or three miles from the mainland, and consists of a clear white sand raised into hills ten to thirty feet high, a few hundred feet from the water's edge. It is in the inlets at the ends of these beaches that the greatest variety of fish is to be found, particularly in the small indentations, protected from the roughness of the waves, and the bottom of which is covered with *Ceramium* or sea-cabbage.

"Corson's inlet, frequently mentioned in the following pages, is situated at the southern end of Peck's beach, which begins directly opposite Beesley's point at the entrance to the harbor, and extends to this inlet over a distance of about five miles.

"The only fresh water near Beesley's point is Cedar Swamp creek. This stream, rising in a cedar swamp, and flowing with a very sluggish current, (the water of a chocolate color), is cut off from the tide by a dam at Littleworth, three miles from the point. The bottom is very muddy. But little variety of fresh-water fish is to be found in this stream. Several species of *Esox*, two *Leuciscus*, one eel, three *Pomotis*, one each of *Aphredoderus*, *Labrax*, *Etheostoma*, and *Melanura*, and several cyprinodonts. The species are nearly all different from those found in the interior of Pennsylvania on the same latitude.

"Another Cedar Swamp Creek occurs on the opposite side of Egg Harbor River, in Atlantic County. In many respects it differs from that first mentioned in being of more rapid current, and the bottom, at some distance from the tide-water dam, consisting of sand or small pebbles. The water, too, in small quantity is clear, though where of considerable depth it appears almost black. Fewer species of fish were found here than in the other, the only additional one being the *Catostomus tuberculatus*.

"Ludley's Run is a small run crossing the road to Cape May, about eight miles from Beesley's point; fresh at low tide, but flooded at high water. The only fish found in it consisted of two cyprinodonts and the *Gasterosteus quadracus*."

The following species are discussed. The figures in parenthesis refer to the pages of the separate edition:

1857. BAIRD, SPENCER F. Catalogue | of | North American Mammals, | chiefly in the Museum of the | Smithsonian Institution. | By | Spencer F. Baird, | Assistant Secretary of the Smithsonian Institution. | — | Washington: | Smithsonian Institution, | July, 1857. | 4to. pp. 21.

This catalogue is essentially the systematic list which forms the first twenty-one pages of the General Report on North American Mammals published the same year.

A large edition of this check-list catalogue was printed, and it remains to the present time the only check-list and the principal standard of authority for labeling collections.

Preface	xxv-xxix
Systematic list of the higher groups.....	xxx, xxxi
List of species	xxxii, xlvi
Introductory remarks.....	I
Dated Washington July 20, 1857.	

"It is a systematic account of the mammals (exclusive of *Cetacea*, *Chiroptera*, *Sirenia*, and *Pinnipedia*) of North America, about 220 in number, and is by far the most important and most authoritative treatise which has ever appeared on the subject." (GILL and COUES.)

Review.—*Annals and Magazine of Natural History*, May, ser. 3, vol. i, 1858, pp. 369-373, reprinted in *American Journal Science and Arts*, xxvi, 1858, pp. 141-146.

The following description of the work is taken from the preface:

"The present report is intended to embrace a systematic account of all the species of North American mammals collected or observed by the different parties organized under the direction of the War Department for ascertaining the best route for a railroad from the Mississippi River to the Pacific Ocean. It was originally proposed to furnish a separate report in detail, on the collections of each party, but a consideration of the fact, that, with scarcely an exception, almost every species was found on two or more lines of survey, and thus not peculiar to any one expedition, led to an abandonment of the first intention. It was considered to be worse than useless to repeat the same descriptions and details over and over again, while, at the same time, under the circumstances, it would have been difficult to say in what report any particular article could be best placed. As, too, the interest of North American zoology depends not merely on the character of the species, but also on their generic and family affinities, as well as on their relationships to latitude and longitude, climate, soil, elevation, &c., it would have been impossible to do justice to the subject by cutting up the

* Other copies have the imprint of Beverly Tucker.

† In Gill and Coues's "Material for a Bibliography of North American Mammals," pp. 992, this edition is cited as containing plates i-lx, which is erroneous, the first 17 plates being given in other volumes of this series of reports.

1857. BAIRD, SPENCER F.—Continued.

report into several isolated portions without any special connection as parts of a systematic whole.

"At the same time, however, as it was desirable to present a picture of the zoological character of the several routes, as well as to show what each party accomplished, and, as many very important notes of habits and local peculiarities were made by the naturalists of the different lines, it would have been clearly an act of injustice to these gentlemen as well as to their chief officers to merge all their results into one common report. For these and other reasons it was finally determined that there should be prepared one general report on the entire collections of the railroad surveys, to consist solely of the technical description of the families, genera, and species, and of such remarks as might be necessary to show their place in the systems, each species to be preceded by its synonymy, and followed by an enumeration of all the specimens collected, so arranged in tables as to show their geographical distribution.

"In addition to this general report, however, special reports by the naturalists of each line were also to be prepared and published, to embrace the systematic and vernacular names of their species, with a list of the specimens collected. To these special reports, were to be confined all the biographies of the animals seen, all notices of their habits, peculiarities, and distribution, as observed and recorded during the route. In order that there might be no misconception of the species referred to, it was concluded to give a short diagnosis of each, with a reference to the page of the general report where the purely zoological details might be found more at length.

"The present report, therefore, is the first of the series of general reports referred to, to be followed, as soon as practicable, by the remainder of the Vertebrata. The special reports on the zoölogy of each line of survey will be found in connection with the other reports belonging to their respective parties, in their full notices of the life of our western animals, possess a general and popular interest far greater than can attach to the present account of mere zoölogical and technical details.

"The large size of this report on the mammals collected by the railroad parties is owing to several causes. In the first place, the amount of new or little known material obtained was extraordinarily great. The summary of the species, at the beginning of the systematic list hereafter presented, will show that very many entirely undescribed animals were procured, and that, of a large number of others, previously little known, the specimens were sufficient to furnish many new and interesting details of characters, both external and internal.

"As, too, the object in calling for complete reports from the several parties was not merely to show the actual results of the several expeditions, but likewise to ascertain the general character of the Western Territories, I have not hesitated to include in this work all such materials derived from officers stationed at military posts, and other persons elsewhere in the West, as fell under my notice.

"In view of the large amount of new or little known species at hand, in the preparation of the present report, sometimes embracing entire genera and even families, it soon became evident that none of the published descriptions of the old and standard species were sufficiently minute and detailed to furnish the necessary means of comparison. With the discovery of forms very closely allied to or intermediate between those already known, the descriptions of the latter on record did not show sufficiently in what the differences consisted. It became necessary, therefore, to redescribe, as far as they could be procured, all such species, which, in fact, proved finally to be nearly all previously known. The present monograph of American mammals has, in the end, grown out of the necessities referred to.

"It will be sufficiently evident that, without the extraordinarily rich and full collection of North American mammals belonging to the Smithsonian Institution, the monographs and comparisons of species, in the present report, could not have been prepared. Independently of the specimens brought in by the Pacific Railroad surveying parties, the series in its Museum, from other sources, was found to embrace nearly all the previously known species, and many entirely new ones.

"I have also made free use of the collections and library of the Philadelphia Academy of Natural Sciences, for which every facility has been furnished in its hall. The examination of the specimens collected by Townsend, and described by Dr. Bachman, has contributed to settle some quite doubtful points, while in some rare or very costly works of its unequalled natural history library I have been enabled to verify many references which would otherwise have remained uncertain.

"I regret not to have been able to examine any of the types of the new species of Audubon and Bachman, as presented by the latter gentleman to the Charleston Museum. The rules of that establishment do not permit specimens to leave its hall, and it was not possible to visit it during the preparation of this report.

"I have endeavored to make all acknowledgments of aid from systematic writers in the body of the report, although it may be well to mention here that much use has been made

1857. BAIRD, SPENCER F.—Continued.

throughout of the works and articles of Wagner, Waterhouse, Gray, Brandt, Burmeister, Keyserling and Blasius, Giebel, Richardson, Agassiz, Englemann, and others, as enumerated in the synonymy and list of authorities. To the labors of Messrs. Audubon and Bachman, however, either singly or collectively, are acknowledgments especially due for whatever facilities may have previously existed for the preparation of a report on American mammals. The necessity or propriety of such a report is only to be found in the fact that, when the crowning work of these gentlemen, 'The Viviparous Quadrupeds of North America,' was prepared, the materials at their command were far less extensive than have been at mine, and that many species, which they could only examine in the museums of London, Paris, Berlin, and Leyden, are now to be found in the Smithsonian collection in a profusion of specimens of the most satisfactory and perfect character.

"An apology is necessary for the delay which has taken place in the completion of the general reports on the zoology of the Pacific Railroad surveying parties. This has arisen from the fact that, from the first organization of these expeditions, in the spring of 1853, nearly to the present time, one or more has been in the field, and engaged in fresh examinations; so that until all the specimens expected were received, the general systematic account of zoological results could not conveniently be prepared. The examination of the materials was actually commenced early in 1855, and many of the articles written in that year in 1856. With the continuous accession of additional specimens, it became finally necessary to rewrite, alter, or extend all that had been prepared prior to the present year (1857). It is to this that the frequent want of uniformity is due, the time allowed not being sufficient in many cases to permit the reworking of the whole matter. The measurements of the specimens were at first made in inches and lines, but that of hundredths was finally adopted; it is to this fact that the presence of the two different divisions of the inch is attributable, it not being convenient or possible to make the measurements conform throughout, as would have been desirable.

"It is, perhaps, unnecessary to state that the matter of the present report is entirely original throughout, the few cases in which extracts from other authors are made being so indicated. With very few exceptions, all the references in the synonymy have also been personally made and verified. Where this was not possible, the synonym is inclosed between quotation marks.

"In explanation of the too frequent occurrence of typographical errata in the body of this report, it is proper to state that, owing to various circumstances, the work was necessarily passed through the press with a rapidity probably unexampled in the history of natural-history printing, allowing very little opportunity for that critical and leisurely examination so necessary in correcting a work of the kind. For most of the time the proof has been furnished and read at the rate of twenty-four to thirty-two pages per day, nearly four hundred pages having been set up, read, and printed during the first half of July alone. The same cause has also interfered with the preservation of perfect uniformity of arrangement and detail throughout. In some cases, accidents to the form while on press have caused the loss or transposition of letters, words, or paragraphs; as, among others, the exchange of characters of Orders VIII and IX, on page 1, referred also to on page 625. For excuse of errors in the use of technical terms, in the formation and inflection of scientific names, and for all other shortcomings, the writer can only throw himself upon the kind indulgence of his readers, partly in consideration of the fact that, owing to the urgent necessity for a speedy completion of the volume, no time was allowed for any revision of the manuscript as a complete work, nor, indeed, of its separate portions, and that for much of the time the preparation of much of the manuscript was only a few hours in advance of its delivery to the compositor.

"A few words in explanation of the plan adopted in preparing the articles of the present report may not be out of place. I have usually made the entire detailed description of the species from one particular specimen, often indicating it by number, mentioning afterwards the variations presented from this type by the others before me. The specific diagnoses alone contain a combination or selection from the characters of several specimens. The numbers attached to the specimens, as enumerated, are those which they bear in the Smithsonian Museum Catalogues. Each class of animals has its separate catalogue and succession of numbers, from 1 upwards, in this series, the same number being never used twice for different objects in its class, and thus constituting an essential part of the specimen. There is also a special catalogue of the osteological collections. Thus, the skin of a mammal will have one number, and its skull, if separated, another; each specimen having both numbers attached, its own as numerator of a fraction. Thus, when a skull is labeled or entered $\frac{421}{1149}$ it is to be understood that 421 is its number as entered in the catalogue of skins (or entire specimens in alcohol), while 1149 is the number of the skull as entered in the osteological catalogue. The skull itself would in this case be marked $\frac{1149}{421}$.

1857. BAIRD, SPENCER F.—Continued.

"The column of 'original numbers' embraces those attached to specimens in the field by collectors. These are always retained as being referred to in the field-notes of the different parties.

"The measurements have, in all cases, been made in English inches,* divided either into lines or twelfths or into one-hundredths. All the skulls, and in most cases the smaller skins, have been measured with dividers or callipers. The measurements of the body have been made to the insertion of the tail into the rump, or nearly to the very base of the caudal vertebra; the animal usually with the head, body, and tail extended into the same straight line, avoiding, as far as possible, all curvature.

"Where measurements are recorded as made before skinning, they are, in most cases, to be understood as having been furnished by the collector.

"For the sake of illustrating more fully the character of the species described in the present report, I have prepared the three lists as follows:

"The first list is that of the higher groups characterized in the following pages.

"The second list contains all the species of mammals, found in North America north of Mexico, that I have had an opportunity of examining while preparing the present work, together with a few that belong to the northern provinces of the last-mentioned State. These are inserted as very probably existing within the limits of the United States, even though not yet detected. The indications of geographical distribution are chiefly those furnished by the specimens before me, although I have occasionally given statements in this respect from Audubon, Bachman, and Richardson. I have not pretended to define with critical accuracy the complete range of the species, the facts on record not being sufficient for the purpose.

"The third list embraces the species which have not fallen under my notice. Some of these have little claim to a place in the fauna of North America north of Mexico, while others are, in all probability, the same as those mentioned in the first list. A few are unquestionably additional and good species, especially such as *Sorex fimbripes* and *palustris*, *Putorius nigripes*, *Arctomys pruinosus*, *Thomomys talpoides?* *Arvicola borealis*, *drummondii*, *richardsonii*, and *xanthognathus*, and some others.

"The following table will serve to indicate the additions in the list to the known species of North American mammals, as compared with the latest general work on the subject:

Species described here as new for the first time	35
Species described in 1855, from the same collection	17
<hr/>	
Total of new species in the Smithsonian collection not mentioned by Audubon and Bachman	52
Recognized species previously described, not mentioned by Audubon and Bachman	18
<hr/>	
Total of North American species additional to the list of Audubon and Bachman ..	70

"The entire number of species mentioned by Audubon and Bachman in the Quadrupeda of North America, exclusive of varieties, is 197, of which about 160 were figured, the remainder consisting either of species previously described by the authors, but not procurable for purposes of illustration, or else copied from others, to render their work complete,

"The total number of species of North American mammals represented in the Smithsonian collection is very nearly 220. Washington, D. C., July 29, 1857." < *Extracts from (Preface) Exploration and Survey for the Pacific R. R.*, vol. viii, 1853-6, pp. xxv, xxvi, xxvii, xxviii, and xxix.

"GENERAL SKETCH OF LINES EXPLORED.

"Shortly before the close of the session of Congress in March, 1853, an appropriation of \$150,000 was made to defray the expenses of the survey of the various routes along which it was supposed that a railroad might be constructed from the Mississippi River to the Pacific Ocean. For this purpose six parties were organized by the War Department for the survey of four main routes, and in a short space of time they were in the field. All the parties were fitted out in the most complete manner; the natural-history apparatus and material prepared under the direction of the Smithsonian Institution, which also furnished the necessary instructions as to the objects most important to be collected. In its efforts to secure the assignment to these parties of persons capable of making collections and observations it was met by the hearty co-operation of the War Department, through the heads of the different expeditions and Captain Humphreys, in charge of the Pacific Railroad office.

"A more detailed account of the collections and expeditions referred to above will be found in the Reports of the Smithsonian Institution—(sixth to the eleventh, 1851-1856). A notice

*The English inch used is about equal to 11.26 French lines, .9383 French inches, or to 25.40 millimeters. On the other hand, the French inch is equal to 1.0657 English inches, the French line to .0888 English inches, and the millimeter to .03937 English inches. The French meter is equivalent to 39.37 English inches, or 3.28 feet.

1857. BAIRD, SPENCER F.—Continued.

of the collections from the eastern portions of the United States, used for purposes of comparison, will also be found in the same series.

"The very rich collections made by the United States and Mexican Boundary Survey in Texas, New Mexico, and California are described in detail in its report, which also embraces notices of the results of the explorations in Texas and Northern Mexico by Dr. Berlandier, Mr. John Potts, Major Rich, and Lieut. Couch. Incidental mention of these is also made occasionally in the present volume, wherever necessary to complete the indications of geographical distribution.

"The collections of all the government parties just mentioned were transmitted, from time to time, to the Smithsonian Institution, and were there properly cared for until the return of the several expeditions. They were then placed in the hands of the naturalists selected to elaborate them, and the necessary drawings prepared, within its walls, under the direction of the Institution, to which, also, was committed the general supervision of the engraving and printing of the plates. Every facility has been furnished by the War Department, through Captain Humphreys, in charge of the Pacific Railroad office, and the heads of the different expeditions, for bringing the results properly before the world." < *Extracts from Introduction, Exploration and Surveys for the Pacific Railroad*, vol. viii, 1853-6, parts of pp. xiii, xvi, and xvii.

The definitions of the higher groups are inserted in their proper places, and it is not thought necessary to index them.

1853. BAIRD, SPENCER F. Explorations and Surveys for a Railroad Route from the Mississippi River to the Pacific Ocean. | War Department. | — | Birds: | By Spencer F. Baird, | Assistant Secretary Smithsonian Institution, | with the co-operation of | John Cassin and George N. Lawrence. | — | Washington, D. C. | 1858. pp. i-lvi, 1-1005. (No illustrations.) Dated Washington, Oct. 20, 1853. < ^{33d Congress,} 2d Session. } House of Representatives. { Ex. Doc. No. 91. | — | Reports | of | Explorations and Surveys, | to | ascertain the most practicable and economical route for a railroad | from the | Mississippi River to the Pacific Ocean. | Made under the direction of the Secretary of War, in | 1853-6, | according to acts of Congress of March 3, 1853, May 31, 1854, and August 5, 1854. | — | Volume IX. | — | Washington: | A. O. P. Nicholson, Printer. | 1858. 4to, pp. lvi, 1005.

"This report is complete in itself, and entirely independent of the various special articles by different naturalists of the several Surveys; an elaborate formal treatise on all the birds of North America north of Mexico. It represents the most important single step ever taken in the progress of American ornithology in all that relates to the technicalities. The nomenclature is entirely remodeled from that of the immediately preceding Audubonian period, and for the first time brought abreast of the then existing aspect of the case. It was adopted by the Smithsonian Institution, and thousands of separately printed (4to and 8vo) copies of the 'List of Species' were distributed during succeeding years to institutions and individuals; the names came at once into almost universal employ, and so continued, with scarcely appreciably diminished force, until about 1872. The synonymy of the work is more extensive and elaborate and reliable than any before presented. The compilation was almost entirely original, very few citations having been made at second-hand, and these being indicated by quotation-marks. The general text consists of diagnoses or descriptions of each species, with extended and elaborate criticisms, comparisons, and commentary. Of the general character of the specific determinations, it may be said that the author's tendency was to push specific discriminations beyond a point now usual; so that, though the work contains notably few purely nominal species, it has many that have proven to be simply geographical races. Tabular lists of the specimens examined, with localities where procured, collector, date of collection, and many measurements, are given. The work includes no biographical matter, nor is it illustrated.

"The appearance of so great a work, from the hands of a most methodical, learned, and sagacious naturalist, aided by two of the leading ornithologists of America, exerted an influence perhaps stronger and more widely felt than that of any of its predecessors, Audubon's and Wilson's not excepted, and marked an epoch in the history of American ornithology.

1858. BAIRD, SPENCER F.—Continued.

The synonymy and specific characters, original in this work, have been used again and again by subsequent writers, with various modifications and abridgment, and are in fact a large basis of the technical portion of the subsequent *History of North American Birds* by Baird, Brewer, and Ridgway. Such a monument of original research is like to remain for an indefinite period a source of inspiration to lesser writers, while its authority as a work of reference will always endure."—ELLOT COUES.

The following extract from the preface explains the scope of this work:

"The present report is a continuation of a systematic account of the vertebrate animals of North America, collected or observed by the different parties organized under the direction of the War Department for ascertaining the best route for a railroad from the Mississippi River to the Pacific Ocean.

"The collections of these expeditions having been deposited with the Smithsonian Institution by the War Department, in compliance with an act of Congress, the undersigned was charged by the Secretary of the Institution with the duty of furnishing the series of general reports upon them, as called for by the department. The account of the Mammals having been published in 1857, that of the Birds is herewith furnished, prepared according to the plan announced in the preface to that volume."

"As in the volume on the Mammals, by the insertion of the comparatively few species not noticed by the expeditions, this report becomes an exposition of the present state of our knowledge of the Birds of North America, north of Mexico. This addition, while rendering the work more valuable to the reader, was absolutely necessary for the proper understanding of the Western Fanna, the species of which are generally so closely allied to the Eastern forms as to require in most cases more minute and detailed descriptions of the latter than have been published."

"Certain portions of the report have been prepared by Mr. John Cassin, of Philadelphia, and Mr. George N. Lawrence, of New York, well known as the leading ornithologists of the United States. Mr. Cassin has furnished the entire account of the *Raptors*, from p. 4 to 64, of the *Grallæ*, from p. 689 to 753, and of the *Alcideæ*, from p. 900 to 918, in all about 135 pages. Mr. Lawrence has written the article on the *Longipennes*, *Totipalmes*, and *Colymbidæ*, from p. 820 to 900, making 80 pages."

"To Mr. P. L. Sclater, of London, acknowledgments are due for the examination of certain specimens in European museums, and for other valuable aid in determining points of synonymy; some of his notes received too late for insertion in their proper places will be found in Appendix A. Much assistance has also been rendered in various ways by Dr. J. G. Cooper."

"In the introduction to the general report upon the Mammals will be found a detailed account of the different railroad surveying parties from which Zoological collections were received, with their respective routes." * * *

"A collection of about 150 species received from Mr. John Gould, of London, contains many rare birds from the Northwest and Arctic regions (some of them types of the 'Fauna Boreali-Americana'), as well as others from Mexico and Guatamala. The latter have proved of great service for comparison with closely allied species of the United States, as have also specimens from Mr. P. L. Sclater, of London, Mr. J. P. Verreaux, of Paris, and Messrs. J. H. Gurney and Alfred Newton, of Norwich, England."

"The types of Eastern birds have been furnished by the collection of the author deposited in the Smithsonian Institution. This consists of a full collection of birds of Central Pennsylvania, with sex, date, and measurements before skinning. It also embraces a large number of Mr. Audubon's typical specimens used in the preparation of his 'Birds of America,' including many of those from the Columbia River and Rocky Mountains, furnished him by Mr. J. K. Townsend."

"In addition to the collections just mentioned, with others not enumerated, all in charge of the Smithsonian Institution, and amounting to over 12,000 specimens, types have been supplied for the occasion by Mr. Cassin, Mr. Lawrence, Mr. John G. Bell, Dr. Michener, and others. The ornithological gallery of the Philadelphia Academy of Natural Sciences, believed to be the richest in the world, has also furnished the means of making many essential comparisons."

"The measurements of the specimens have usually been made in hundredths of the English inch,* mostly with the dividers. All the measurements in the list of specimens are as made before the bird was skinned, each collector being responsible for the accuracy of his work. The comparative tables of measurements show, in many cases, the change of dimensions produced in the dried skin."

"S. F. B.

"WASHINGTON, October 20, 1853."

SYNOPSIS OF CONTENTS.

Preface	xiii-xvi
I. Table of the higher groups	xvii-xxiv
II. List of species	xxv-lvi
Introductory remarks	1, 2
(Birds of North America)	3-920
Appendix A.—Additional Remarks on North American Birds	921-925
Appendix B.—Birds found at Fort Bridger, Utah	926, 927
Appendix C.—List of authorities referred to in the preceding report	928-954
Alphabetical indices:	
I. Systematic index of common names	955-963
II. Systematic index of scientific names	965-1065

NOTE.—When authorities are inclosed in parentheses it shows that the species was first described under a different genus. A second authority (or a single one uninclosed) is that of the name as adopted. Extra limital species have their current number similarly inclosed.

1. <i>Cathartes aura</i> (Linn.), Illig.	p. 4
2. <i>Cathartes californianus</i> (Shaw), Cuvier	5
3. <i>Cathartes atratus</i> (Barttram), Less.	5
(4.) <i>Cathartes burrovianus</i> , Cassin	6
5. <i>Falco</i> (<i>Falco</i>) <i>anatum</i> , Bonaparte	7
6. <i>Falco</i> (<i>Falco</i>) <i>nigriceps</i> , Cassin	8
7. <i>Falco</i> (<i>Hypotriorchis</i>) <i>columbarius</i> , Linn	9
8. <i>Falco</i> (<i>Hypotriorchis</i>) <i>aurantius</i> , Gmelin	10

The following birds are enumerated in the preceding list which are not legitimately entitled to a place in the fauna of North America (exclusive of Mexico). Some of them have been described in the report for the purpose of comparison with closely-allied species of the United States; others are mentioned because introduced by previous writers, though probably on erroneous data. Future investigations will doubtless result in the removal of others from the list now retained there:

- No. 4. *Cathartes burrovianus*, Cassin.
 63. *Rhynchopsitta pachyrhyncha*, Bon.
 71. **Campophilus imperialis*, Gray.
 129. **Tyrannus melancholicus*, Vieill.
 132. *Myiarchus Cooperi*, Baird.
 171. **Geothlypis velatus*, Cab.
 216. *Cardellina rubra*, Bonap.
 219. *Setophaga miniata*, Sw.
 224. *Euphonia elegantissima*, Gray.

1858. BAIRD, SPENCER F.—Continued.

- 244. **Virco virescens*, Vieill.¹
- 292. *Parus meridionalis*, Selater.
- 297. *Psaltriparus melanotus*, Bon.
- 298. *Carpodacus hæmorrhous*, Selater.
- 311. **Chrysomitris Stanleyi*, Bonap.
- 312. **Chrysomitris Yarrelli*, Bonap.
- 350. *Junco cinereus*, Selater.
- 405. *Trupialis militaris*, Bon.
- 408. **Icterus vulgaris*, Daud.¹
- 410. *Icterus melanocephalus*, Gray.
- 494. *Butorides Brunnescens*, Baird.
- 498. **Ibis rubra*, L.¹
- 514. **Haematopus ater*, Vieill.

Total of species, 23; of which one is not mentioned in the list, leaving 22. Of the 23 species, nine marked with an asterisk are given by Mr. Audubon.

The following species, claiming to be actually inhabitants of North America, have not been described from the specimens, none having been procurable for the purpose. Of several of them no specimens are known in any collection:

- Haliaeetus Washingtonii*.
- Regulus Cuvierii*.
- Dendroica montana*.
 carbonata.
- Myiodiodes minutus*.
 Bonapartii.
- Egiothus canescens*.
- Leucosticte griseinucha*.
 arctous.
- Lagopus americanus*.
- Chloephaga canagica*.
- Polysticta Stelleri*.¹
- Oidemia binaculata*.
- Somateria v-nigra*.
- Graculus perspicillatus*.
 cinnamatus.

- Thalassidroma Hornbyi*.
 melania.
- Larus calceopterus*.
- Rissa brevirostris*.
 nivea.
- Pagophila brachytarsi*.
- Rhodostethia rosea*.
- Creagrus furcatus*.
- Xema Sabinni*.
- Chroicocephalus minutus*.¹
- Podiceps auritus*.¹
- Sagmatorhina labradoria*.
- Brachyrhampus Kittlitzii*.
 Wrangellii.
 brachypterus.

Total, 31 species.

The following species are probably accidental visitors only, and are not yet entitled to a permanent place in our fauna:

- Milvulus tyrannus*.
- Saxicola œnanthe*.
- Chrysomitris magellanicus*.
- Philomachus pugnax*.
- Orex pratensis*.

- Heliornis surinamensis*.²
- Mareca penelope*.
- Nettion crecca*.
- Erismatura dominica*.
- Mergellus abellus*.—Total, 10 species.

1858. BAIRD, SPENCER F. Birds found at Fort Bridger, Utah. < *Pacific Railroad Report*, ix, 1858, App. B, pp. 926, 927.

Merely a list of 104 spp., collected by C. Drexler.

¹ No North American specimens seen.

² Not enumerated in the list.

³ Of these no specimens at all, of 28 species, were procured in this country for examination, and extralimital ones only of 3 others. Many supposed species are referred to in different parts of the report, some of which may prove genuine.

1858. BAIRD, SPENCER F. Catalogue | of | North American Birds, | chiefly in the Museum of the | Smithsonian Institution. | By | Spencer F. Baird, | Assistant Secretary of the Smithsonian Institution. | — | Washington: | Smithsonian Institution. | October, 1858. | 4to, pp. xv-lvi.

A large edition of this catalogue, a reprint of pp. xvii-lvi of the General Report on Birds, was printed in Oct., 1858, and distributed as No. 106 of the publications of the Smithsonian Institution.

"Separate reissue, *V. L. P.*, with new title-page, of pp. xvii-lvi of the author's main work. Besides the list of 738 spp., with habitats, these sheets contain a table of the higher groups, list of extralimital species (23) which are included in the work, and of those (31) claiming to be North American, but not so identified, and a summary of the total number as variously given by Wilson, Bonaparte, and Audubon. The species being all numbered, the brochure was much used for several years for practically convenient reference to the species by number."—(COUES.)

85.

1858. [BAIRD, SPENCER F.] United States | Exploring Expedition. | During the years | 1838, 1839, 1840, 1841, 1842. | Under the command of Charles Wilkes, U. S. N. Vol. XX. | — | Herpetology. | Prepared under the superintendency of | S. F. Baird. | With a folio Atlas. | — | Philadelphia: | Printed by C. Sherman & Son. | 1858. 4to. pp. (4), v-ix, 492.

This book was not written by Professor Baird, who assures me that he did not touch pen to it. The work was done entirely by Dr. Charles Girard, but through some technicality his name was not allowed to appear on the title-page by the Naval authorities having the matter in charge, who insisted in publishing the book under the name of Professor Baird, to whom the original contract was given out. The matter is explained fully in the introduction, which is quoted entire:—

"INTRODUCTION.—The Joint Committee of the Library of Congress entered into an engagement with the undersigned, in 1857, to prepare the Report upon the Herpetological collections made by the United States Exploring Expedition. Finding that other duties would

1858. BAIRD, SPENCER F.—Continued.

interfere with the proper performance of the work, he was permitted to associate Dr. Girard with him in its execution, by whom the determinations and descriptions have been made, the drawings overlooked, and the work carried through the press. S. F. BAIRD. Washington, May, 1858. (p. vii.)"

As is well known only 100 copies of these reports were published by government, while the authors of the separate volumes were allowed to have 150 more printed at their own individual expense. In accordance with this ruling a special edition of this report was published by Girard with the following title:

1858. CHARLES GIRARD. United States | Exploring Expedition. | During the years | 1838, 1839, 1840, 1841, 1842. | Under the command of | Charles Wilkes, U. S. N. | Vol. XX. | — | Herpetology. | By | Charles Girard, | Doctor in Medicine and Surgery; Corresponding Member of the Boston | Society of Natural History; the Academy of Natural Sciences of Philadelphia; | the Lyceum of Natural History of New York; the Elliot Society of | Natural History of Charleston, S. C.; the California Academy | of Natural Sciences, San Francisco; the "Societe Helvetique | des Sciences Naturelles;" the "Naturforschende Gessell- | schaft in Zurich;" and the "Societe des Sciences | Naturelles de Neuchatel (Switzerland)," etc. | With a folio Atlas | — | Philadelphia | J. B. Lippincott & Co. | 1858. 4to. pp. i-xvii, 1-496, pl, i-xxxii.

Several additional plates were included in the Atlas to this edition.

86.

1859. BAIRD, SPENCER F. United States and Mexican | Boundary Survey, | under the order of | Lieut. Col. W. H. Emory, | Major First Cavalry, and United States Commissioner. | — | Mammals | of the Boundary, | by | Spencer F. Baird, | Assistant Secretary of the Smithsonian Institution. | With notes by the Naturalists of the Survey. | = | 4to, pp. (2) 3-62, pl. xxvii. < ^{34th Congress,} 1st Session. } House of Representatives. { Ex. Doc., | — | Report | on the | United States and Mexican Boundary Survey, | made under | the direction of the Secretary of the Interior, | by | William H. Emory. | Major first Cavalry and United States Commissioner. | — | Volume II. | Washington: | Cornelius Wendell, Printer, | 1859. | 4to. 1st part Botany: pp. (8) 9-270 + pl. 1-67 + pp. 1-78 (Cactaceae) + pl. 1-75. 2d part Zoology: pp. (2) + 3-62, pl. xxvii (Mammals); pp. (2) 3-33 (1), pl. xxv (Birds); pp. (2) 3-35 (1), pl. xli (Reptiles); + pp. 85 + (3) + (1-11), + pl. xli (Fishes).

1859. BAIRD, SPENCER F. Smithsonian Miscellaneous Collections. | — | Catalogue | of | North American Birds | chiefly in the Museum of the | Smithsonian Institution. | By | Spencer F. Baird. | [First octavo edition.] | [Seal of Smithsonian Institution.] | Washington: | Smithsonian Institution. | 1859. Svo. 2 p. ll., pp. 19 + 2.

This catalogue is a reprint, with some changes from the one in quarto forming a portion of the Report on North American Birds in Vol. IX of the Reports of the Pacific Railroad Survey, and published as a separate paper by the Smithsonian Institution in October, 1858. Its object was to facilitate the labeling of the specimens of birds and eggs in the Museum of the Institution, as also to serve the purpose of a check-list of the species.

A special edition was printed on one side of the paper only for labeling, also an edition on thin blue paper for mailing.

In the octavo edition the note on habitat and the references to the pages of the report, which were included in the quarto edition, are omitted, the serial number of the species, the scientific name, and the common name alone being given.

This publication was issued as No. 108 of the Smithsonian series, and was included in Vol. II of the Miscellaneous Collections. Several editions have in subsequent years been struck off from the same plates, and probably 10,000 copies of the catalogue have been distributed.

This is the most usual form of the "Smithsonian Catalogue" of North American birds, which has become a classical work among ornithologists, and in accordance with which the majority of American collections of skins and eggs are labeled. A revision of this, from the hand of Robert Ridgway, is now in press.

{ Ex. Doc. No. 91. | — | Reports | of | explorations and surveys, | to | ascertain the most practicable and economical route for a railroad | from the | Mississippi River to the Pacific Ocean. | Made under the direction of the Secretary of War, in | 1853-6. | According to acts of Congress of March 3, 1853, May 31, 1854, and August 5, 1854. | — | Volume X. | — | Washington: | A. O. P. Nicholson, printer. | 1859. Parts iii and iv. 4to. First article. No text, pll. xxiv-xxvi.*

This report consists entirely of plates, the text being omitted.

* "As the general report on the reptiles of Western North America, observed by the different exploring parties, has been excluded from the series for want of room, all that can be given here is an explanation of the plates prepared for this report. These represent the details of external form in different species of North American Serpents. * * * The figures have, as far as possible, been taken from the type-specimens of the species, especially those described in the Catalogue of Serpents in the Museum of the Smithsonian Institution (1853), to which the page-column refers."

* "The make-up of the tenth volume of the Pacific Railroad Reports is such that it might be styled the 'Bibliographer's Despair'; it contains about 20 different title-pages and a corresponding number of different paginations."—GILL & COUES.

1859. BAIRD, SPENCER F.—Continued.

Explanation of the plates.

Plate.	Fig.	Name.	Page.	Locality.	Details given.

1859. BAIRD, SPENCER F. Notes on a collection of Birds made by Mr. John Xantus, at Cape St. Lucas, Lower California, and now in the Museum of the Smithsonian Institution. < *Proc. Acad. Nat. Sci. Phila.*, xi, 1859 (1860), pp. 299-306. Presented for publication Nov. 8, ordered printed Nov. 29, 1859.

The paper preceding this one is "Descriptions of supposed new species of Birds from Cape St. Lucas, Lower California. By John Xantus," *op. cit.*, pp. 297-299, in which are described 4 new species, included in the list now under consideration.

Peculiarities of the Zoology of Cape St. Lucas	p. 299
Bird fauna of Cape St. Lucas.	
Mammal fauna of Cape St. Lucas.	
Reptile fauna of Cape St. Lucas.	
Zoology of the Gulf of California	300
Causes of peculiar distribution of animal life in Cape St. Lucas,	
Physical features of Cape St. Lucas.	
Laws of distribution, migration, size, exemplified in the Cape St. Lucas collection.	
Table illustrating geographical distribution of species found at Cape St. Lucas	301
Relations of land fauna of Mexico.	
Relations of Marine Invertebrates of Cape St. Lucas to those of Mexico	302
Note by William Stimpson on the Crustaceans of Cape St. Lucas.	
42 species are enumerated, "collected from the middle of April to the middle of July, 1859," 7 of which, all new, "may as yet be considered as peculiar to Cape St. Lucas."	
*1. <i>Tinnunculus sparverius</i> , Vieillot	302
*2. <i>Bubo virginianus</i> , Bonap.	
3. <i>Picus lucasanus</i> , Xantus	
4. <i>Centurus uropygialis</i> , Baird.	
5. <i>Colaptes chrysoides</i> , Malherbe.	
(Ref. to <i>Colaptes</i> collected by Mr. Schott, P. R. R. Rep., ix, p. 125.)	
*6. <i>Geococcyx californicus</i> , Baird	303
*7. <i>Chordeiles texensis</i> , Lawrence.	
8. <i>Myiarchus mexicanus</i> , Baird.	

* Name only. Others have descriptive or critical remarks.

1859. BAIRD, SPENCER F.—Continued.

- *9. *Sayornis nigricans*, Bonaparte.
 *10. *Empidonax obscurus*, Baird.
 11. *Hirundo thalassina*, Swainson.
 *12. *Progne purpurea*, Boie.
 *13. *Phainopepla nitens*, Selater.
 14. *Mimus polyglottus*, Boie.
 15. *Harporyhynchus cinereus*, Xantus p. 303-304
 16. *Campylorhynchus affinis*, Xantus.
 17. *Polioptila melanura*, Lawrence 304
 18. *Paroides flaviceps*, Baird.
 19. *Carpodacus frontalis*, Gray.
 *20. *Chondestes grammacus*, Bonap.
 21. *Zonotrichia leucophrys*, Swains.
 22. *Calamospiza bicolor*, Bonap.
 *23. *Guizaca melanocephala*, Swains.
 24. *Cyanospiza versicolor*, Baird.
 25. *Pyrrhuloxia sinuata*, Bonap.
 26. *Cardinalis igneus*, Baird, n. s. 305
 Cape St. Lucas. J. Xantus.
 27. *Pipilo albicollis*, Baird, n. s.
 Cape St. Lucas. J. Xantus.
 28. *Agelaius* ———.
 29. *Icterus parisorum*, Bonap.
 *30. *Icterus cucullatus*, Swainson.
 31. *Cyanocitta californica*, Strickland.
 32. *Metopelia leucoptera*, Bonap.
 33. *Chamaea passierina?* var. *pallidescens*, Baird, n. s.
 *34. *Lophortyx californicus*, Bonap.
 35. *Garzetta thula*, Bonap. ?
 *36. *Aegialitis vociferus*, Cassin 306
 *37. *Calidris arenaria*, Illiger.
 *38. *Fulica americana*, Gmel.
 39. *Graevius tilophus?* Gray.
 40. *Thalassidroma melania*, Bonap.
 41. *Blasippus Heermanni*, Bonap.
 42. *Brachyrhamphus hypoleucus*, Xantus.

1859. BAIRD, SPENCER F. Mammals | of | North America ; | the descriptions of species based chiefly on the collections | in the | Museum of the Smithsonian Institution. | By Spencer F. Baird, | Assistant Secretary of the Smithsonian Institution. | With Eighty-seven Plates of Original figures, illustrating the genera and species, and including details of external forms, | and osteology. | — | Philadelphia : | *J. B. Lippincott & Co. | 1859. 4to. pp. xxxiv, 1-735 + 1-55 + 737-764, pll. i-lxxxvi (Mammals).

This special edition is made up from the reports on the Mammals in Vol. VIII of the Pacific Railroad Reports and in Vol. II, Part II, of the Reports of the Mexican Boundary Survey.

Part I "is a reprint of the General Report on the Mammals of the Pacific Railroad surveying parties, which, for reasons explained on page xxvi of the preface, embraces all the known species (excepting of *Cheiroptera*, *Iinnipedia*, and *Cetacea*) north of Mexico." pp. xi-xxxiv of this edition correspond to pp. xxv-xlvi of the original work, while pp. 1-735 are the same. To this part is prefixed a special title-page, as follows:

= | Part I. | — | General Report | upon the Mammals | of | the several Pacific Railroad Routes. | By | Spencer F. Baird, | Assistant Secretary of the Smithsonian Institution. | — | Washington, D. C. | July, 1857. | = |

"To this is added, as Part II, the Special Report on the Mammals of the United States and Mexican Boundary Survey, as in it the species found along the boundary-line are treated of more fully than in Part I."

To this part is prefixed a special title-page, as follows:

= | Part II. | — | Special Report | upon the Mammals of the Mexican Boundary. | By | Spencer F. Baird, | Assistant Secretary of the Smithsonian Institution; | with notes by the naturalists of the survey. | — | Washington, D. C. | January, 1859. | = |

* Some copies have the imprint of D. Appleton & Co.

1859. BAIRD, SPENCER F.—Continued.

Part II embraces pp. 3-55 of the Mexican Boundary Mammals.

Part III.—References to the figures is made up anew for this edition. "To the 43 plates accompanying the General Report on Mammals in Volume VIII of the Pacific Railroad series have been added 17 others, scattered through the different volumes, as well as 27 accompanying the Mexican Boundary Report. Such of the figures as require are colored, in this edition, for the first time. They represent the external form of 47 species, with details of structure, and the skulls and teeth of 106 others, making 161 species illustrated in some way."

SYSTEMATIC LIST OF ILLUSTRATIONS.

CHEIROPTERA.

Vespertilio pallidus, Leconte.—Animal, pl. lxi, fig. 1.

Macrotus californicus, Baird.—Animal, pl. lxi, fig. 2.

SORICINAE.

Neosorex navigator, Cooper.—Animal and skull, pl. xxvi, No. 629.

Sorex Trowbridgii, Baird.—Animal and skull, pl. xxvi.

Sorex vagrans, Cooper.—Details of external form, pl. xviii, figs. 5 and 6. **Animal and skull, pl. xxvi, No. 1675.**

Sorex Suckleyi, Baird.—Animal and skull, pl. xxvii, No. 1677.

Sorex pachyura, Baird.—Animal and skull, pl. xxvii, No. 1674.

Sorex Fosteri, Rich.—Details, pl. xxx, fig. 4.

Sorex plutyrhinus, Wagner.—Animal and skull, pl. xxviii, No. 1699.

Sorex Cooperi, Bach.—Animal and skull, pl. xxvi, No. 2047.

Sorex Haydeni, Baird.—Animal and skull, pl. xxvii, No. 1685.

Sorex Hoyi, Baird.—Animal and skull, pl. xxviii, No. 1688.

Sorex Thomsoni, Baird.—Animal and skull, pl. xxvii, No. 1686.

Blarina talpoides, Gray.—Details of external form, pl. xviii, fig. 4, and pl. xxx, fig. 6.

Blarina brevicauda, Gray.—Details, pl. xxx, fig. 5.

Blarina carolinensis, Baird.—Details, pl. xxx, fig. 8.

Blarina angusticeps, Baird.—Details, pl. xxx, fig. 7.

Blarina cinerea, Baird.—Details, pl. xxx, figs. 9 and 10.

Blarina exilipes, Baird.—Animal and skull, pl. xxvii, No. 2157.

Blarina Berlandieri, Baird.—Animal and skull, pl. xxviii, No. 2159.

TALPINAE.

Scalops aquaticus.—Details of external form, pl. xvii, fig. 1.

Scalops Townsendii, Bach.—Details of external form, pl. xvii, fig. 5; pl. xxx, fig. 1.

Scalops Townsendii, Bach., var. *californicus*.—Details of external form, pl. xvii, figs. 2 and 6; pl. xxx, fig. 3.

Scalops Breveri, Bach.—Details of external form, pl. xvii, figs. 3-4; pl. xxx, fig. 2.

Talpa europaea, L.—Muzzle, pl. xvii, fig. 7.

Condylura cristata, Ill.—Details of external form, pl. xviii, figs. 1, 2.

Urotrichus Gibbsii, Baird.—Details of external form, pl. xviii, fig. 3. **Animal and skull, pl. xxviii, No. 662.**

FELINAE.

? *Felis concolor*, Linn.—Animal very young, pl. ii, fig. 2. Skull, adult, pl. lxxi, fig. 1; young, pl. lxxi, fig. 2.

Lynx fasciatus, Raf.—Animal, pl. ii, fig. 1.

Lynx maculatus.—Skull, adult, pl. lxxv, fig. 1; young, pl. lxxv, fig. 2.

Felis yaguarundi, Desm.—Skull, pl. lxxiv, fig. 1.

Felis cyra, Desm.—Animal, pl. lxxii, fig. 1. Skull, pl. lxxiii, fig. 2.

Felis pardalis, Linn.—Skull, adult, pl. lxxii; young, pl. lxxiii, fig. 1.

LUPINAE.

Canis occidentalis var. *griseo-albus*.—Skull, pl. xxxi.

Canis latrans, Say.—Skull, pl. lxxvi.

VULPINAE.

Vulpes fulvus var. *fulvus*.—Skull, pl. xxxii.

Vulpes macroura, Baird.—Skull, pl. xxxiii.

Vulpes velox, Aud. and Bach.—Skull, pl. xxxiv.

Vulpes virginianus, Rich.—Skull, pl. xxxv, fig. 1.

Vulpes littoralis, Baird.—Animal, pl. i. Skull, pl. xxxv, fig. 2.

VINERINAE.

Bassaris astuta, Licht.—Skull, pl. lxxiv, fig. 2.

1859. BAIRD, SPENCER F.—Continued.

MARTINAE.

- Mustela Pennantii*, Erxl.—Skull and gum folds, pl. xxxvi, fig. 1.
Mustela americana, Turton.—Skull, pl. xxxvi, fig. 2, and pl. xxxvii, fig. 1.
Putorius cicognanii.—Details, pl. xix, fig. 4.
Putorius Richardsonii, Bp.—Details, pl. xix, figg. 2-6.
Putorius noveboracensis, De Kay.—Skull, pl. xxxvi, fig. 3.
Putorius frenatus, Aud. and Bach.—Details, pl. xix, fig. 5. Details of young, pl. lxii, fig. 2.
 Skull of adult, pl. lxxvii, fig. 1; of young, fig. 2.
Putorius xanthogenys.—Animal, pl. iii, fig. 1. Details, pl. xix, fig. 3.
Putorius vison, Rich.—Skull, pl. xxxvii, fig. 2 adult, and fig. 3 young.

LUTRINAE.

- Lutra canadensis*, Sab.—Details, pl. xix, fig. 7. Skull, pl. xxxviii.
Lutra californica, Gray.—Details, pl. xix, fig. 8.

MELINAE.

- Mephitis varians*, Gray.—Skull, pl. lx, fig. 2.
Mephitis mesoleuca, Licht.—Details, pl. xix, fig. 1. Skull, pl. xxxix, fig. 3.
Mephitis mephitica, Shaw.—Pl. lx, fig. 1.
Mephitis bicolor, Gray.—Animal, pl. xxix. Skull, pl. lx, fig. 3; pl. lxxvii, fig. 3.
Taxidea americana, Waterh.—Upper jaw, pl. xxxix, fig. 2.
Taxidea berlandieri, Baird.—Skull, pl. xxxix, fig. 7.

SUBURSINAE.

- Procyon Hernandezii*, Wagler.—Skull, rather young, pl. xl. Adult, pl. lxxvii.

URSINAE.

- Ursus horribilis*, Ord.—Skull, very old, pl. xli. Skull, rather young, pl. xlii.
Ursus horribilis var. *horiaeus*, Baird.—Skull, pl. lxxx.
Ursus arctos, L.—Skull, rather immature, pl. xliii, figg. 1-9.
Ursus americanus, Pallas.—Skull, pl. xliii, figg. 10-13.
Ursus maritimus, Linn.—Skull, pl. xliv.
Ursus cinnamomeus, Aud., Bach.—Skull, pl. lxxxix.

MARSUPIALIA.

- Didelphys californica*, Bennett.—Animal, pl. lxiii. Fig. 1, adult; fig. 2, young.

SCIURINAE.

- Sciurus castanonotus*, Baird.—Animal, pl. lxxv. Skull, pl. lxxxix, fig. 2.
Sciurus cinereus, Linn.—Skull, pl. xlvi, fig. 2.
Sciurus limitis, Baird.—Animal, pl. lxxv. Skull, pl. lxxxix, fig. 1.
Sciurus carolinensis, Gm.—Skull, pl. xlvi, fig. 2.
Sciurus Hudsonius, Pallas.—Skull, pl. xlvi, fig. 1.
Sciurus Fremontii, Towns.—Animal, pl. vi.
Sciurus Douglassii, Bach.—Details, pl. xx, fig. 1. Skull, pl. xlvi, fig. 3.
Sciurus Douglassii, Bach., var. *Suckleyi*.—Animal, pl. vii.
Tamias striatus.—Skull, pl. xlvi, fig. 2.
Tamias quadrivittatus, Rich.—Details, pl. xx, fig. 2.
Tamias dorsalis, Baird.—Animal, pl. lxxvi, fig. 1.
Tamias Townsendii, Bach.—Skull, pl. xlvi, fig. 4.
Tamias Townsendii, Bach., var. *Cooperi*.—Animal, pl. v, fig. 2.
Spermophilus Beecheyi, Rich.—Animal, pl. iii, fig. 2. Skull, pl. xlvi, fig. 3.
Spermophilus Douglassii, Rich.—Skull, pl. xlvi, fig. 1.
Spermophilus mexicanus, Licht.—Skull, pl. lxxxii, fig. 2.
Spermophilus grammura, Bachman.—Animal, pl. iv, fig. 1. Details, pl. lxxvii, fig. 1. Skull, pl. lxxxii, fig. 2.
Spermophilus Couchii, Baird.—Skull, pl. lxxxix, fig. 3.
Spermophilus lateralis, Rich.—Details, pl. xx, fig. 3. Skull, pl. xlvi, fig. 5.
Spermophilus epilosoma, Bennett.—Details, pl. lxxvii, fig. 3. Skull, pl. lxxxix, fig. 3.
Spermophilus Harrisii, Aud. and Bach.—Skull, pl. xlvi, fig. 3.
Spermophilus Franklani, Rich.—Skull, pl. xlvi, fig. 4.
Spermophilus tereticauda, Baird.—Details, pl. lxxvii, fig. 2. Skull, pl. lxxxix, fig. 4.
Cynomys lodovicianus.—Skull and teeth, pl. xlvi, figg. 2, 3.
Cynomys Gunnisonii, Baird.—Animal, pl. iv, fig. 2. Skull, pl. xlvi, fig. 4.
Arctomys monax, Gmelin.—Skull, pl. xlix, fig. 1.
Arctomys flaviventer, Bachman.—Skull, pl. xlvi, fig. 1.

1859. BAIRD, SPENCER F.—Continued.

CASTORINAE.

- Aplodontia leporina*, Rich.—Details, pl. xx, fig. 4. Skull, pl. xlix, fig. 2.
Castor canadensis, Kuhl.—Skull, pl. xlvi, fig. 1.

SACCOMYINAE.

- Geomys bursarius*, Rich.—Details, pl. xxii, fig. 1. Skull, pl. l, fig. 2.
Geomys breviceps, Baird.—Skull, pl. lii, fig. 2.
Geomys pinetis, Rafinesque.—Details, pl. xxii, fig. 3.
Geomys castonops, Leconte.—Animal, pl. x, fig. 2. Skull, pl. l, fig. 2.
Geomys Clarkii, Baird.—Animals and details, pl. lxix, fig. 1. Skull, pl. lxxxiii, fig. 2.
Geomys hispidus, Leconte.—Details, pl. xxii, fig. 4.
Thomomys bulbivorus, Baird.—Animal, with details of external form, pl. xi. Skull, pl. l, fig. 3, and pl. lii, fig. 1.
Thomomys laticeps, Baird.—Animal, with details, pl. xii, fig. 1.
Thomomys borealis, Baird.—Details, pl. xxii, fig. 2.
Thomomys umbrinus, Baird.—Animal, and details, pl. lxviii. Details, pl. lxx, fig. 1. Skull, pl. lxxxiii, fig. 5.
Thomomys rufescens, Maxim.—Animal, pl. x, fig. 1.
Thomomys fulvus, Baird.—Animal, with details, pl. xii, fig. 2.
Dipodomys Ordii, Woodhouse.—Animal, pl. v, fig. 1, and pl. lxix, fig. 3. Details, pl. xxi, fig. 1. Skull, much enlarged, pl. li, fig. 1. Natural size, fig. 2; also, pl. lxxxiii, fig. 3.
Dipodomys Ordii var. *montanus*, Baird.—Pl. lxxxiii, fig. 4.
Dipodomys agilis, Gambel.—Animal, pl. ix, fig. 1. Skull, pl. lxxxiii, fig. 2.
Perognathus penicillatus, Woodhouse.—Details, pl. xx, fig. 5.
Perognathus hispidus, Baird.—Skull, pl. li, fig. 4, and pl. lxxxiii, fig. 6. Animal, pl. lxix, fig. 2.
Perognathus monticola, Baird.—Skull, pl. li, fig. 3.
Perognathus flavus, Baird.—Animal, pl. viii, fig. 2. Details, pl. xxi, fig. 3, and pl. lxx, fig. 4 and 5.

DIPODINAE.

- Jaculus Hudsonius*.—Details, pl. xxi, fig. 5.

MURINAE.

- Mus tectorum*, Savi.—Skull, pl. lii, fig. 6.
Reithrodon megalotis, Baird.—Skull, pl. lxxxiv, fig. 4.
Reithrodon montanus, Baird.—Teeth, pl. liv, No. 1306.
Reithrodon.—Details, pl. lxxvii, fig. 4, and pl. lxx, fig. 6.
Hesperomys tezanus, Woodhouse.—Animal, pl. viii, fig. 1. Skull, pl. lii, fig. 5.
Hesperomys Boylii, Baird.—Animal, pl. viii, fig. 3. Skull, pl. lii, fig. 3.
Hesperomys palustris, Wagner.—Skull, pl. lii, fig. 4.
Neotoma floridana, Say and Ord.—Skull, pl. lii, fig. 2.
Neotoma micropus, Baird.—Skull, pl. lxxxiv, fig. 2.
Neotoma mexicana, Baird.—Teeth, pl. liv, No. —, and No. 1674. Details, pl. lxx, fig. 3. Skull, pl. lxxxiv.
Neotoma fuscipes, Cooper.—Skull, pl. liii, fig. 1. Teeth, pl. liv, No. 936.
Neotoma occidentalis, Cooper.—Animal, pl. ix, fig. 2. Details, pl. xxi, fig. 4. Skull, pl. liii, fig. 3.
Neotoma cinerea, Baird.—Skull, pl. liii, fig. 5. Teeth, pl. liv, No. 1694.
Neotoma magister, Baird.—Lower jaw, pl. liii, fig. 4.
Sigmodon berlandieri, Baird.—Skull, pl. liii, figs. 6 and 7, and pl. lxxxiv, fig. 3. Animal, pl. lxxvi, fig. 2. Details, pl. lxx, fig. 2.

ARVICOLINAE.

- Arvicola Townsendii*, Bachman.—Teeth, pl. liv, No. 1595.
Arvicola montana, Peale.—Details, pl. xxi, fig. 2.
Arvicola austera, Lec.—Teeth, pl. liv, No. 1587.
Arvicola cinnamomea, Baird.—Teeth, pl. liv, No. 1714.
Arvicola pinetorum, Leconte.—Teeth, pl. liv, No. 1719.
Fiber zibethicus, Cuv.—Teeth, pl. liv, No. 626.

HYSTRICINAE.

- Erethizon dorsatus*.—Upper view of skull, pl. lv, fig. 3.
Erethizon epixanthus, Brandt.—Skull, pl. lv, figs. 1-2.

1859. BAIRD, SPENCER F.—Continued.

LEPORINAE.

- Lepus glacialis*, Leach.—Skull, pl. lvi, fig. 1.
Lepus Washingtonii, Baird.—Animal, pl. xv.
Lepus campestris, Bach.—Skull, pl. lvi, fig. 2.
Lepus callotis, Wagler.—Skull, pl. lvii, fig. 1.
Lepus callotis var. *flavigularis*.—Skull, pl. lxxxv, fig. 1.
Lepus californicus, Gray.—Skull, pl. lviii, fig. 2.
Lepus sylvaticus, Bach.—Skull, pl. lviii, fig. 1.
Lepus Audubonii, Baird.—Animals, pl. xiii. Skull, pl. lviii, fig. 2.
Lepus Trowbridgii, Baird.—Animal, pi. xiv.
Lepus aquaticus, Bach.—Skull, pl. lix, fig. 1.
Lepus palustris, Bach.—Skull, pl. lix, fig. 2.
Lepus artemisia, Bach.—Skull, pl. lxxxv, fig. 2.

EFFODIENTA.

- Dasyus norem cinctus*, Linn.—Skull, pl. lxxxvi.

SUINAE.

- Dicotyles torquatus*, Cuv.—Skull, pl. lxxxvii, figg. 1, 2.

CERVINAE.

- Alce americanus*, Jardine.—Horns, adult, woodcut, fig. 1; young, fig. 2, p. 632.
Rangifer caribou, Aud. and Bach.—Horns, adult, woodcut, fig. 3; young, figg. 4, 5, and 6, p. 634.
Rangifer groenlandicus.—Horns, adult male, woodcut, fig. 7; adult female?, fig. 8, p. 635.
Cervus canadensis, Erxl.—Muzzle, woodcut, fig. 9; hoof, fig. 10, p. 639; horns, fig. 11, p. 641.
Cervus virginianus, Boddaert.—Feet, pl. xxiv, fig. 1; muzzle, woodcut, fig. 12, p. 644; horns, fig. 13, p. 648.
Cervus leucura, Douglass.—Horn, adult, wood-cut, figg. 14, 15, 17, p. 651; fig. 18, p. 652. ? Young, fig. 16, p. 651.
Cervus mezeianus, Gmelin.—Feet, pl. xxiv, fig. 2.
Cervus macrotis, Say.—Feet, pl. xxiii, fig. 1. Horns, wood-cut, figg. 19, 20, p. 657.
Cervus columbianus, Rich.—Feet, pl. xxiii, fig. 2. Horns, wood-cut, figg. 21, 22, p. 660.

ANTILOPINAE.

- Antilocapra americana*, Ord.—Animal, pl. xvi. Various horns, pl. xxx. Muzzle and hoof, wood-cut, figg. 23-24, p. 668.
Capella rupicapra.—Horns, pl. xxv, figg. 1854 and 882.

OVINAE.

- Ovis montana*, Cuvier.—Muzzle and hoof, wood-cut, figg. 24, 25, p. 674. Horns, male and female, wood-cut, fig. 26-29, p. 675. Horns of male, figg. 30-32, p. 675.

BOVINAE.

- Ovibos moschatus*, Blainville.—Muzzle, wood-cut, fig. 33, p. 681.
Bos americanus, Gmelin.—Muzzle and hoof, wood-cut, figg. 34, 35, p. 683.

"ADVERTISEMENT.

"The present work is, in part, a reprint of the General Report on North American Birds presented to the Department of War, and published in October, 1858, as one of the series of 'Reports of Explorations and Surveys of a Railroad Route to the Pacific Ocean.' In this volume, however, will be found many important additions and corrections, including detailed lists of plates, both numerical and systematic, descriptions of newly-discovered species, &c., not in the original edition.

"The Atlas contains one hundred plates, representing one hundred and forty-eight new or unfigured species of North American birds. Of these plates about fifty appear for the first time, having been prepared expressly for this work. The remainder form the ornithological illustrations of the Reports of the Pacific Railroad Survey, and of the United States and Mexican Boundary Survey under Major Emory, and are distributed throughout the numerous volumes composing those series. All have, however, been carefully retouched and lettered for this edition, and quite a number redrawn entirely from better and more characteristic specimens. In fact, the plates of the Atlas have been prepared expressly for the present edition with the utmost care and attention.

"In the volume of text will be found a complete account of the birds of North America, brought down to the present time, including accurate descriptions of all known species; their arrangement in the genera and families recognized by modern zoologists; their geographical distribution; and, as far as possible, all other information necessary to a complete summary or manual of North American ornithology. No other work extant gives a complete ornithology of our country; and it has been the especial object of the authors and publishers to adapt it to the wants of the student and lover of nature, and to present in a condensed form, and at a price within the reach of all, a reliable text-book in this favorite department of natural history. Extended bibliographical notices, embracing full references to very nearly all authors on American ornithology, have been added, and will be found to be of high interest to the student and naturalist."

The only difference between this volume and Vol. IX of the Pacific R. R. Survey consists in the addition of preface and different lists of plates. The first few pages are arranged differently, as the following table will show:

	In this volume.	In Vol. IX, P. R. R. Surv.
Advertisement	p. i.....	absent.
Preface	iii.....	absent.
Explanation of the plates.....	vii.....	absent.
Systematic list of illustrations	xiii.....	absent.
Systematic list of higher groups	xvii.....	p. xvii.

The remaining pages appear to be precisely the same.

104.

1860. BAIRD, SPENCER F. The Birds | of | North America; | the descriptions of species based chiefly on the collections | in the | Museum of the Smithsonian Institution. | By | Spencer F. Baird, | Assistant Secretary of the Smithsonian Institution, | with the co-operation of | John Cassin | of the Academy of Natural Sciences of Philadelphia, | and George N. Lawrence, | of the Lyceum of Natural History of New York. | With an Atlas of One Hundred Plates. | Atlas. | — | Philadelphia: | J. B. Lippincott & Co. | 1860. | 4to. p. (2) i-xi (1), 100 plates.

"The present Atlas has been prepared for the two-fold purpose of completing the series of illustrations of the Birds of North America, and to give accurate and easily recognized figures of the numerous hitherto unknown birds described in the first volume. It contains figures of all birds inhabiting the United States which have not been given by former American authors, in connection with whose works it continues and concludes, as far as possible, to the present time the pictorial representation of all North American birds. In the accompanying volume of text will be found descriptions of all the known birds of the United States; their arrangement in the genera and families of modern zoologists; their geographical distribution; and, it is believed, everything necessary to a complete and thorough knowledge of this favorite department of the natural history of our country.

"In 1843 the distinguished ornithologist, Mr. Audubon, brought to a completion the second and last edition of his great work on the Birds of North America, in which are given faithful and accurate representations of nearly five hundred species. This elaborate work included all the birds known to that celebrated author as inhabiting the continent of America north of Mexico.

1860. BAIRD, SPENCER F.—Continued.

"In 1853 Mr. Cassin commenced the publication of a work entitled 'Illustrations of the Birds of California, Texas, Oregon, and British and Russian America: intended to contain descriptions and figures of all North American birds not given by former American authors, and a general synopsis of North American Ornithology.' Philadelphia: J. B. Lippincott & Co. The first series, containing plates of fifty species not given by Audubon, was completed in 1855, and has not been extended, having been superseded by the present work.

"Many of the birds of the United States, not included in the works of the preceding or other American authors, having been collected by the several parties for the Survey of a Railroad Route to the Pacific Ocean, and of the Boundary between the United States and Mexico, as mentioned in the preface to volume I of this work; they were figured in the reports of these expeditions published by Congress under the direction of the War and Interior Departments. All of these birds appear in the present volume, but, in almost every instance, redrawn from better and more characteristic specimens. Of the one hundred plates, however, of this volume, about one-half appear for the first time, having been prepared expressly for the present work. Many of the latter represent birds of Eastern North America.

"As already stated, the work of Mr. Audubon contains figures of somewhat less than five hundred species of North American birds; that of Mr. Cassin contains fifty species. In the present volume will be found one hundred and forty-eight species, nearly all of which are now represented for the first time in any work on American Ornithology. The three works together include illustrations of very nearly all the known birds of North America. A few species only are wanting, chiefly of Russian America and other remote localities, of which no specimens are preserved in American museums. All are carefully described, however, in the preceding volume."

EXPLANATION OF PLATES.

[NOTE.—Where not otherwise mentioned the specimens figured are to be considered as in the Museum of the Smithsonian Institution, and the numbers refer to the Smithsonian record of birds. The original of each figure is indicated as far as can now be ascertained. The numbers in parenthesis refer to the numbers of the plates in the Mexican Boundary series.]

[1864-66.] BAIRD, SPENCER F. Smithsonian Miscellaneous Collections. | — | Review | of | American Birds, in the Museum of the | Smithsonian Institution. | By | S. F. Baird. | — | Part I. North and Middle America. | — | [Medallion.] | Washington: | Smithsonian Institution. | [No date on title: June, 1864, to p. 33; July, 1864, to p. 81; Aug., 1864, to p. 129; Sept., 1864, to p. 145; Oct., 1864, to p. 161; Nov., 1864, to p. 177; Apr., 1865, to p. 241; May, 1865, to p. 321; May, 1866, to p. 417; June, 1866, to end.] 1 vol. 8vo. Originally issued in sheets as successively printed, at above dates. pp. iv, 450.

"The present work is intended as a catalogue of the birds of Northern and Middle America in the Museum of the Smithsonian Institution, with such critical notices of the same as appear to be called for, and a list of the specimens, or of such of them as best show the geographical distribution of the species. Species not in the Smithsonian collection, but which I have had the opportunity of personally examining and comparing, are also included. Species mentioned by authors, but which I have not seen, will be mentioned at the end of the genera or families to which they are supposed to belong."

1871. BAIRD, SPENCER F. Explorations of Professor Powell. <Ann. Rec., 1871-72, pp. 132, 133.

* Nearly all the articles on natural history included in the *Annual Record of Science and Industry* were published during 1871 either in *Harper's New Monthly Magazine* or in *Harper's Weekly, a Journal of Civilization*, and are entitled to individual record, but it is more convenient, both for compilation and reference, to mention them collectively under the title of the *Annual Record* for each year.

I have been somewhat perplexed to decide in what manner it is best to cite the articles contributed by Professor Baird to the scientific columns of *Harper's Monthly* and *Harper's Weekly* and subsequently each year collected together in the *Annual Record of Science and Industry*. Many of these are original contributions to knowledge, never elsewhere published. Others are critical reviews or notes upon the current literature of science. Others are abstracts of scientific papers, with the addition of explanatory or illustrative remarks. Others still are abstracts of papers, for the most part in the words of the authors of the papers or of some other reviewer. Those in the latter category are the most numerous, and these it has not been thought necessary to cite in this list. I have endeavored to refer to all those articles, however brief, which contain original matter or critical opinions. Where these are reviews or abstracts, this fact is indicated in the appended explanatory remark.

A strict adherence to the usage of bibliographers would necessitate references to the original places of publication. This would have made necessary a great amount of extra labor, which would hardly have been profitable, since close questions of priority of authorship are rarely, if ever, involved. I rest contented, therefore, with the citation of pages in the *Annual Record*, following the example of Mr. S. H. Seudder and other bibliographers in treating this as a scientific serial, to be regarded in the same light as the proceedings of a society. The headings are those used in the *Annual Record*, the originally published articles having been printed as paragraphs without titles. Persons who may need to use the original publication will find this list an aid.

I have been obliged to use my personal judgment in culling the articles. No rules could be applied.

CONTENTS.

REPORT OF THE COMMISSIONER.

Preliminary to the official inquiry on the part of the United States	p. vii
General considerations as to the value of fisheries to a nation	vii
Alleged decrease of fisheries on the south side of New England	vii
Official inquiries into the subject	vii
By Massachusetts	viii
By Rhode Island	viii
By Connecticut	ix
By the United States	xi
Passage of the bill directing an inquiry	xi
Selection of Wood's Hole, Massachusetts, as a base for the sea-coast operations.	xii
Concurrent action on the lakes	xii
Aid rendered by the departments of the government	xii
Character and progress of the investigation	xiii
Plan of research adopted	xiii
Systematic arrangement of subjects for investigation	xiii
In regard to the fishes themselves	xiii
In regard to their food	xiii
Physical condition of the waters	xiii
Locality selected as center of research	xiv
Associates in the inquiry	xv
Taking of testimony	xv
Collection of specimens	xv
For the National Museum	xv
For distribution to other establishments, as colleges, academies, museums, &c	xv
Facilities given to officers of colleges and museums for making collections.	xv
Photographic pictures of fishes, &c	xv
Scientific visitors to Wood's Hole during the season	xv
Objects secured of special interest	xvi
Conference with State commissioners in Boston	xvi
Corresponding researches of associates:	
By J. W. Milner, on the great lakes	xvii
By Dr. H. C. Yarrow, on the Carolina coast	xvii
Second visit to south coast of New England in 1872	xxxvi

1873. BAIRD, SPENCER F.—Continued.

General results of the investigation.....	p. xvii
Recapitulation of objects of the inquiry.....	xvii
Decrease of food-fishes.....	xviii
Substantiated by testimony.....	xviii
Established by the investigation.....	xviii
Supply of fish in the sea not inexhaustible.....	xix
Injurious effects of the decrease.....	xx
Causes of the decrease, alleged or actual.....	xx
1. Disappearance of the food of fishes.....	xxi
2. Change in the locality of the fishes themselves.....	xxi
3. Disease and atmospheric agencies.....	xxii
4. Ravages of predacious fishes.....	xxii
5. Human agencies.....	xxiii
Pollution of water.....	xxiii
Over-fishing.....	xxiv
By fixed apparatus.....	xxiv
Location of such apparatus in Massachusetts and Rhode Island.....	xxv
By nets and lines.....	xxxii
6. Combination of human and other agencies, especially blue-fish:	
Extent of agency of blue-fish.....	xxxii
Their diminution not desirable.....	xxxii
Their abundance dependent on that of other fish.....	xxxii
Measures suggested for relief.....	xxxiii
Regulation of use of fixed nets.....	xxxiii
Action by the States.....	xxxiv
Bill proposed for the purpose.....	xxxiv
Arguments in its favor.....	xxxiv
Absolute prohibition by the United States, the alternative of want of action by the States.....	xxxiv
Anticipation of improvement.....	xxxv
Result of inquiries in 1872.....	xxxvi
General summary of results.....	xxxviii
Conclusion.....	xl
I. Report of the Commissioner.....	vii
Table of contents.....	xliii
II. General plan of inquiries prosecuted.....	1
Memoranda of inquiries relative to the food-fishes of United States.....	1
Questions relative to the food-fishes of the United States.....	3
III. Testimony in regard to the present condition of the fisheries, taken in 1871, Newport, Rhode Island.....	7
Naushton Island, Massachusetts.....	32
Pasque Island, Massachusetts.....	34
Menemsha Bight, Martha's Vineyard.....	35
Edgartown, Martha's Vineyard.....	37
Nantucket, Massachusetts.....	41
Hyannis, Massachusetts.....	47
Wood's Hole, Massachusetts.....	53
Head of Buzzard's Bay.....	70
Cohasset Narrows.....	72
IV. Special argument in regard to regulating the sea-fisheries by law.....	72
Samuel Powell, delivered in the Rhode Island legislature (urging the ne- cessity of a scientific inquiry into the subject).....	73
J. M. K. Southwick, of Newport (against protective legislation).....	76
George H. Palmer, of New Bedford (in favor of protective legislation)....	88
V. Reports of State commissions in regard to regulating the sea-fisheries by law.....	104
Report of committee of Rhode Island legislature, made at Newport, June 15, 1870.....	104
Legislative enactment recommended.....	110
Extract from report for 1871 of Theodore Lyman, Massachusetts com- missioner of inland fisheries, on the possible exhaustion of sea- fisheries.....	112
Remarks of Mr. Atwood, of the cape district, before the Massachu- setts senate, in relation to the petition to prohibit net and seine fisheries.....	117

1873. BAIRD, SPENCER F.—Continued.

VI. Report of conference of the United States Commissioner with the commissioners of Rhode Island and Massachusetts, held October 5, 1871.	p. 125
VII. Draught of law proposed for the consideration of, and enactment by, the legislatures of Massachusetts, Rhode Island, and Connecticut.	132
A bill to regulate the use of stationary apparatus in the capture of fish...	132
VIII. Miscellaneous correspondence and communications on the subject of the sea-fisheries.	135
Letters.....	135
Copy of memorial of citizens of Hyannis, addressed to Congress, praying that laws may be passed prohibiting the use of fixed apparatus for capturing fish.....	137
IX. European authorities on the subject of regulating the fisheries by law....	139
On the fisheries of Naples, by Achille Coste.....	139
On the possibility of exhausting the sea-fisheries, by James G. Bertram	141
Extract from <i>London Field</i>	144
Extract from the report of the commissioners appointed to inquire into the sea-fisheries of the United Kingdom, presented to both houses of Parliament, by command of Her Majesty.....	145
X. Notices in regard to the abundance of fish on the New England coast in former times.....	149
XI. Statistics of fish and fisheries on the south shore of New England.....	173
Table I. Amount of fish taken at Meuemshaw Bight, Martha's Vineyard.	173
Table II. General return of the Waquoit weir for 1871.....	174
Table III. Return of dog-fish and blue-fish, at Waquoit weir, for seven years.....	175
Table IV. Consolidated returns of alewives, shad, menhaden, bass, blue-fish, and dog-fish, at Waquoit weir, for thirteen years.....	176
Table VI. Account of blue-fish caught with a line, by Josiah C. Pease, about Edgartown, Mass., 1865-71.....	177
Table VII. Account of fish landed, at Baxter's wharf, Hyannis, in 1870 and 1871.....	178
Table VIII. Account of Austin Taylor, Hyannis, for 1870-1871.....	178
Table IX. Account of Timothy Crooker, Hyannis, for 1867-1871.....	179
Table X. Account of J. G. Loring, Hyannis, 1867-71.....	179
Table XI. Shipment of fish by railroad from Hyannis, monthly, to New York, 1866-1871.....	179
Table XII. Statement of fish caught at Wood's Hole, Mass., in 1872.....	180
Table XIII. Catch of fish at West Falmouth Pound.....	181
Table XIV. Date of first appearance of fish at the pounds and weirs on the south side of New England.....	181
XII. Supplementary testimony and information relative to the condition of the fisheries on the south side of New England in 1872.....	182
Notes taken by the Commissioner.....	183
Newport, Rhode Island.....	183
Wood's Hole, Mass.....	183
New York.....	186
Report of Vinal N. Edwards.....	187
Nantucket.....	187
Edgartown.....	188
Hyannis.....	190
Martha's Vineyard.....	191
Lanherst Cove.....	191
Vineyard Haven.....	192
Additional notes taken by the Commissioner.....	193
XIII. Pleadings before the senate committee on fisheries of the Rhode Island legislature, at its January session of 1872.....	196
Arguments of J. Talbot Pitman in favor of a law prohibiting the use of traps and pounds in Rhode Island.....	196
Abstract of an address by Capt. Nathaniel E. Atwood, in opposition to legislation.....	223
XIV. Natural history of some of the more important food-fishes of the south shore of New England.....	228
I. The scup.....	228
II. The blue-fish.....	235

1873. BAIRD, SPENCER F.—Continued.

XV. Description of apparatus used in capturing fish on the sea coast and lakes of the United States.....	p. 253
Modes of capture.....	253
Projectiles, explosive and poison.....	223
Lines.....	254
Nets.....	255
Traps, weirs, pounds, and fykes.....	259
Location of traps, weirs, and pounds in the United States.....	273
XVI. List of patents granted by the United States to the end of 1872, for inventions relative to the capture, utilization, or cultivation of fish and marine animals.....	275
1. Hooks.....	275
2. Lines, grapples, traps, &c.....	276
3. Reels.....	276
4. Rods.....	276
5. Floats, sinkers, and swivels.....	277
6. Projectiles.....	277
7. Nets and pounds.....	278
8. Oyster culture and gathering.....	278
9. Preservation and utilization.....	279
10. Fish culture.....	279
11. Patents granted prior to 1836.....	279
XVII. List of the seaweeds or marine algæ of the south coast of New England, by W. G. Farlow, M. D.....	281
XVIII. Report upon the invertebrate animals of Vineyard Sound, and the adjacent waters, with an account of the physical characters of the region, by A. E. Verrill. (For a more detailed account of this article, see page 759).....	295
A. Habits and distribution of the invertebrate animals.....	295
I. General remarks.....	295
II. Fauna of the bays and sounds.....	300
1. The rocky shores.....	303
List of species.....	331
2. The sandy shores.....	334
List of species.....	364
3. The muddy shores.....	366
List of species.....	377
4. The piles and timbers of wharves and bridges, bottoms of vessels, buoys, and other submerged wood-work.....	378
List of species.....	392
5. The rocky bottoms.....	394
List of species.....	409
6. The gravelly-shelly bottoms.....	412
List of species.....	421
7. The sandy bottoms.....	425
List of species.....	429
8. The muddy bottom.....	430
List of species.....	434
9. The free swimming and surface animals.....	436
List of species.....	451
10. Animals, parasitic, on fishes, &c.....	455
List of species.....	459
III. Fauna of the estuaries, harbors, ponds, and marshes.....	460
1. The sandy shores and bottoms of brackish waters.....	462
List of species.....	464
2. The muddy shores and bottoms of brackish waters.....	465
List of species.....	470
3. The oyster-beds in brackish waters.....	472
List of species.....	476
4. The eel-grass in brackish waters.....	478
List of species.....	480
5. The piles of wharves, bridges, floating timber, rocks, &c., in brackish waters.....	481
List of species.....	482

1873. BAIRD, SPENCER F.—Continued.

IV. Fauna of the ocean shores and outer colder waters.....	p. 484
1. The rocky shores off the open coast	485
List of species	490
2. The sandy shores off the open coast	489
List of species	490
3. The rocky bottoms off the open coast	491
List of species	498
4. The sandy and gravelly bottoms off the open coast.....	500
List of species	504
5. The muddy bottoms off the open coast	506
List of species	511
B. List of species found in the stomach of fishes—food of fishes	514
C. The metamorphoses of the lobster and other crustacea, by S. I. Smith.	522
D. Catalogue of the marine invertebrate animals of the southern coast of New England, and adjacent waters, by A. E. Verrill, S. I. Smith, and Oscar Harger	537
Articulata	539
Insects	539
Arachnida	544
Pycnogonida	544
Crustacea	545
Annelida.....	580
Scolecida.....	627
Turbellaria	627
Mollusca	634
Cephalopoda	634
Gastropoda.....	636
Lamellibranchiata	669
Tunicata	698
Bryozoa.....	707
Radiata	715
Echinodermata	715
Acalephæ	722
Polypi or Anthozoa	737
Protozoa	740
Spongiæ.....	740
Addenda	475
Errata	749
Table of contents.....	751
E. Alphabetical index to report of A. E. Verrill	455
XIX. Catalogue of the fishes of the east coast of North America, by Theodore N. Gill	779
XX. List of fishes collected at Wood's Hole, in 1871, between June 20 and Octo- ber 4, by S. F. Baird	823
XXI. Table of temperatures taken in Wood's Hole harbor, from January 1, 1873, to December 31, 1873	828
XXII. List of illustrations	833
XXIII. Alphabetical index.....	835

423.

1873. [BAIRD, SPENCER F.] Memoranda of inquiry relative to the Food-Fishes of the United States. < *Rep. U. S. Comm. Fish and Fisheries*, part i, 1873, pp. 1-3.

A general plan of investigation, "for the purpose of securing greater precision in the inquiries prosecuted in reference to the natural history of the fishes and the influences exerted upon their multiplication." Prepared with the assistance of Prof. Gill.

Also issued separately. See above. No. 216.

424.

1873. [BAIRD, SPENCER F.] Questions relative to the Food-Fishes of the United States. < *Rep. U. S. Comm. Fish and Fisheries*, part i, 1873, pp. 3-6.

A schedule of 88 questions, embodying the points of investigation included in the plan of the memoranda of inquiry.

Also issued separately in advance. See above. No. 217.

425.

1873. [BAIRD, SPENCER F.] Testimony in regard to the present condition of the Fisheries, taken in 1871. < *Rep. U. S. Comm. Fish and Fisheries*, part i, 1873, pp. 7-72.

Testimony of the fishermen of Southern New England, gathered by Prof. Baird, with the aid of Mr. H. E. Rockwell, phonographic reporter, in August and September, 1871.

426.

1873. [BAIRD, SPENCER F.] Report of conference held [by the U. S. Commissioner of Fish and Fisheries] at Boston, October 5, 1871, with the Fishery Commissioners of Massachusetts and Rhode Island. < *Rep. U. S. Comm. Fish and Fisheries*, 1873, part i, pp. 125-131.

427.

1873. [BAIRD, SPENCER F.] Draught of law proposed for the consideration of and enactment by the Legislatures of Massachusetts, Rhode Island, and Connecticut. < *Rep. U. S. Comm. Fish and Fisheries*, part i, 1873, pp. 132-134.

"The draught, as originally prepared, was first discussed at the conference with the commissioners of Massachusetts and Rhode Island and then submitted to several eminent legal gentlemen for consideration: among others to Mr. Henry Williams and Mr. George H. Palmer, of Boston, from whom criticisms were received." See No. 416.

428.

1873. [BAIRD, SPENCER F.] Notices in regard to the Abundance of Fish on the New England Coast in former times. < *Rep. U. S. Comm. Fish and Fisheries*, part i, 1873, pp. 148-172.

A collection of extracts from early colonial accounts of the abundance of fishes.

429.

1873. [BAIRD, SPENCER F.] Statistics of Fish and Fisheries on the South Shore of New England. < *Rep. U. S. Comm. Fish and Fisheries*, part i, 1873, pp. 172-181.

430.

1873. [BAIRD, SPENCER F.] Supplementary Testimony and Information relative to the Condition of the Fisheries of the South Side of New England, taken in 1872. < *Rep. U. S. Comm. Fish and Fisheries*, part i, 1873, pp. 182-195.

Memoranda obtained at Wood's Hole, Newport, Hyannis, Nantucket, and Martha's Vineyard by the Commissioner and Mr. Vinal N. Edwards.

431.

1873. [BAIRD, SPENCER F.] Natural History of some of the more important Food-fishes of the South Shore of New England.—I. The Scup, *Stenotomus argyrops*, (Linn.,) Gill. < *Rep. U. S. Com. Fish and Fisheries*, part i, 1873, pp. 228-235.

432.

1873. [BAIRD, SPENCER F.] [Natural History of some of the more important Food-fishes of the South Shore of New England.]—II. The Blue-Fish, *Pomatomus saltatrix*, (Linn.,) Gill. < *Rep. U. S. Comm. Fish and Fisheries*, part i, 1873, pp. 235-252.

433.

1873. [BAIRD, SPENCER F.] Description of Apparatus used in capturing Fish on the Sea-coast and Lakes of the United States. < *Rep. U. S. Comm. Fish and Fisheries*, part i, 1873, pp. 253-274.

434.

1873. [BAIRD, SPENCER F.] List of Patents granted by the United States to the end of 1872, for inventions connected with the Capture, Utilization or Cultivation of Fishes and Marine Invertebrates. < *Rep. U. S. Comm. Fish and Fisheries*, part i, 1873, pp. 275-280.

435.

1873. BAIRD, SPENCER F. List of Fishes collected at Wood's Hole. < *Rep. U. S. Comm. Fish and Fisheries*, part i, 1873, pp. 823-827.

A name-list of 121 species collected by the U. S. Commission in 1871, with the exception of a few taken there the following year by Vinal N. Edwards and of *Lactophrys trigonus* and *Hippocampus Hudsonius*, given by Dr. Storer as taken at Vineyard Haven.

436.

1873. BAIRD, SPENCER F. Salmon in the Hudson. < *Forest and Stream*, i, 1873, p. 233. Stocking the Hudson with salmon by the U. S. Fish Commission.

437.

1873. BAIRD, SPENCER F. Planting California Salmon at Fort Edward. < *Forest and Stream*, i, 1873, p. 298. Letter to editor.

438.

1873. [BAIRD, SPENCER F.] The New England Fisheries. < *American Sportsman*, iii, 1873, p. 23.

Quotations in editions of *Scientific Miscellany* from letter to Massachusetts commissioners.

439.

1873. BAIRD, SPENCER F. Signal Telegraphy and the Herring-Fishery. < *Ann. Rec.*, 1873-75, p. 73.*

Establishment of a signal station at Eastport, Me.

440.

1873. BAIRD, SPENCER F. Third and Fourth Annual Report of the Geological Survey of Indiana for 1871, 1872. < *Ann. Rec.*, 1873-75, p. 202.

441.

1873. BAIRD, SPENCER F. Report for 1872 on the Geology of New Jersey. < *Ann. Rec.*, 1873-75, p. 203.

442.

1873. BAIRD, SPENCER F. Geological Survey of Canada for 1871-72. < *Ann. Rec.*, 1873-75, p. 202.

443.

1873. BAIRD, SPENCER F. Fourth Annual Report of Mining Statistics for 1872. < *Ann. Rec.*, 1873-75, p. 203.

Report of R. W. Raymond.

444.

1873. BAIRD, SPENCER F. Geological Survey of Ohio. < *Ann. Rec.*, 1873-75, p. 204.

445.

1873. BAIRD, SPENCER F. Final Report of the Geological Survey of Ohio. < *Ann. Rec.*, 1873-75, p. 205.

* For full title of the volume of the Annual Record for 1873, see under 1875.

446.

1873. BAIRD, SPENCER F. Lesquereux on the Fossil Plants of the Northern Hemisphere. < *Ann. Rec.*, 1873-75, p. 210.

447.

1873. BAIRD, SPENCER F. Explorations in the Gulf of St. Lawrence in 1872. < *Ann. Rec.*, 1873-75, p. 216.
Explorations of J. F. Whiteaves.

448.

1873. BAIRD, SPENCER F. Fauna of the St. George's Bank and adjacent waters. < *Ann. Rec.*, 1873-75, p. 218.
Verrill on the discoveries of the steamer "Bache."

CONTENTS.

REPORT OF THE COMMISSIONER.

A. Inquiry into the decrease of the food-fishes.

1. <i>Preliminary steps</i>	p. 1
Passage of law and appointment of Commissioner	i
2. <i>Investigations of 1871</i>	i
Researches at Wood's Hole, Mass.	ii
Publications of report	ii
3. <i>Investigations of 1872</i>	ii
Researches at Eastport, Me.	iii
Information from individuals	iii
Assistance from Dominion authorities	iii
Associates in the inquiry	iii
List of visitors at Eastport station	iv
Assistance rendered by the government	v
United States Revenue Marine	v
United States Coast Survey	vii
United States Signal Service	x
Visit to the British provinces	vi
Ocean temperatures and the herring fisheries	vi
Exploration of the Bache on George's Banks	vii
4. <i>Corresponding researches of other nations</i>	viii
German explorations of the North Sea	viii
Herring fisheries of Scotland	vi
5. <i>Concurrent action of the United States Signal Service</i>	x
In taking temperature of water	x
Signal station at Eastport, Me	xi
6. <i>Decrease of the cod-fisheries of the New England coast</i>	xi
Concurrent with the erection of river-dams	xi
Due to consequent diminution of anadromous fish	xi
Erection of fishways necessary to their restoration	xiv
Comparative influence on the cod-fisheries of different shore-fish	xii
Of alewives, shad, salmon	xii
Of sea-herring	xiii
7. <i>Investigation in 1871 and 1872 on the Great Lakes</i>	xiv
Report by Mr. J. W. Milner on whitefish, lake trout, &c.	xv
<i>B. Action in regard to propagation of food-fishes.</i>	
8. <i>Introductory measures</i>	xvi
Action of American Fish-Culturists' Association	xvi
Consultation meeting in Boston in June	xvii
9. <i>Propagation of shad in 1872</i>	xvii
Their transfer by Seth Green to the Alleghany and Mississippi	xvii
Their transfer by William Clift to the Platte, &c.	xvii
Assistance rendered by express companies	xvii
By State commissioners	xviii
Concurrent action of State fish commissioners	xviii
10. <i>Propagation of Maine salmon in 1872</i>	xviii
Mr. Atkins's salmon-breeding establishment at Bucksport, Me	xviii
Combination with State commissioners	xix
11. <i>Propagation of the Rhine salmon in 1872</i>	xix
Impossibility of obtaining a full supply of eggs in America	xix
Correspondence with Deutsche Fischerei-Verein	xix
Donation of 250,000 eggs by the German Government	xx
Purchase of 500,000 eggs in Freiburg	xxi
Transfer of eggs from Germany	xxi

1874. BAIRD, SPENCER F.—Continued.

Supervision of Mr. Hessel	p. xxi
Aid of steamship company	xxii
Custom-house facilities	xxii
Delivery at Bloomsbury	xxii
Final result of experiment	xxii
Total cost of experiment	xxiii
12. <i>Propagation of the California salmon in 1872</i>	xxiii
Action taken at the Boston conference	xxiii
Appointment of Livingston Stone	xxiii
Selection of station on the McCloud River	xxiv
Result of the experiment	xxiv
Number of eggs taken	xxiv
Shipment to Bloomsbury, N. J.	xxiv
Hatching and disposition of the eggs	xxv
Introduction of young fish into the Susquehanna	xxv
Date and plan of operation proposed for 1873	xxv
Comparative value of the California salmon	xxvi
13. <i>Propagation of whitefish in 1872</i>	xxv
Services of Mr. N. W. Clark, Clarkston, Mich	xxv
Transfer of eggs to California commissioners	xxv
14. <i>Propagation of shad in 1873</i>	xxvi
Recapitulation of work done in 1872	xxvii
Preliminary search for hatching-stations by Dr. Yarrow	xxvii
Serious scarcity of spawning-fish in South Atlantic waters	xxvii
Employment of Seth Green and his assistants	xxvii
Savannah station	xxvii
New Berne and Weldon stations	xxvii
Hatching of striped bass	xxvii
Potomac River station	xxviii
Susquehanna River station	xxviii
Delaware River station	xxviii
State stations on the Hudson and Connecticut	xxviii
Transfer of young shad under the direction of Mr. Milner:	
To West Virginia	xxviii
To other Western States	xxviii
To Eastern States	xxviii
Transfer of young shad under the direction of Dr. Slack to Western Pennsylvania	xxviii
Transfer of young shad under the direction of Mr. Stone	xxviii
To Jordan River	xxix
To the Sacramento	xxix
To California. aquarium car	xxviii
Assistance rendered—	
By the State fish commissioners	xxx
By the State of Virginia	xxxi
By railroads and express companies	xxx
15. <i>General history of fish culture</i>	xxxi
Preservation of fish in ponds	xxxi
Introduction of methods of artificial propagation	xxxi
In Europe	xxxi
Claim of priority for Chinese unfounded	xxxiii
In the United States	xxxiv
16. <i>Action of State and National Government</i>	xxxiv
Services of American Fish-Culturists' Association	xxxiv
Congressional action	xxxiv
State commissioners	xxxv
Why national action required	xxxv
17. <i>Comparative value of different groups of food-fishes.</i>	xxxv
Of resident species	xxxv
Limitation by necessity of feeding	xxxvi
Black bass	xxxvi
Of anadromous, or migratory species	xxxvii
No feeding required	xxxix
Shad, herring, or alewives and salmon	xxxix
Of catadromous species	xxxix
The eel	xxxix

1874. BAIRD, SPENCER F.—Continued.

18. <i>Different methods of multiplying fish</i>	p. xi
Transfer of living fish from one locality to another	xi
Confining fishes in particular localities for natural spawning	xli
Collecting eggs and embryos naturally spawned	xli
Artificial impregnation and hatching of eggs	xlii
Different methods of securing the parents	xlii
Catching while on spawning-beds	xlii
Penning-up on spawning-beds (Wilnot's method)	xliii
Transferring to temporary inclosures (Atkins's method)	xliii
Impregnation of the eggs	xlii
Hatching out of the young fish	xliii
Disposal of the young fish in stocking waters	xliv
Anadromous fish always return to place of birth or deposit	xliv
Influence of obstructions	xliv
19. <i>Treatment of certain species</i>	xl v
Hatching of shad	xl v
Hatching-boxes	xl v
Hatching of white-fish, trout, salmon, &c.	xlvi
Holton's tray	xl vii
Hatching of striped bass	xl vii
20. <i>Fishes specially worthy of mention</i>	xl viii
1. <i>The shad</i>	xl viii
Distribution	xl viii
Migration and movements	li
Early abundance	li
Subsequent decrease	li
Influence of dams, gratings, &c	li
Dr. Yarrow's report	lii
Artificial increase	lii
Labors of Dr. Daniel in 1848 (transfer of eggs to the Alabama River)	lii
Labors of Mr. Gesner and others in 1858 (transfer of eggs and young to the Alabama River)	lii
Work of Seth Green in 1867	liii
Action of the New England and other States	liii
Action on the part of the United States Government	liv
Suggested by the American Fish-Culturists' Association	liv
Intended to supplement the action of other States	liv
Possibility of stocking the Mississippi system of waters with shad	liv
Their occurrence there at present	lv
Possibility of traversing the whole length of this river	lv
Illustrated by shad in the Yang-tse-kiang, in China	lv
Also by the shad of India	lv
No dams or obstructions	lvii
Suitable winter-quarters in the Gulf of Mexico	lvii
Shad in the great lakes	lviii
Shad in Salt Lake	lviii
Shad in Pacific waters	lviii
General result of the experiment on the Atlantic coast	lix
2. <i>The alewife or fresh-water herring</i>	lix
Economic value	lix
As food for man	lix
As food for other fish	lx
Attracting the cod to our shores	lx
Methods of multiplying	lxi
Period of maturity	lxi
3. <i>The salmon of New England</i>	lxi
Identical with that of Western Europe	lxi
General natural history	lxii
Distribution in America	lxii
Efforts for its increase in Europe	lxiii
Efforts for its increase in Tasmania	lxiii
Action by the several States in this country	lxv
Initiated by New Hampshire in 1866	lxv
Labors of Livingston Stone and others	lxv

1874. BAIRD, SPENCER F.—Continued.

Labors of C. G. Atkins	p. lxxi
Action of the general government	lxxvi
Obstructions to upward movement of salmon and shad	lxxvii
Coast of Maine	lxxvii
Lake Champlain	lxxvii
James River, Va	lxxvii
4. <i>The Western salmon</i>	lxxix
Variety of species on the Pacific coast	lxxix

REPORT OF THE COMMISSIONER. (Table of contents precedes report.)

APPENDIX A.—The fishes of the great lakes, and the species of <i>Coregonus</i> or white-fish	ciii
I. Report on the fisheries of the great lakes; the result of inquiries prosecuted in 1871 and 1872. By James W. Milner. (Table of contents on p. 77)	1
II. Miscellaneous notes and correspondence relative to the whitefish	79
A. The whitefish of the great lakes	79
1. Lake Superior	79
2. Lakes Erie and Ontario	80
B. The whitefish of Eastern Maine and New Brunswick. By Charles Lanman	84
C. Description of new species of <i>Coregonus</i> and <i>Argyrosomus</i> . By James W. Milner	86
1. <i>Argyrosomus Hoyi</i> Gill. Cisco of Lake Michigan	86
2. <i>Argyrosomus nigripinnis</i> Gill. Blackfin	87
<i>Coregonus Couesii</i>	88

1874. BAIRD, SPENCER F.—Continued.

APPENDIX B.—The salmon and the trout (species of *Salmo*).

III. On the North American species of salmon and trout. By George Suckley, surgeon, United States Army. (Written in 1861).

	p. 91
Introductory note.....	91
Tabulated list of species.....	92
1. <i>Salmo Scouleri</i> Rich.; hook-nosed salmon.....	94
2. <i>Salmo proteus</i> Pallas; hump-backed salmon.....	97
3. <i>Salmo Cooperi</i> Suckley; Cooper's salmon.....	99
4. <i>Salmo dermatinus</i> Rich.....	100
5. <i>Salmo consuetus</i> Rich.....	101
6. <i>Salmo canis</i> Suckley.....	101
7. <i>Salmo salar</i> Linn.; common salmon.....	104
8. <i>Salmo quinnat</i> Rich.; Quinnat or Sacramento salmon.....	105
9. <i>Salmo confluentus</i> Suckley; Towalt salmon.....	109
10. <i>Salmo aurora</i>	110
11. <i>Salmo argyreus</i>	110
12. <i>Salmo paucidens</i> Rich.; weak-toothed salmon.....	111
13. <i>Salmo tsuppitch</i> Rich.; white salmon.....	111
14. <i>Salmo Clarkii</i> Rich.; Clark's salmon.....	112
15. <i>Salmo immaculatus</i> Storer; the unspotted salmon.....	113
16. <i>Salmo Gairdneri</i> Rich.; Gairdner's salmon.....	114
17. <i>Salmo truncatus</i> Suckley; square-tailed salmon.....	115
18. <i>Salmo Richardi</i> Suckley; suk-kegh.....	117
19. <i>Salmo Campbelli</i> Suckley; Pacific red-spotted salmon trout..	118
20. <i>Salmo hudsonicus</i> Suckley; Hudson's Bay trout.....	119
21. <i>Salmo Kossii</i> Rich.; Ross's arctic salmon.....	120
22. <i>Salmo Hearnii</i> Rich.; Coppermine River salmon.....	121
23. <i>Salmo alipes</i> Rich.; long-finned char.....	121
24. <i>Salmo nitidus</i> Rich.; the angmalook.....	122
25. <i>Salmo fontinalis</i> Mitch.; brook-trout of the Atlantic coast...	123
26. <i>Salmo iridea</i> Gibbons; Pacific brook-trout.....	129
27. <i>Salmo Masoni</i> Suckley; Mason's trout.....	134
28. <i>Salmo virginialis</i> Gir.; Utah.....	135
29. <i>Salmo Lewisii</i> Gir.; Lewis's trout.....	139
30. <i>Salmo brevicauda</i> Suckley; short-tailed trout.....	140
31. <i>Salmo Gibbsii</i> Suckley; Columbia salmon trout.....	141
32. <i>Salmo sebago</i> Gir.; the sebago trout.....	143
33. <i>Salmo Kennerlyi</i> Suckley; Kennerly's trout.....	145
34. <i>Salmo Warreni</i> Suckley; Warren's trout.....	147
35. <i>Salmo Bairdii</i> ; Baird's river-trout.....	148
36. <i>Salmo Parkei</i> Suckley; Parke's river-trout.....	149
37. <i>Salmo oquassa</i> Gir.; blue-backed trout.....	150
38. <i>Salmo namaycush</i> Pennant; Mackinaw or salmon trout.....	151
39. <i>Salmo confinis</i> DeKay; lake trout.....	153
40. <i>Salmo siscowet</i> Agass.; the siscowet.....	156
41. <i>Salmo symmetrica</i> Prescott; Winnipiseogee trout.....	157
42. <i>Salmo Hoodii</i> Rich.; Hood's salmon.....	159
43. <i>Salmo Newberryi</i> Gir.....	159
IV. The salmon of the Danube, or the <i>hucbo</i> (<i>Salmo hucbo</i>), and its introduction into American waters. By Rudolph Hessel.....	161
V. Improvement in the salmon-fisheries of Sweden. (Extract from the report of the Royal Swedish Intendant of Fisheries, 1868).....	160
VI. Report of operations during 1872, at the United States hatching establishment on the McCloud River, and on the California <i>Salmonidæ</i> generally, with a list of specimens collected. By Livingston Stone.....	168
A. Introductory remarks:	
1. The salmon-hatching establishment on the McCloud River...	168
2. The location of the salmon-breeding station on the McCloud River.....	170
3. Changes proposed for another season.....	170
4. Why more salmon-eggs were not obtained in 1872.....	171
5. Conditions of hatching salmon in California, compared with similar operations at the East.....	171

1874. BAIRD, SPENCER F.—Continued.

6. Catching the salmon on the McCloud	p. 171
7. Taking the eggs	172
8. The eggs of the Sacramento River salmon	173
9. The hatching apparatus	173
10. Packing and shipping the eggs	174
B. The <i>Salmonidæ</i> of the Sacramento River	175
11. The Sacramento River	175
12. The McCloud River	176
13. The McCloud River Indians	177
14. The climate of the McCloud River	179
15. The Sacramento salmon in general	179
16. General movements of the Sacramento salmon in the lower parts of the river	180
17. General movements, &c., of the Sacramento in the McCloud River	181
18. Condition of the salmon during their stay in the McCloud River	182
Table showing the movements, conditions, &c., of the Sacramento salmon in the McCloud River in each month of the year	183
19. Answers to queries concerning the Sacramento salmon given in the order of Professor Baird's printed list of questions entitled "Questions relative to the food-fishes of the United States"	184
A. Name	184
B. Distribution	184
C. Abundance	185
D. Size	185
E. Migration and movements	186
F. Relationship	189
G. Food	190
H. Reproduction	190
I. Artificial culture	193
K. Protection	193
L. Diseases	194
M. Parasites	194
N. Capture	194
O. Economical value and application	195
20. Other <i>Salmonidæ</i> of the Sacramento River	197
21. Other <i>Salmonidæ</i> of the McCloud River	197
22. List of Indian words of the McCloud dialect	197
C. Catalogue of natural-history specimens, collected on the Pacific Slope in 1872, by Livingston Stone, for the United States Fish Commission	200
VII. Notes on the salmon of the Miramichi River, by Livingston Stone ..	216
Fragmentary notes	217
VIII. The <i>Salmonidæ</i> of Eastern Maine, New Brunswick, and Nova Scotia. By Charles Lauman	219
1. The brook trout (<i>Salmo fontinalis</i>)	219
2. The great gray trout or togue (<i>Salmo toma</i>)	220
3. The white-sea trout (<i>Salmo immaculatus</i>)	221
4. The salmon (<i>Salmo salar</i>)	223
5. The American smelt (<i>Osmerus mordax</i>)	224
6. The capelin (<i>Mallotus villosus</i>)	225
IX. On the salmon of Eastern North America, and its artificial culture. By Charles G. Atkins. (Table of contents on p. 336)	226
X. On the salmon of Maine. By A. C. Hamlin	338
1. The land-locked salmon	338
2. The togue	354
XI. The lake trouts. By A. Leith Adams, M. A., &c	359
XII. On the speckled trout of Utah Lake. By Dr. H. C. Yarrow, U. S. A., Surgeon and Naturalist, &c	363
XIII. Miscellaneous notes and correspondence relative to salmon and trout. A. On the salmon in Maine. By Thomas Lincoln	369

1874. BAIRD, SPENCER F.—Continued.

B. On the stomachs of salmon and their contents	p. 371
1. On the cæcal appendages of the stomach. By James K. Thatcher	371
2. On the contents of the stomach. By S. I. Smith	371
C. On the silver-trout of Monadnock Lake. By Thomas E. Hatch, M. D.	372
D. On the edible qualities of the Sacramento salmon. By R. S. Throckmorton	373
E. On the salmon fisheries of the Sacramento River. By Livingston Stone	374
1. Drift-net fishing	374
2. Fyke-net fishing	378
3. Sweep-seine fishing	378
XIV. Additional reports relative to the hatching and planting of the Penobscot salmon	380
A. New Hampshire	
B. New Jersey	
C. Pennsylvania	
E. Wisconsin	
APPENDIX C.—The shad and alewife (species of Clupeidæ)	385
XV. Letters referring to experiments of W. C. Daniell, M. D., in introducing shad into the Alabama River	387
XVI. Letters referring to the presence of shad in the rivers tributary to the Gulf of Mexico	391
XVII. Report of a reconnaissance of the shad-rivers south of the Potomac. By H. C. Yarrow, M. D.	396
1. Introductory remarks	396
2. Great decrease of fish in Georgia	396
3. Decrease in North Carolina	398
4. Contrivances that capture all the fish	401
XVIII. Report on shad-hatching operations	403
A. Operations in 1872	403
B. Operations in 1873	406
1. The Savannah, Neuse, and Roanoke Rivers	406
2. The Delaware River. By J. H. Slack, M. D.	409
3. Report on the the transfer of shad from the Hudson to the Sacramento River. By Livingston Stone	413
4. On shad-hatching operations by the commissioners of the State of Maine. By E. M. Stillwell	417
XIX. Report on the propagation of the shad (<i>Alosa sapidissima</i>), and its introduction into new waters by the United States Commissioner in 1873. By James W. Milner	419
1. Shad-hatching an important discovery	419
2. Plan of operations	419
3. Operations on the Savannah, Neuse, and Roanoke Rivers	419
4. Operations on the Potomac	420
Table—Shad-hatching on the Potomac River, Jackson City, Va., opposite Washington, D. C., in the year 1873	425
5. Methods employed in shad-hatching	425
6. Relation of the temperature of the water to the propagation of shad	428
7. The ovaries and ova of the shad	430
8. The male fish.	431
9. The impregnation of shad eggs	432
10. The Susquehanna, Delaware, and Hudson Rivers	433
11. Journal of a trip with shad and eels to Calumet River, Illinois ..	434
12. Shipment of shad and eels to the Fox River, Wisconsin	437
13. Shipment of shad to Ashtabula River, Ohio	437
14. Shipment of shad to the Wabash River, Indiana	438
15. Shipment of shad to the waters of Lake Champlain, Vermont ..	439
16. Shipment of shad to the Housatonic River, Connecticut	439
17. Shipment of shad to the Penobscot River, Maine	440
18. Establishment of station on the Androscoggin River, Maine ..	440
19. Second shipment of shad to the waters of Lake Champlain, Vermont	441

1874. BAIRD, SPENCER F.—Continued.

20. Shipment of shad to the Detroit and Grand Rivers, Michigan.	p. 441
Table of distribution of shad and eels	442
21. Mode of estimating number of eggs and fish	442
22. The care of the young shad during transportation	443
a. The apparatus	443
b. The care of the fish	444
c. Water adapted to young fish	445
d. Temperature of the water in the cans	447
e. Transferring the shad from the cans to the river	447
f. Facilities required from the railroads	448
23. Possibility of stocking the great lakes with shad	449
24. Popularity of the work of the Commission	450
XX. Notes on the natural history of the shad and alewife	452
A. Notes on the shad as observed in Beaufort Harbor, N. C., and vicinity. By H. C. Yarrow, M. D.	452
B. Notes on the shad as observed in the Delaware River. By J. H. Slack, M. D.	457
1. The importance of shad as a food-fish	457
2. The decrease in the Delaware	457
3. The causes of decrease	457
a. Erection of dams	458
b. Destruction of fry	458
c. Destruction of seed-fishes	459
d. Destruction of impregnated ova	459
4. Habits of shad in the spawning season	459
C. The shad and gaspereau, or alewife, of New Brunswick and Nova Scotia. By Charles Lanman	461
1. The shad	461
2. The gaspereau, or alewife	462
APPENDIX D.—Fish-culture (the history, theory, and practice of fish-culture)	463
XXI. The history of fish-culture	465
A. The history of fish-culture in Europe, from its earliest record to 1854. By Jules Halme	461
B. Report on the progress of pisciculture in Russia. By Theodore Soudakevitz	493
1. The decrease of food-fishes	493
2. Pisciculture	495
3. Selection of male and female fish	497
4. The fecundation of spawn	498
5. The incubation of spawn	499
6. Development of the embryo and the hatching of fish	501
7. Transportation of spawn	508
8. Piscicultural establishment at Nikolsky	504
9. Piscicultural establishment at Suwalki	511
10. Pisciculture at Finland	512
C. Report on the state of pisciculture in France and the neighboring countries. By M. Bouchon-Brandley, assistant secretary of the College of France	513
1. Introductory remarks	513
2. Switzerland	514
3. Italy	518
4. Austria	518
5. Munich	520
6. The great basins of France	522
D. The progress of fish-culture in the United States. By James W. Milner	523
1. The methods employed in fish-culture	523
2. Transfer of living fishes	524
The pike or pickerel	524
The muskellunge	525
The black bass and Oswego bass	526
The wall-eyed or glass-eyed pike	526
The eel	527
The alewife	527
The smelt	527

1874. BAIRD, SPENCER F.—Continued.

	The white-fish	p. 527
	The salmon or lake trout	528
	The brook-trout	528
3.	The transfer of naturally-deposited eggs	528
	Spawning-races	528
4.	Artificial fecundation	530
	Introductory remarks	530
	The brook-trout	535
	The salmon	538
	The shad	543
	The white-fish	545
	The Otsego bass	552
	The salmon-trout	552
	The striped bass	553
	List of species in North America and Europe which have been hatched artificially	554
	List of hybrids in Europe and America which have been hatched	555
	Advances in fish-culture of American origin	555
	Systematic records of observation required for rapid advance- ment in the art	558
E.	Alphabetical list of American fish-culturists and of persons known as being interested in fish-culture	558
	1. Names of persons who are or have been practically engaged in fish-culture	558
	2. List of persons interested in the subject	561
XXII.	Papers relating to practical fish-culture	567
	A. Method of treating adhesive eggs of certain fishes, especially of Cyprinidae, in artificial propagation. By Rudolph Hessel	567
	B. On the so-called "dry" method of impregnating spawn. By Alexander Stenzel, inspector of fisheries in Silesia, Ger- many	571
	C. Fish-culture in salt or brackish waters. By Theodore Lyman, fish commissioner of Massachusetts	575
	D. Descriptions of improved apparatus in fish-hatching	578
	1. Shad-hatching or floating boxes	578
	Seth Green's box	578
	Brackett's box	579
	Stillwell & Atkins's box	579
	2. Tray apparatus for hatching	580
	Haton's tray hatching apparatus	580
	Clark's tray hatching apparatus	582
	Williamson's hatching box	585
	3. The brook shanty	586
	E. Frog-culture. By Seth Green	587
	1. How to get the spawn	587
	2. How to take care of them	587
APPENDIX E.	Obstructions to the upward movement of fishes in streams and the remedy	589
XXIII.	On fish-ways. By Charles G. Atkins	591
	A. Introductory remarks	591
	B. Habits of migratory fishes	591
	C. The construction and location of fish-ways	594
	1. Situation	594
	2. Attractiveness	596
	3. Ease of ascent	601

* For the full title of the *Annual Record* for 1874, see 1875.

633.

1874. BAIRD, SPENCER F. Explorations of W. M. Gabb in Costa Rica. < *Ann. Rec.*, 1874-75, p. 246.

634.

1874. BAIRD, SPENCER F. Professor Orton's Explorations. < *Ann. Rec.*, 1874-75, p. 248.

635.

1874. BAIRD, SPENCER F. Horetzky on the Hudson's Bay Territory. < *Ann. Rec.*, 1874-75, p. 256.

636.

1874. BAIRD, SPENCER F. Professor Stoddard's Expedition to Colorado. < *Ann. Rec.*, 1874-75, p. 257.

637.

1874. BAIRD, SPENCER F. Explorations of Professor Powell in 1874. < *Ann. Rec.*, 1874-75, p. 262.

638.

1874. BAIRD, SPENCER F. Explorations in 1874 of Lieutenant G. M. Wheeler, United States Engineers. < *Ann. Rec.*, 1874-75, p. 267.

639.

1874. BAIRD, SPENCER F. Explorations of Dr. Hayden in 1874. < *Ann. Rec.*, 1874-75, p. 275.

640.

1874. BAIRD, SPENCER F. The Godeffroy Museum at Hamburg. < *Ann. Rec.*, 1874-75, p. 282.

641.

1874. BAIRD, SPENCER F. Natural History of the Bermudas. < *Ann. Rec.*, 1874-75, p. 283.
Explorations of J. Matthew Jones.

642.

1874. BAIRD, SPENCER F. New Experiments on the Venom of East Indian Serpents. < *Ann. Rec.*, 1874-75, p. 287.
Memoirs of Drs. Fayrer and Bunton.

643.

1874. BAIRD, SPENCER F. Composition of the Cartilage of the Shark. < *Ann. Rec.*, 1874-75, p. 289.
Investigations of Petersen and Golet.

644.

1874. BAIRD, SPENCER F. Composition of the Body Fluids of Fish and Invertebrates. < *Ann. Rec.*, 1874-75, p. 291.
Inquiries of Messrs. Rateau and Papellon.

645.

1874. BAIRD, SPENCER F. Malformation of Fish Embryos. < *Ann. Rec.*, 1874-75, p. 294.

646.

1874. BAIRD, SPENCER F. The Sea-Serpent on the Scotch Coast. < *Ann. Rec.*, 1874-75, p. 296.

647.

1874. BAIRD, SPENCER F. Prepared Heads of Macas Indians. < *Ann. Rec.*, 1874-75, p. 297.

648.

1874. BAIRD, SPENCER F. Paucity of Mammals in Cuba. < *Ann. Rec.*, 1874-75, p. 300.

649.

1874. BAIRD, SPENCER F. Embryology of the Lemurs. < *Ann. Rec.*, 1874-75, p. 301
Discoveries of Milne Edwards and Cole.

650.

1874. BAIRD, SPENCER F. Genesis of the Horse. < *Ann. Rec.*, 1874-75, p. 301.
Views of O. C. Maul.

651.

1874. BAIRD, SPENCER F. Extermination of Buffaloes. < *Ann. Rec.*, 1874-75, p. 303.

652.

1874. BAIRD, SPENCER F. The new Fossil Bird of the Sheppey Clay. < *Ann. Rec.*, 1874-75, p. 305.

653.

1871. BAIRD, SPENCER F. Affinities of *Heloderma horridum*. < *Ann. Rec.*, 1874-75, p. 308.

654.

1874. BAIRD, SPENCER F. Occurrence of a Cuban Crocodile in Florida. < *Ann. Rec.*, 1874-75, p. 308.

655.

1874. BAIRD, SPENCER F. Food of the Shad. < *Ann. Rec.*, 1874-75, p. 310.

656.

1874. BAIRD, SPENCER F. The Structure of the Laucelot. < *Ann. Rec.*, 1874-75, p. 310.
Reviews of memoir by Dr. Stieda.

657.

1874. BAIRD, SPENCER F. Fish Living in Dried Mud. < *Ann. Rec.*, 1874-75, p. 311.
Note by M. Dareste.

658.

1874. BAIRD, SPENCER F. The "Nerfling" Fish. < *Ann. Rec.*, 1874-75, p. 311.

659.

1874. BAIRD, SPENCER F. Longevity of Fishes. < *Ann. Rec.*, 1874-75, p. 312.
Observation of Dr. Buchner, of Gressen, upon longevity of eels.

660.

1874. BAIRD, SPENCER F. Spawning of Whiting-Pout. < *Ann. Rec.*, 1874-75, p. 312.
Observation of Henry Lee upon *Gadus tuscus*.

661.

1874. BAIRD, SPENCER F. Sensibility of Fish to Poisons. < *Ann. Rec.*, 1874-75, p. 313.
Observations of M. Rabuteau and Papellon at Concameau.

662.

1874. BAIRD, SPENCER F. Structure of the Embryonic Cellule in the Eggs of Bony Fishes. < *Ann. Rec.*, 1874-75, p. 314.
Investigations of Balbani.

663.

1874. BAIRD, SPENCER F. The Embryology of Terebratulina. < *Ann. Rec.*, 1874-75,
p. 314.
Labors of E. S. Morse.

664.

1874. BAIRD, SPENCER F. The Food of the Oyster, and a New Parasite. < *Ann. Rec.*, 1874-75, p. 315.
Paper by John M. Crady.

665.

1874. BAIRD, SPENCER F. Explanation of the alleged occurrence of the King-Crab in Holland. < *Ann. Rec.*, 1874-75, p. 316.

666.

1874. BAIRD, SPENCER F. Success of the Naples Zoological Station. < *Ann. Rec.*, 1874-75, p. 317.

667.

1874. BAIRD, SPENCER F. Zoological Garden of Hamburg. < *Ann. Rec.*, 1874-75, p. 318.

668.

1874. BAIRD, SPENCER F. Fossil Vertebrates in Ohio. < *Ann. Rec.*, 1874-75, p. 322.

669.

1874. BAIRD, SPENCER F. Exhibition of British Ethnology. < *Ann. Rec.*, 1874-75, p. 326.
Describes ethnological department of U. S. National Museum.

670.

1874. BAIRD, SPENCER F. Footprints in Solid Rock. < *Ann. Rec.*, 1874-75, p. 328.
Refers to specimens in U. S. National Museum.

671.

1874. BAIRD, SPENCER F. Ancient Stone Fort in Indiana. < *Ann. Rec.*, 1874-75, p. 329.

672.

1874. BAIRD, SPENCER F. Dall's Ethnological Explorations in Alaska. < *Ann. Rec.*, 1874-75, p. 329.

673.

1874. BAIRD, SPENCER F. Trade among the Aborigines. < *Ann. Rec.*, 1874-75, p. 331.

674.

1874. BAIRD, SPENCER F. The Species of American Squirrels. < *Ann. Rec.*, 1874-75, p. 332.
Notice of work of J. A. Allen.

675.

1874. BAIRD, SPENCER F. Relationship of American Deer to their British analogues. < *Ann. Rec.*, 1874-75, p. 335.

676.

1874. BAIRD, SPENCER F. The Characters and Relations of the Hyopotamidæ. < *Ann. Rec.*, 1874-75, p. 336.
Review of Kowalevsky's memoir.

677.

1874. BAIRD, SPENCER F. Shad in the Gulf of Mexico. < *Ann. Rec.*, 1874-75, p. 338.

678.

1874. BAIRD, SPENCER F. History of the Pacific Coast Marine Mammals. < *Ann. Rec.*, 1874-75, p. 338.

679.

1874. BAIRD, SPENCER F. Decrease in the European Bison. < *Ann. Rec.*, 1874-75, p. 339.
Scammon's "Marine Mammals of the Pacific Coast."

680.

1874. BAIRD, SPENCER F. Eggs of the Siluridæ. < *Ann. Rec.*, 1874-75, p. 339.
Observations of Dr. Ray.

681.

1874. BAIRD, SPENCER F. Discovery of *Putorius Nigripes*. < *Ann. Rec.*, 1874-75, p. 339.

682.

1874. BAIRD, SPENCER F. The Fossil Hog of America. < *Ann. Rec.*, 1874-75, p. 340.

683.

1874. BAIRD, SPENCER F. Dall on the Birds of Alaska. < *Ann. Rec.*, 1874-75, p. 340.

684.

1874. BAIRD, SPENCER F. Lawrence's Birds of Northwestern Mexico. < *Ann. Rec.*, 1874-75, p. 341.

685.

1874. BAIRD, SPENCER F. Collection of Birds of Paradise. < *Ann. Rec.*, 1874-75, p. 341.

686.

1874. BAIRD, SPENCER F. Geographical Distribution of Asiatic Birds. < *Ann. Rec.*, 1874-75, p. 341.
Review of memoir by H. J. Elwes.

687.

1874. BAIRD, SPENCER F. Suggested Introduction of the Rook into the United States. < *Ann. Rec.*, 1874-75, p. 342.

688.

1874. BAIRD, SPENCER F. Dr. Coues' Manual of Field Ornithology. <Ann. Rec., 1874-75, p. 343.

689.

1874. BAIRD, SPENCER F. Catalogue of American Birds. <Ann. Rec., 1874-75, p. 343. Selater and Salvin's Index Avium Neotropicalium.

690.

1874. BAIRD, SPENCER F. American King-Crab on the European Coast. <Ann. Rec., 1874-75, p. 344.

691.

1874. BAIRD, SPENCER F. An "Army Worm." <Ann. Rec., 1874-75, p. 344.

692.

1874. BAIRD, SPENCER F. Dall's Catalogue of the Shells of Behring's Strait. <Ann. Rec., 1874-75, p. 345.

693.

1874. BAIRD, SPENCER F. Discovery of the Aleut Mummies. <Ann. Rec., 1874-75, p. 345.

694.

1874. BAIRD, SPENCER F. Change of Volume of Fish in Swimming. <Ann. Rec., 1874-75, p. 348. Investigation by Harting.

695.

1874. BAIRD, SPENCER F. The Development of Sharks and Rays. <Ann. Rec., 1874-75, p. 349. Investigations of F. M. Balfour at Naples.

696.

1874. BAIRD, SPENCER F. Respiration in the Amphibia. <Ann. Rec., 1874-75, p. 350.

697.

1874. BAIRD, SPENCER F. The Basking Shark. <Ann. Rec., 1874-75, p. 351. Note on *Selache mazina*.

698.

1874. BAIRD, SPENCER F. Taming the Zebra. <Ann. Rec., 1874-75, p. 352.

699.

1874. BAIRD, SPENCER F. Lieutenant Wheeler's Expedition. <Ann. Rec., 1874-75, p. 353.

700.

1874. BAIRD, SPENCER F. Sea-Weeds of the Bay of Fundy. <Ann. Rec., 1874-75, p. 356. Notice of work done by U. S. Fish Commission.

701.

1874. BAIRD, SPENCER F. New Yearly Report of the Progress of Botany. <Ann. Rec., 1874-75, p. 361.

702.

1874. BAIRD, SPENCER F. Recent Publications in Systematic Botany. < *Ann. Rec.*, 1874-75, p. 363.

703.

1874. BAIRD, SPENCER F. Introduction of Prairie Chickens into the Eastern States. < *Ann. Rec.*, 1874-75, p. 391.

704.

1874. BAIRD, SPENCER F. Destructiveness of Rodents in California. < *Ann. Rec.*, 1874-75, p. 397.

705.

1874. BAIRD, SPENCER F. Oil from Sharks' Livers. < *Ann. Rec.*, 1874-75, p. 419.

706.

1874. BAIRD, SPENCER F. Fisheries and Sea Temperatures. < *Ann. Rec.*, 1874-75, p. 419.
Observations of the Scotch Meteorological Society.

707.

1874. BAIRD, SPENCER F. Marine Fisheries of Maine in 1873. < *Ann. Rec.*, 1874-75, p. 420.

708.

1874. BAIRD, SPENCER F. Consumption of Marine Products in Washington. < *Ann. Rec.*, 1874-75, p. 420.

709.

1874. BAIRD, SPENCER F. The French Fisheries. < *Ann. Rec.*, 1874-75, p. 422.

710.

1874. BAIRD, SPENCER F. The Seal and Herring Fisheries of Newfoundland. < *Ann. Rec.*, 1874-75, p. 424.

711.

1874. BAIRD, SPENCER F. Alaska Cod-Fisheries in 1873. < *Ann. Rec.*, 1874-75, p. 424.

712.

1874. BAIRD, SPENCER F. Fish-Culture in Castalia Springs. < *Ann. Rec.*, 1874-75, p. 425.
Fish-culture in mineral springs in Erie County, Ohio.

713.

1874. BAIRD, SPENCER F. Restocking Otsego Lake, N. Y., with Fish. < *Ann. Rec.*, 1874-75, p. 426.

714.

1874. BAIRD, SPENCER F. Introduction of British Fish into India. < *Ann. Rec.*, 1874-75, p. 426.

715.

1874. BAIRD, SPENCER F. Transporting Living Trout. < *Ann. Rec.*, 1874-75, p. 427.
Experience of German experts.

716.

1874. BAIRD, SPENCER F. Caution in Planting Young Salmon. < *Ann. Rec.*, 1874-75, p. 427.
Statement of Riedel.

717.

1874. BAIRD, SPENCER F. Destruction of Fish on the Oregon Coast by Nitro-glycerine. < *Ann. Rec.*, 1874-75, p. 428.

718.

1874. BAIRD, SPENCER F. Sterlet from St. Petersburg at the Brighton Aquarium. < *Ann. Rec.*, 1874-75, p. 428.

719.

1874. BAIRD, SPENCER F. Stocking a Pond in Utah with Eels. < *Ann. Rec.*, 1874-75, p. 428.

720.

1874. BAIRD, SPENCER F. Spinal Column of the Sturgeon as an Article of Food. < *Ann. Rec.*, 1874-75, p. 447.

721.

1874. BAIRD, SPENCER F. New Survey of the State of Massachusetts. < *Ann. Rec.*, 1874-75, p. 573.

722.

1874. BAIRD, SPENCER F. Cambridge Entomological Club. < *Ann. Rec.*, 1874-75, p. 574.

723.

1874. BAIRD, SPENCER F. Twenty-third Annual Meeting of the American Association for the Advancement of Science. < *Ann. Rec.*, 1874-75, p. 574.

724.

1874. BAIRD, SPENCER F. Seventh Annual Report of the Peabody Museum, Cambridge, Massachusetts. < *Ann. Rec.*, 1874-75, p. 575.

725.

1874. BAIRD, SPENCER F. First Report of the Anderson School of Natural History at Penikese. < *Ann. Rec.*, 1874-75, p. 576.

726.

1874. BAIRD, SPENCER F. The Penikese School. < *Ann. Rec.*, 1874-75, p. 578.

727.

1874. BAIRD, SPENCER F. Opening of the Anderson School at Penikese. < *Ann. Rec.*, 1874-75, p. 579.

728.

1874. BAIRD, SPENCER F. Report for 1873 of the Peabody Academy of Science, Salem. < *Ann. Rec.*, 1874-75, p. 579.

729.

1874. BAIRD, SPENCER F. Report of the Museum of Comparative Zoology for 1873. < *Ann. Rec.*, 1874-75, p. 580.

730.

1874. BAIRD, SPENCER F. Bulletin of the Museum of Comparative Zoology. <Ann. Rec., 1874-75, p. 581.

731.

1874. BAIRD, SPENCER F. Catalogues of the Museum of Comparative Zoology. <Ann. Rec., 1874-75, p. 581.

732.

1874. BAIRD, SPENCER F. Annual Meeting of the Trustees of the Museum of Comparative Zoology. <Ann. Rec., 1874-75, p. 582.

733.

1874. BAIRD, SPENCER F. Report of the Bussey Institution. <Ann. Rec., 1874-75, p. 582.

734.

1874. BAIRD, SPENCER F. The "Torrey Memorial Cabinet." <Ann. Rec., 1874-75, p. 584.

735.

1874. BAIRD, SPENCER F. "Directory" of the Torrey Botanical Club. <Ann. Rec., 1874-75, p. 584.

736.

1874. BAIRD, SPENCER F. The Bulletin of the Science Department of Cornell University. <Ann. Rec., 1874-75, p. 585.

737.

1874. BAIRD, SPENCER F. Issue of "Proceedings" by the New York Lyceum of Natural History. <Ann. Rec., 1874-75, p. 585.

738.

1874. BAIRD, SPENCER F. Publishing Fund of the Historical Society of Pennsylvania. <Ann. Rec., 1874-75, p. 586.

739.

1874. BAIRD, SPENCER F. Report of the Philadelphia Academy of Natural Sciences. <Ann. Rec., 1874-75, p. 586.

740.

1874. BAIRD, SPENCER F. Philadelphia National Museum. <Ann. Rec., 1874-75, p. 587.

741.

1874. BAIRD, SPENCER F. Report of the Zoological Society of Philadelphia. <Ann. Rec., 1874-75, p. 587.

742.

1874. BAIRD, SPENCER F. The Zoological Society of Philadelphia. <Ann. Rec., 1874-75, p. 588.

743.

1874. BAIRD, SPENCER F. Reorganization of the Maryland Academy of Sciences. <Ann. Rec., 1874-75, p. 589.

744.

1874. BAIRD, SPENCER F. Botanical Conservatory of the Maryland Academy of Sciences. < *Ann. Rec.*, 1874-75, p. 590.

745.

1874. BAIRD, SPENCER F. Recent Publications of the Smithsonian Institution. < *Ann. Rec.*, 1874-75, p. 591.

746.

1874. BAIRD, SPENCER F. United States Departmental Centennial Board. < *Ann. Rec.*, 1874-75, p. 593.

747.

1874. BAIRD, SPENCER F. Additions to the National Herbarium in 1874. < *Ann. Rec.*, 1874-75, p. 593.

748.

1874. BAIRD, SPENCER F. European Savans in American Institutions. < *Ann. Rec.*, 1874-75, p. 594.

749.

1874. BAIRD, SPENCER F. Sale of Dr. Troost's Cabinet of Minerals and Antiquities. < *Ann. Rec.*, 1874-75, p. 594.

750.

1874. BAIRD, SPENCER F. Report of the Zoological Society of London. < *Ann. Rec.*, 1874-75, p. 595.

751.

1874. BAIRD, SPENCER F. Annual Return of the British Museum. < *Ann. Rec.*, 1874-75, p. 596.

752.

1874. BAIRD, SPENCER F. Temporary Museum at the late Meeting of the British Association. < *Ann. Rec.*, 1874-75, p. 599.

753.

1874. BAIRD, SPENCER F. Meeting of the French Association for the Advancement of Science. < *Ann. Rec.*, 1874-75, p. 601.

754.

1874. BAIRD, SPENCER F. The "American Society" of Paris. < *Ann. Rec.*, 1874-75, p. 602.

755.

1874. BAIRD, SPENCER F. Life-Saving Stations on the Coast of the United States. < *Ann. Rec.*, 1874-75, p. 606.

756.

1875. BAIRD, SPENCER F. Annual Record | of | Science and Industry | for 1873. | Edited by | Spencer F. Baird, | with the assistance of Eminent Men of Science. | [Cut.] | New York: Harper & Brother, Publishers, | Franklin Square. | 1875. | (8vo. pp. cxxxii, 714.)

757.

CONTENTS.

REPORT OF THE COMMISSIONER.

A.—*Inquiry into the decrease of the food-fishes.*

1. Investigations of 1873	p. vii
Reason for selecting Portland, Me., as base of operations	vii
Assistance rendered by the Navy Department	vii
The steam-tug Blue Light	vii
Associates in the inquiry	viii
Numbers of living forms found in the waters of the region	viii
Mackerel, herring, and cod fisheries	viii
Fish-food	viii
Biological researches	ix
Physical researches	ix
Collections for scientific museums	ix
List of visitors at Peak's Island Station	ix

1876. BAIRD, SPENCER F.—Continued.

Apparatus used on the Blue Light	p. ix
The region southeast from Cape Elizabeth	x
The region at the upper end of Casco Bay.....	x
Proof of climatic changes on the northern Atlantic coast.....	x
Assistance rendered by the United States Coast Survey	x
The steamer Bache.....	x
Assistance rendered by the Treasury Department	xi
The revenue steamer McCulloch	xi
The revenue steamer Chase	xi
Assistance rendered by the Quartermaster's Department of the Army.....	xi
2. Investigations in 1874	xi
Reasons for selecting Noank, Conn., as base of operations	xi
Assistance rendered by the Navy Department	xi
The steam-tug Blue Light.....	xi
General character of work prosecuted	xi
Experiments in propagating sea-bass	xii
Visit to shad-hatching stations at Holyoke, Mass	xii
Experiments in inuring embryo shad to sea-water.....	xii
Shipment of shad to Germany.....	xii
Discoveries of species before unknown to the coast	xiii
Associates in the inquiry	xiii
List of visitors to the Noank station.....	xiii
Special report to be made on invertebrates.....	xiv
Cold currents.....	xiv
Assistance rendered by the United States Coast Survey	xiv
The steamer Bache.....	xiv
Experiment with preservatives	xv

B.—*The propagation of food-fishes.*

3. Extent of the work.....	xv
Regions benefited.....	xv
The value of fish propagation to China.....	xvi
Reasons why the work cannot be left to State action	xvi
The plan as regards the propagation of the shad	xvi
Extent of the California salmon work	xvii
The possible resources of rivers	xvii
Proposed introduction of the carp.....	xvii
Former abundance of fishes	xvii
4. The shad.....	xviii
The hatching and distribution of 1874	xviii
The waters benefited in the United States	xviii
The shipment to Germany	xviii
The hatching and distribution of 1875	xviii
The Neuse River of North Carolina.....	xix
The Pamunky River of Virginia.....	xix
The reconnaissance of the Potomac fisheries	xix
The stations and results on the Potomac	xix
Distribution from Coeyman's Landing, N. Y., on the Hudson.....	xix
Distribution from South Hadley Falls, Mass., on the Connecticut River	xix
Distribution from Point Pleasant, Pa., on the Delaware River.....	xx
Review of the labors of the season.....	xx
Experiments by Fred. Mather and H. W. Welsler, with a view to transporting shad long distances	xxi
The shipment to Germany.....	xxi
Experiments with a view to transporting shad in sea-water.....	xxii
Experiments with a view to transporting shad of several inches length.....	xxii
5. The California salmon	xxii
Mr. Livingston Stone's operations in 1873	xxii
The final hatching of the eggs in Eastern waters	xxiii
Mr. Livingston Stone's operations in 1874.....	xxiii
Qualities of the California salmon.....	xxiv
Observations of temperature in San Joaquin River	xxv
Observations of temperature in McCloud River.....	xxvi
Observations of temperature in Columbia River.....	xxvi

1876. BAIRD, SPENCER F.—Continued.

Comparison of physical conditions of the rivers of the Atlantic slope and Gulf of Mexico with Pacific streams.....	p. xxvi
Distances which anadromous species will travel inland	xxviii
The great vigor of the California salmon.....	xxix
The reasons for expectation of success in introducing California salmon in Eastern waters.....	xxix
The great addition to the food resources	xxx
6. The Atlantic salmon	xxx
Mr. Atkins's operations in 1873-'74 and 1874-'75	xxx
The number of breeding salmon bought and manipulated.....	xxxi
Marking the fish when released	xxxi
Recapture of marked fish	xxxi
7. The white-fish	xxxii
8. The carp of Europe	xxxii
Its qualities and habits	xxxii
Numerous domesticated varieties	xxxiii
The best varieties.....	xxxv
Its artificial propagation	xxxv
Localities in Europe where they are bred	xxxv
Desirability of the carp for the United States.....	xxxvi
9. The aquarium car	xxxvii
The trip of 1873	xxxvii
The trip of 1874	xxxvii
10. Tables of distribution of food-fishes	xxxviii
Tables of shad-hatching and distribution	xxxviii
Tables of California salmon distribution	xl
Tables of Atlantic salmon distribution	xlv
Report of the Commissioner (table of contents precedes report).....	1
APPENDIX A.—Sea fisheries and the fishes and invertebrates used as food.....	1
I. Historical observations on the condition of the fisheries among the ancient Greeks and Romans, and their mode of salting and pickling fish. By J. K. Smidth.....	3
Introduction	3
Classified groups of fishes	8
Curing processes	14
Lobsters	17
Fish, oyster, and snail ponds	18
II. Statistics of the most important fisheries of the North Atlantic. By Carl Dambeck	21
1. Norway	21
2. Sweden	21
3. Denmark	22
4. Germany	22
5. Great Britain and Ireland	23
6. France	24
7. North America	24
III. On the fisheries of Norway	25
IV. Statistical data regarding the Swedish fisheries	31
V. Account of the fisheries and seal-hunting in the White Sea, the Arctic Ocean, and the Caspian Sea. By Alexander Schultz.....	35
A. The fisheries of the White Sea and the Petschora	36
1. The herring	37
2. The salmon	40
3. The navaga (<i>Gadus navaga</i>) and other salt-water fish.....	43
4. River and lake fish	44
B. Fisheries in the Arctic Ocean	44
1. Fisheries on the Mourman coast.....	44
2. Fisheries at Novaya-Zemlya	52
C. Fishing and seal-hunting in the Caspian Sea	58
1. Fish found in the Caspian Sea	58
2. Spawning-season of the fish in the Caspian Sea.....	61
3. Wealth of the fish in the Caspian Sea	62
4. Estimated value of the fisheries in the Caspian Sea	63
5. Fishing-basins of the Caspian Sea	64

1876. BAIRD, SPENCER F.—Continued.

6. Fishing implements	p. 72
7. Importance of a (Vataga) fishing establishment	80
8. Preparing of the fish and its several parts	82
9. Market price of fish and their products	90
10. Price of fish as fixed by agreement between the fishermen and the fishing-houses	91
11. Seal-hunting	92
12. Manufacture of seal-oil	95
VI. The Norwegian herring fisheries. By A. I. Boeck and A. Feddersen ..	97
VII. Preliminary report for 1873-'74 on the herring and herring fisheries on the west coast of Sweden. By Axel Vilhelm Ljungman	123
1. On different species of herring and small herring	125
The spring herring (<i>Clupea majalis</i>)	128
The sea-herring (<i>Häfslottisill</i>)	130
The wandering-herring (<i>Strüksillen</i>)	131
Herring spawning in autumn	133
The large herring, or the so-called (Gamla) herring (<i>Clupea bo-</i> <i>husica</i> , Nilss.)	133
2. Of the propagation and growth of the herring and small herring ..	143
3. Of the herring's and small herring's mode of life; its migrations, and the dependence of these latter on meteorologic and hydrographic circumstances	147
4. Of the herring-fisheries and their time and place	150
5. The small-herring fisheries, their time and place	152
6. Of fishing implements, the manner in which they are used, and other matters connected therewith	154
7. Scientific observations and scientific as well as practical experi- ments necessary for continuing the investigations and bring- ing them to a satisfactory end.	165
8. Of the immediate continuation of the investigations and the sums required for this purpose	167
VIII. The halibut fisheries of the United States. By Lieut. P. De Broca ..	169
IX. The fishing-villages, Snekkersteen and Skotterup, and the collection of fishing implements exhibited at Elsinore, Denmark, dur- ing the summer of 1872	173
X. On the herring and its preparation as an article of trade. By Hjalmar Widegren	183
Introduction	183
1. Preparation of common Baltic herring for consumption in Sweden and in the German ports of the Baltic	189
2. Preparation of extra-fine herring for home consumption	192
3. Preparation of spiced herring (<i>Kryddsill</i>)	193
XI. New contributions to the herring question. The dispute between Axel Boeck and Ossian Sars regarding the Norwegian sum- mer herring. Sars's recent observations and his new theory on the migrations of the herring	195
XII. On the spawning and development of the codfish. By Prof. G. O. Sars ..	213
XIII. The Norwegian lobster-fishery and its history. By Axel Boeck	223
Introduction	223
Implements for catching the lobsters, methods of catching them, and the manner of shipping them	228
The lobster trade and the history of its legislation	232
Draught of a law regarding the protection of lobsters	253
XIV. Transportation of lobsters to California	258
XV. On the artificial propagation of the lobster	267
XVI. On the oyster-industries of the United States. By Lieut. P. De Broca ..	271
Letter to the minister of marine and colonial affairs	271
Chapter first:	
Introduction	277
Chapter second:	
Oysters of the United States	286
Mode of obtaining the oysters	292
Culture of oysters	296
Laws concerning oyster-plantations	299

1876. BAIRD, SPENCER F.—Continued.

Chapter third:	
The oyster business in several cities of the United States ..	p. 302
Chapter fourth:	
General views upon the natural history of the market-clams.	313
Recommendations for introduction	318
APPENDIX B.—The river fisheries	321
XVII. The propagation and distribution of the shad	323
A. Operations in the distribution of the shad in 1874. By James W. Milner	323
Distribution from Coeymans, N. Y.	323
Distribution from South Hadley Falls, Mass	323
Table of distribution, 1874	326
B. Report on shad-hatching in New Jersey. By G. A. Anderson	327
C. Voyage to Bremerhaven, Germany, with shad. By Fred. Mather ..	328
D. Living shad on their way to the Weser. Translated by H. Jacobson.	330
E. Shad-hatching and distributing operations of 1875	335
1. The Neuse River station	335
2. The Pamunky River station	336
3. The Potomac River station	336
4. The distribution of shad from the Hudson River	337
5. The Connecticut River station	337
6. Experiments with a view to transporting shad to Germany	338
7. The trip to Germany	339
Tables of shad-hatching operations	340
XVIII. Report of the Triana trip. By J. W. Milner	351
XIX. On the transportation of shad for long distances	363
A. Experiments with a view to transporting shad in sea-water. By James W. Milner	363
B. Experiments with a view to transporting shad a few months old. By Charles D. Griswold	370
C. Apparatus for hatching shad ova while <i>en route</i> to new waters. By Fred. Mather	372
XX. Report of operations in California in 1873. By Livingston Stone	377
A. Clear Lake	377
1. Field-work in the winter of 1872-73	377
2. Character of Clear Lake	377
3. List of fishes inhabiting the lake	378
4. The condition of the fish in Clear Lake at different seasons	380
B. Sacramento River	382
1. Character of fishing on the Sacramento	382
C. California aquarium-car	385
D. Overland journey with live shad	390
1. Preparation for the trip	390
2. The start	390
3. The apparatus	391
4. The care of fish	391
5. Journal of the trip	395
6. Experiments to ascertain the character of the water	400
7. Stations affording supplies of the water	401
8. Temperature of the water in the cans	401
9. Conclusion	401
E. McCloud River station	402
1. Catching the parent salmon	403
2. Confining the salmon	405
3. The Indian sentiment in regard to catching the salmon	408
4. Spawning the fish	410
5. The hatching apparatus	411
6. Hatching the eggs	415
7. Packing and shipping the eggs	419
8. The method of packing discussed	420
9. Cost of the eggs	420
10. Journal of overland trip with salmon-eggs	421
11. Distribution of salmon-eggs	423
F. Catalogue of collections sent to the Smithsonian Institution in 1873.	424

1876. BAIRD, SPENCER F.—Continued.

	G. List of McCloud Indian words, supplementary to a list contained in the report of 1872. By Livingston Stone	p. 428 431
XXI.	Hatching and distribution of California salmon	431
	A. Report on California salmon-spawn hatched and distributed. By J. H. Slack, M. D.	431
	B. Hatching and distribution of California salmon in tributaries of Great Salt Lake. By A. P. Rockwood.....	434
XXII.	Report of operations during 1874 at the United States salmon-hatching establishment on the McCloud River, Cal. By Livingston Stone	437
	Introduction	437
	Table of consignment of salmon-eggs according to order of shipments	441
	Cost of eggs	443
	Camp-buildings, &c	443
	The hatching apparatus.....	444
	The fish and fishing.....	445
	The taking and ripening of the eggs.....	447
	Packing the eggs.....	448
	The overland journey of the eggs.....	449
	Life in camp.....	459
	Our neighbors	466
	Game	468
	Extract from journal.....	468
	Tables of temperature	471
	Catalogue of collections sent to Smithsonian Institution, contributed in 1874	474
	Second California aquarium-car	477
XXIII.	Correspondence relating to the San Joaquin River and its fishes	479
XXIV.	The Atlantic salmon (<i>Salmo salar</i>).....	485
	A. Report on the collection and distribution of Penobscot salmon in 1873-'74 and '74-'75. By C. G. Atkins.....	485
	1. Methods	485
	2. Purchase of breeding-salmon.....	486
	3. Development and distribution.....	488
	4. Marking salmon for future identification	490
	5. Summaries	492
	Tables	493
	B. The salmon of Lake Champlain and its tributaries. By W. C. Watson	531
	1. Abundance of salmon in early times.....	531
	2. The disappearance of the salmon, and its causes	534
	3. Traits of the salmon	538
	4. The Au Sable River.....	539
	APPENDIX C.—Fish-culture, relating more especially to species of cyprinidæ.....	541
XXV.	Notes on the pisciculture in Kiangsi. By H. Kopsch	543
XXVI.	On the culture of the carp	549
	A. On carp-ponds	549
	B. Carp-culture in East Prussia. By R. Strüvy	552
	C. Carp-ponds	555
XXVII.	The gold orfe (<i>Cyprinus orfus</i>)	559
	A. On the raising of the gold orfe (<i>Cyprinus orfus</i>). By M. Kirsch....	559
	B. Correspondence relating to the gold orfe. By Prof. C. Th. E. V. Siebold	561
XXVIII.	Directions for using tables for recording the propagation and distribution of fish.....	563
APPENDIX D. —The restoration of the inland fisheries.....		569
XXIX.	Fisheries and fishery laws in Austria and of the world in general; Carl Pyrer.....	571
	A. General considerations.....	571
	1. Early protective measures.....	571
	2. Improved appreciation of the interest.....	572
	3. The object of fishery legislation.....	573

1876. BAIRD, SPENCER F.—Continued.

B. The fisheries.....	p. 575
4. The former condition of the Austrian fisheries.....	575
5. The present condition of the fisheries and its causes.....	576
6. Artificial fish-breeding.....	580
7. The progress of foreign fisheries.....	585
8. Condition of pisciculture in Austria.....	589
9. Value of the products of the fisheries.....	598
10. Fishery statistics.....	601
11. Scientific investigations.....	603
C. Important fresh-water fisheries.....	605
12. Salmon family (Salmonoidei).....	600
13. The pike family (Esocini).....	613
14. The catfish family (Siluroidei).....	613
15. The cod family (Gadoidei).....	613
16. The eels (Muraenoidei).....	614
17. The carp family (Cyprinoidei).....	614
18. The perch family (Percoidei).....	616
19. The sturgeon family (Acipenserini).....	616
20. The craw-fish (<i>Astacus fluvialilis</i>).....	617
D. Protective legislation.....	618
21. The fishing privileges.....	618
22. Foreign fishery laws.....	619
23. Fishing privileges and fishing laws in Austria.....	643
24. The buying off of fishing privileges.....	665
25. International fishery treaties.....	669
26. Salt-water fisheries and the laws relating to them.....	674
E. Conclusion.....	677
XXX. How can our lakes and rivers be again stocked with fish in the shortest possible time. By Mr. von dem Borne.....	681
APPENDIX E.—Natural history.....	685
XXXI. Preliminary report on a series of dredgings made on the United States Coast Survey steamer Bache in the Gulf of Maine. By A. S. Packard, jr., M. D.....	687
XXXII. List of the marine algae of the United States. By W. G. Farlow, M. D.	691
Class algae.....	691
List of the principal useful sea-weeds occurring on the United States coast.....	716
Used as food.....	716
Used as fertilizers.....	716
Used for the manufacture of iodine.....	717
The great kelp of California.....	717
Alphabetical index.....	718
XXXIII. Lecture on the organs of reproduction and the fecundation of fishes, and especially of eels. By Dr. Syrski.....	719
Introduction.....	719
The organs of reproduction and fecundation in fish in general.....	720
The reproductive organs of the eel.....	725
The ovaries of the eel.....	730
The spermatic organs.....	732
XXXIV. The food and mode of living of the salmon, the trout, and the shad. By D. Barfurth.....	735
Prefatory note. By Theo. Gill.....	735
Introduction.....	737
1. The food of <i>Trutta salar</i> Siebold (<i>Salmo salar</i> and <i>hamatus</i> Val.), and <i>Trutta trutta</i> Siebold (<i>Fario argenteus</i> Val.), in the river Rhine.....	738
2. The food of <i>Trutta fario</i>	753
3. The food of <i>Alausa vulgaris</i> while in the Rhine.....	757
Conclusion.....	758

CONTENTS.

1.—REPORT OF THE COMMISSIONER.

A.—General considerations.

	Page.
1. Introductory remarks.....	1
Operations of previous years.....	1
Precaution and time required by the work.....	1
Danger of hasty generalizations.....	1
Methods and direction of research.....	1
Utilization of work already performed by other departments of the government	2
Corresponding labors of other nations.....	2
Rapid increase in the work of the United States Fish Commissioner.....	3

1878. BAIRD, SPENCER F.—Continued.

Originally confined to inquiry into the present condition of the fisheries	p. 3
Multiplication of food-fishes subsequently added	3
No intermission in the work of the Commissioner	3
Amount of correspondence	3
Principal associates and assistants in the work	3
Fisheries branch	4
Distribution branch	4
Period of time covered by the report	4
<i>B.—Inquiry into the decrease of the food-fishes.</i>	
2. Investigations and operations of 1875	4
Selection of Wood's Hole as a station	4
For comparison of results with those of 1871	4
Convenient point for preparing fishery exhibit at Philadelphia in 1876	5
Detail of steamer Blue Light by the Navy Department	5
Beginning of the work	5
Associates, assistants, and visitors	5
Establishment of a permanent laboratory	6
Location and building furnished by the Light-House Board	6
The fitting up, mainly by private contributions	6
Close of season	6
Statistics of whale fishery	6
3. Investigations and operations of 1876	7
Unofficial work at the Wood's Hole laboratory	7
Presence of the Commissioner required at the Philadelphia Exposition	7
Fisheries and fish-culture exhibit at Philadelphia	7
Extent of the display	8
Fish-hatching exhibit	8
Fresh fish exhibit	8
Acquisition of foreign fisheries exhibits	8
Hope of reproducing it in Washington	8
<i>C.—The propagation of food-fish.</i>	
4. General considerations	8
Summary of results accomplished	8
Application for eggs and young fish	9
Rapid increase in their number	9
Response by Congress to public demands	10
Limitations of distribution	10
Theory of distribution	10
Foreign applications	11
Reasons for granting them	11
Distribution of eggs and fish young	11
Species covered by operations of United States Fish Commission	11
Species covered by State commissions and private parties	11
Relation of the United States Fish Commission to the American Fish-Culturists' Association	11
Relations to State fish commissions	12
Increase in number of State fish commissions	12
Annual conferences	12
Meeting at Philadelphia in 1876	12
Advantages of co-operation	12
Nature of co-operation effected	13
Sharing of expenses	13
Moral support	14
Interstate relations and co-operation	14
Relations to the executive departments of the government	14
Relations to private individuals	14
Relations to foreign countries	15
Germany:	
Organizations	15
Individuals	16
Japan	16
Canada	16
Other foreign countries	17

1878. BAIRD, SPENCER F.—Continued.

Facilities furnished by railroad companies	p. 17
Facilities furnished by express companies	18
5. Actual work of propagation of food-fishes in 1875 and 1876.....	20
The shad	20
Season of 1876	20
The Potomac River Station.....	20
The Susquehanna River Station	20
The Connecticut River Station	21
Combined results	21
The California salmon	21
The Columbia River Station in 1875.....	21
Threatened decrease of the fishery	21
Selection of hatching station	22
The McCloud River Station in 1875	22
Previous history	22
At first occupied part of year only.....	23
Object and need of permanent occupation.....	23
Established as a government reservation	23
Commencement of operations in 1875	23
Distribution of eggs to States.....	23
Distribution of eggs to foreign countries.....	23
Hatching of fish on account of the United States generally.....	23
Supply of fish to the Sacramento.....	24
Co-operation of California	24
The McCloud River Station in 1876	24
Results of the season.....	24
Use of refrigerator car for shipping the eggs.....	24
Distribution of eggs	24
To the States	24
To foreign countries	24
Supply of fish to the Sacramento.....	24
The Atlantic salmon	25
Season of 1876.....	25
Temporary suspension of work	25
The land-locked salmon	25
General nature and geographical distribution of the fish.....	25
Union with Massachusetts and Connecticut in prosecuting the work.....	25
History of previous operations.....	25
Sebec Lake in 1873.....	25
Sebec Lake in 1874	25
Grand Lake stream in 1875.....	25
Grand Lake stream in 1876.....	26
The whitefish	26
Season of 1876	26
Distribution to States.....	27
Distribution to foreign countries.....	27
The carp.....	27

D.—Tables.

Table 7.—Hatching and distribution of fish by the United States Fish Commission, from the beginning of its work in 1872 to the summer of 1876.	28
I. Shad	28
II. California salmon, distribution reported	32
III. California salmon, distribution not reported	
IV. Penobscot salmon	
V. Rhine salmon	
VI. Land-locked salmon	
VII. Whitefish, total	
VIII. Whitefish, special distribution in 1876	

II.—APPENDIX TO REPORT OF COMMISSIONER.

Appendix A.—The sea fisheries.

I. History of the American whale-fishery from its earliest inception to the year 1876. By Alexander Starbuck.....	1
--	---

1878. BAIRD, SPENCER F.—Continued.

A. Introduction	p. 1
B. From 1600 to 1700, Cape Cod; Connecticut; Long Island; Nantucket; Martha's Vineyard; Salem.....	4
C. From 1700 to 1750, Nantucket; Long Island; Cape Cod; Salem; Boston; Rhode Island; Martha's Vineyard.....	19
D. From 1750 to 1784, Nantucket; Martha's Vineyard; Cape Cod; Boston; Long Island; Rhode Island; New Bedford; Williamsburgh, &c	36
E. From 1874 to 1876.....	77
F. The dangers of the whale-fishery	114
G. A miscellaneous chapter	145
H. Introductory to returns	166
I. Returns of whaling-vessels sailing from American ports since the year 1715.....	168
J. Recorded summary of importation of oil and bone, and total value computed for each year, commencing January 1, 1804, and ending December 31, 1876, with gross valuation for the whole period	660
K. Synopsis of importation by ports, from 1804 to 1817.....	662
L. Table of exports from the United States, the products of the whale-fishery.....	700
M. Table of tonnage of vessels engaged in the whale-fishery	702
Special table of the whaling interest of New Bedford and Fairhaven..	702
Index to voyages by vessels' names	711
General index	764
List of illustrations	768
<i>Appendix B.—The inland fisheries.</i>	
II. Fisheries of Chicago and vicinity. By E. W. Nelson	783
A. Sources of information	783
B. Recent increase in sales	783
C. Investment and character of lake fisheries at Chicago and South Chicago	785
1. Fisheries at Chicago	785
2. Fisheries at South Chicago	788
D. List of species taken at Chicago and fishing in adjacent regions....	789
1. Chicago for spring season of 1875.....	789
2. Species taken at South Chicago	791
3. Calumet River and Lake	793
4. Riverdale, Ill	795
5. Illinois River and tributaries.....	797
6. List of species in the Illinois River in the vicinity of Peoria ..	799
III. The salmon fisheries of the Columbia River. By Livingston Stone	801
A. The Columbia River	801
B. Questions relative to <i>Salmo quinnat</i>	802
1. Name	802
2. Distribution	802
3. Abundance.....	802
4. Size	803
5. Migrations and movements.....	803
6. Relationships	807
7. Food	808
8. Reproduction	808
9. Artificial culture.....	810
10. Protection	810
11. Diseases	810
12. Parasites.....	811
13. Capture	811
14. Economical value and application	813
C. Other varieties of salmon.....	815
<i>Salmo truneatus</i> , Suckley	815
<i>Salmo proteus</i> , Pallas	816
<i>Salmo gairdneri</i> , Rich	816
<i>Fario stellatus</i> , Girard.....	817

1878. BAIRD, SPENCER F.—Continued.

	<i>Hypomesus pretiosus</i> (Girard), Gill	p. 818
	<i>Salmo spectabilis</i> , Girard	818
D.	Methods of fishing	820
E.	The canneries of the Columbia	821
IV.	Notes on some fishes of the Delaware River. By Dr. C. C. Abbott	825
A.	The larger acanthopterous fishes of the Delaware River	825
1.	Introductory	825
2.	The yellow perch (<i>Perca flavescens</i>), (Mitch.)	828
3.	Rock-fish (<i>Roccus lineatus</i>)	832
4.	White perch (<i>Morone americana</i>)	835
5.	Black bass (<i>Micropterus salmoides</i>)	836
6.	Goggle-eyed perch (<i>Pomoxys hexacanthus</i>)	837
7.	Sunfish (<i>Pomotis auritus</i>)	837
	River sunfish (<i>Ichthelis appendix</i>)	837
	Blue sunfish (<i>Ichthelis incisur</i>)	837
	Spotted sunfish (<i>Enneacanthus guttatus</i>)	837
	Banded sunfish (<i>Mesogomistius chaetodon</i>)	837
	Mud sunfish (<i>Acantharcus pomotis</i>)	837
8.	Pirate of spineless perch (<i>Aphredoderus Sayanus</i>)	840
B.	Notes on the winter habits of fresh-water fishes of the Delaware	841
V.	Method of purifying the residuum of gas-works before allowing it to pass off into the water. By J. R. Shotwell	847
VI.	Tables of temperatures of air and water at sundry stations of the United States Signal Office, from March, 1874, to February, 1875, and from March, 1876, to February, 1877, inclusive	851

Appendix C.—The propagation of food-fishes.

VII.	The carp and its culture in rivers and lakes, and its introduction into America. By Rudolph Hessel	865
A.	Introduction	865
B.	The races of carp; their history and habits	865
1.	The species and varieties	865
2.	The habits and the mode of reproduction	868
3.	The growth and size	873
C.	The culture of carp and construction of ponds	876
1.	Its adaptability to artificial culture	876
2.	The localities best adapted to a carp pond	877
3.	The construction of the ponds	878
4.	Stocking the ponds and care of the fishes	882
5.	Taking the fish from the ponds	891
6.	Mixed carp culture	892
7.	Feeding the carp	895
8.	Extent of carp culture in Europe	896
9.	The table qualities	897
VIII.	The propagation and distribution of shad. By James W. Milner	901
A.	Operations in 1876	901
1.	Station on the Potomac River	901
2.	Stations at the head of Chesapeake Bay	902
3.	Station on the Connecticut River at South Hadley Falls, Mass.	903
B.	Tables of shad propagation in 1876	905
IX.	On the collection of eggs of Schoodic salmon in 1875 and 1876. By Charles G. Atkins	910
A.	Notes on the species	910
1.	Nomenclature	910
2.	Distribution and habits of Schoodic salmon	911
B.	Spawn gathering in 1875	914
1.	General plan of operations	916
2.	Taking spawn	914
3.	Distribution of the eggs	917
C.	Spawn gathering in 1876	918
1.	Preparations	918
2.	Taking fish and spawn	918
3.	Development and distribution	919

1878. BAIRD, SPENCER F.—Continued.

X. Operations on the McCloud River in salmon-breeding in 1875. By Livingston Stone	p. 921
A. Preparation	921
B. The salmon eggs	921
1. Taking spawn	921
2. Shipment of the eggs	923
3. Labor and cost of the eggs	924
4. Summary of results	925
C. Tables of temperature and condition of eggs	926
D. List of natural history collections	932
XI. Operations on the McCloud River in salmon-breeding in 1876. By Livingston Stone	935
A. Condition of the station	935
B. Controversy regarding ownership of fishery	936
C. Beginning of the season	938
D. Taking the salmon eggs	940
E. The shipment of eggs and hatching the surplus	943
F. Foreign demand for salmon eggs	945
G. The establishment of new stations	946
H. Tables exhibiting the work and observation	947
I. Reservation of the McCloud River fishery. By the President	955
XII. Correspondence relating to the exportation of fishes and fish-hatching apparatus to New Zealand, Germany, &c.	959
A. The shipments made in 1875 to New Zealand	959
B. Shipments of fish ova in 1876 to New Zealand	963
C. Shipments of apparatus to Germany, and correspondence	1003
D. Address made at the meeting of the German Fishery Association, at Berlin, March 16, 1877. By Mr. von Behr-Schmoldow, president of the association, member of the German Parliament	1014

1878. BAIRD, SPENCER F. (*editor*). Annual Record | of | Science and Industry | for 1877. | Edited by | Spencer F. Baird, | with the assistance of eminent men of science. | [Cut.] | New York: | Harper & Brothers, Publishers. | Franklin Square. | 1878. 8vo. pp. xiv, 480.—Preface dated March 1, 1878.

"A modification of the original plan of the 'Annual Record' was commenced in the volume for 1877. Previous to that it consisted of two parts—first, a general summary of progress in the various branches of science; and, secondly, a series of abstracts of special papers, credited to the work in which they were published. These abstracts, although prepared by several specialists, were without indication of their authorship. The experience of several years showed that, in attempting to give abstracts of anything like the most important announcements of the year, more space was required than could be spared for the purpose; and it was therefore determined to enlarge the scope of the first division, and make it include a greater amount of detail, each summary to be prepared by some eminent specialist, and to be headed by his name."

Table of contents	p. iii
Astronomy.—By Edward S. Holden, U. S. Naval Observatory, Washington, D. C.	1
Physics of the Globe.—By Cleveland Abbe, of the Weather Bureau, Washington, D. C.	53
Physics.—By Geo. F. Barker, Prof. of Physics in the University of Pennsylvania, Philadelphia	91
Chemistry.—By Geo. F. Barker, Prof. of Physics in the University of Pennsylvania, Philadelphia	131
Mineralogy.—By Edward S. Dana, Ph. D., Yale College, New Haven, Conn.	151
Geology.—By F. Sterry Hunt, LL. D., F. R. S., Prof. of Geology, Institute of Technology, Boston, Mass	165
Hydrography.—By Francis M. Green, Lieutenant-Commander, U. S. N.	183
Geography.—By Francis M. Green, Lieutenant-Commander, U. S. N.	191
Geography of North America.—By Samuel H. Scudder, Cambridge, Mass	206
Microscopy.—By Prof. Hamilton L. Smith, Hobart College, Geneva, N. Y.	237
Anthropology.—By Prof. Otis T. Mason, Columbian University, Washington, D. C.	255

1878. BAIRD, SPENCER F.—Continued.

Zoology.—By Dr. A. S. Packard, jr., Director of the Peabody Academy of Science, Salem, Mass	p. 277
Botany.—By Prof. W. G. Farlow, Boylston Hall, Harvard College, Cambridge, Mass.	325
Agriculture and Rural Economy.—By Prof. W. O. Atwater, Wesleyan University, Middletown, Conn	349
Engineering.—By Wm. H. Wahl, Ph. D., Philadelphia, Pa	381
Technology.—By Wm. H. Wahl, Ph. D., Philadelphia, Pa	395
Industrial Statistics.—By Wm. H. Wahl, Ph. D., Philadelphia, Pa	406
Necrology	415

CONTENTS.

I.—REPORT OF THE COMMISSIONER.

A.—*General considerations.*

1. INTRODUCTORY REMARKS	*1
Number of reports heretofore published	*1
Period of the year covered by each report	*1
Time covered by the present report	*1
Gradual and great increase in the labors of the Commission	*1
Labor involved: increase of appropriations	*1
Increased interest and co-operation in the work	*1
Assistants in charge of divisions	*1
Propagation branch	*2
Inquiries branch	*2

B.—*Inquiries into the history and statistics of food-fishes*

2. FIELD OPERATIONS DURING THE SUMMER OF 1877	*2
Co-operation of the government departments	*2
Of Navy Department in previous years	*2
In 1877, by detail of steamer Speedwell	*2
Officers of the Speedwell	+2, *3
Scientific corps	*3
Station at Salem, Mass.	*3
Visitors	*3
Nature of operations	*3
Station at Halifax, Nova Scotia	*3
Movements and final disposition of steamer	*3
Visitors	*4
Assistance rendered to Commission	*4
By private parties	*4
By the Dominion minister of customs	*4
By the minister of marine and fisheries	*4
3. GENERAL RESULT OF THE FIELD-WORK OF 1877	*4
Continuation of previous researches	*4
Discovery of the pole-flounder, a new and valuable food-fish	*4
Its economical value and geographical distribution	+4, *5
Reasons why previously unknown	*5
Facts connected with distribution of marine fishes	*5
Large collections made for the National Museum, and for distribution to colleges and academies	*5
Superintendence of work of naming and assorting	*6

C.—*The Halifax Convention.*

4. THE TREATY OF WASHINGTON	*6
Unsettled fishery questions between the United States and British North America	*6
Three-mile line	*6
Headlands	*6
Shelter and supplies	*6
License system	*6
Privileges of Treaty of 1818	*6
Fishery clauses of Washington Treaty	*7
Explanation of provisions	*8
Ratification in 1873	*9
Appointment of Commissioners and counsel	*9
General preliminaries	*9
5. THE MEETING AT HALIFAX	*9
Its opening June 15, 1877.	*9
General proceedings and history	*9

1879. BAIRD, SPENCER F.—Continued.

Final award	*10
Payment of \$5,500,000 by the United States	*10
6. RELATIONS OF THE UNITED STATES FISH COMMISSION TO THE HALIFAX MEETING ...	*10
Invitation to attend by the Secretary of State	*10
Method adopted of obtaining information to be used	*11
Distribution of circulars	*11
Dispatch of agents	*11
Co-operation of individuals	*11
Departure for Halifax	*11
Part taken in the meetings	*12, *13
Biological and other facts elicited	*12, *13
Comparative preparation of the two sides	*12
Measures to be taken for securing proper statistics of the sea-fisheries	*13
Acknowledgments	*13

D.—Fishery statistics.

7. METHODS ADOPTED AND TO BE EMPLOYED	*13, *14
Action of the Treasury Department	*14
Action of the United States Fish Commission	*14
List of circulars already issued	*14
Mode of distributing circulars	*14
One subject only agitated at one time	*15
Results already elaborated	*15
Bluefish, sculpin, whale, and menhaden	*15
Subjects now under investigation	*15
Information of methods of fishing	*15

E.—Notice of articles relative to the sea-fisheries published in the appendix.

8. ATTEMPT TO UTILIZE EXPERIENCE OF OTHER NATIONS	*16
Fishery statistics of other nations	*16
Methods of other nations illustrated by apparatus imported	*16
Proposed improved fishery exhibit in Washington	*16
Value of information published in Norway	*16
History of Loffoden Island fisheries	*16
Observations by Sars on Loffoden fisheries	*17
Sea-fisheries of Norway	*17
Geographical distribution of <i>Gadidae</i>	*17
First five years of Emden herring-fishery	*17
Sea-fisheries of Sweden	*17
9. ORIGINAL COMMUNICATIONS	*17
Observations with the Casella-Miller thermometer, by Commander L. A. Beardslee	*17

F.—The propagation of food-fishes.

10. GENERAL CONSIDERATIONS	*18
Unreasonable expectations in regard to results of fish-culture	*18
Time required for determination as to success	*18
Some causes of error or fallacy	*18
State commissions acting in 1871	*19
State commissions in 1877	*19
Amount of work done by them	*19
Lake States especially noteworthy	*19
Co-operation with United States Fish Commission	*19
Direct	*19
Indirect, as in the distribution of salmon, &c	*19
Applications for eggs and fish	*20
Rapid increase in number	*21
Method of recording	*21
Principle of making selections	*21
Applications to be made through members of Congress	*21
Increase in demand from foreign countries	*21
Principal nations making application	*22
Application other than for eggs or fish	*22
The general co-operation by State commissions	*22
For assistance in working the Clackamas establishment	*22
By foreign commissioners and fishery authorities	*22

1879. BAIRD, SPENCER F.—Continued.

From Germany for models of hatching apparatus.....	*23
From Japan for a similar purpose.....	*23
From Chili and Ecuador for general information concerning fishes.....	*23
From British Columbia in regard to the utilization of salmon refuse.....	*23
From New Brunswick in regard to the canning of lobsters.....	*23
Fishes not comprehended in the plans of the Commission. Trout and black bass.	*23
General enumeration of fish treated by the United States Commission.....	*24
11. FACILITIES AND ASSISTANCE RENDERED TO THE UNITED STATES FISH COMMISSION..	*24
By government departments.....	*24
The Navy and Army.....	*24
By State fish commissions.....	*24
By railroad companies.....	*24
By express companies.....	*26
By steamship companies.....	*26
By individuals.....	*26
12. LEGISLATION AND PROTECTION OF THE FISHERIES.....	*26
Antagonism between prosecutors of different methods of fishing.....	*26
Absence of legislation on part of the general government.....	*26
The Washington Treaty as affecting the rights of fishermen.....	*27
Objections to modes of fishing.....	*27
Appeal against trawling by inhabitants of Block Island.....	*27
Relation of the States to fishery interests.....	*27
Establishment of close time.....	*27
Removal or palliation of obstructions.....	*28
Fish-baskets especially injurious.....	*28
Limitations as to size of fish sold.....	*28
13. WORK ACCOMPLISHED IN 1877.....	*29
The shad.....	*29
The Susquehanna station.....	*29
Reasons for temporary discontinuance of more southern stations.....	*29
Concentration on work in Susquehanna and Connecticut.....	*29
Defects of floating boxes.....	*29
Improved apparatus of T. B. Ferguson.....	*30
Experiments with this apparatus.....	*30
Work done on the Susquehanna.....	*30
The Connecticut station.....	*31
Transfer of apparatus to South Hadley Falls.....	*31
Co-operation of Massachusetts commissions.....	*31
Floating boxes used.....	*31
Microscopical investigations of H. J. Rice.....	*31
Experiments at Windsor Locks.....	*31
Reference to Mr. Milner's report.....	*31
The Pacific salmon.....	*31
The Clackamas station.....	*31
Alarm of canners at decrease of salmon in the Columbia River.....	*31
Dispatch of Mr. Stone to organize a station at expense of Oregon and Washington Fish Propagation Company.....	*32
Difficulties in selection of site.....	*32
Reasons for choosing Clackamas River.....	*32
Work required to get the station in running order.....	*32
Results accomplished.....	*32
The McCloud River station.....	*33
Assistance in keeping order rendered by the Army.....	*33
Interference of illegal fishing with the results.....	*33
Dates of taking fish.....	*33
Shipment of eggs by refrigerator car.....	*34
Deposit of young fish in the Sacramento River.....	*34
General results of the season.....	*34
General distribution of eggs.....	*34
Foreign distribution of eggs of the Pacific salmon.....	*34
Applications from Germany and elsewhere.....	*34
Selection of Mr. Mather to accompany the eggs.....	*34
Arrival of eggs in Chicago, October 7.....	*34
Mode of packing, and number of crates.....	*34
Departure on the Mosel.....	*34

1879. BAIRD, SPENCER F.—Continued.

Arrival in Bremen	*34
Loss in eggs	*34
Delivering to Holland and France	*34
General results	*34
The Atlantic salmon	*36
Bucksport station	*36
No work prosecuted there during the year	*36
Proposed renewal of operations	*36
Results of labors of previous years	*36
In the Delaware River	*36
Capture of fish near Trenton	*36
Current history of salmon-planting in that river	*36
In the Connecticut	*37
In the Merrimack	*37
The land-locked salmon	*37
Grand Lake Stream station	*37
Reference to Mr. Atkins's report	*37
Combination of effort with certain States	*37
Distribution of eggs in the United States	*38
Distribution to Germany and France	*38
Lake Ontario salmon	*38
Considerations as to its being a land-locked fish	*38
Canadian establishment in charge of Mr. Wilmot	*38
Donation of eggs to the United States Fish Commission	*38
Introduction of fry into Otsego Lake, N. Y.	*38
Whitefish	*39
Northville, Mich., station	*39
Supply to the United States	*39
Supply to Germany	*39
Failure of the latter experiment	*39
Supply to New Zealand	*39
The European marine whitefish	*39
Donation of 1,000 eggs to the United States Fish Commission by Mr. Eckardt	*40
Introduction of fry into Lake Gardner, Mich.	*40
The carp	*40
Its introduction an especial object of the United States Fish Commission	*40
Its value as a food-fish	*41
General treatment	*41
American rivals of the same family	*41
Varieties of carp	*41
Advantages of carp-culture	*42
Rate of growth of carp	*42
Applicability of the fish for certain localities	*42
Previous steps taken for introduction	*42
Recent efforts in charge of Mr. R. Hessel	*42
First trial unsuccessful	*42
Second satisfactory	*42
Number of fish imported	*43
Placed in Druid Hill Park, Baltimore	*43
United States carp ponds in Washington	*43
Congressional appropriations	*43
Plans for a permanent establishment	*43
Other experiments in carp-culture in the United States	*43
Alleged introduction of carp into the Hudson River	*43
Probably not the genuine carp	*43
Introduction by Mr. Poppe into Sonoma, Cal.	*44
The European tench	*44
Introduction by Mr. Hessel with the carp	*44
Special peculiarities and value	*44
The golden ide	*44
Introduction by Mr. Hessel	*44
The sea herring	*44
Importance as an article of food	*44
Peculiarities of its eggs	*44

1879. BAIRD, SPENCER F.—Continued.

Spawning habits of the fish	*45
Experiments at Noman's Land by Vinal N. Edwards	*45
Experiment in Germany by Dr. H. A. Meyer	*45
Special arrangements required for artificial hatching	*45
Variations in specific gravity of eggs of different fishes; some lighter, others heavier than water	*46
Comparison of eggs of California salmon and trout	*46
The European turbot and sole	*46
Great variety of food-fishes already in American waters	*46
Propriety of adding turbot and sole to the number	*46
Interest taken by Mr. J. G. Kidder, of Boston	*46
Employment of Mr. Mather to bring over a supply from England	*47
Assistance tendered by English gentlemen	*47
Difficulties experienced in getting fish	*47
Assistance of Cunard Steamship Company	*47
Fish brought over and place of deposit	*47
Acknowledgment to the Treasury Department	*48

II.—APPENDIX TO REPORT OF COMMISSIONER.

Appendix A.—The sea-fisheries.

I. G. BROWN GOODE. A history of the menhaden. By G. Brown Goode, curator of United States National Museum; with an account of the agricultural uses of fishes, by Prof. W. O. Atwater, professor of chemistry, Wesleyan University, Middletown, Conn	
Section A. Introduction	1
Section B. The names of the menhaden	6
Section C. A description of the American species of <i>Brevoortia</i> , with anatomical and physiological notes	19
Section D. Geographical distribution, and the movements of the schools	35
Section E. Abundance of the menhaden comparative and absolute	78
Section F. Food of the menhaden	93
Section G. Reproduction of menhaden	95
Section H. The enemies and fatalities of the menhaden	101
Section I. The menhaden fisheries	113
Supersection. Economical value and applications of the menhaden	135
Section K. The menhaden as a source of food	135
Section L. The menhaden as a bait-fish	141
Section M. The manufacture of oil and guano	161
Section N. Menhaden and other fish, and their products, as related to agriculture. By W. O. Atwater. (See also Appendix O)	194
Appendix A. Circular relating to statistics of the menhaden fishery	268
Appendix B. List of correspondents from whom contributions have been received	271
Appendix C. Bibliography of literature relating to the menhaden	274
Appendix D. Extracts from writings of ichthyologists relating to the menhaden	275
Appendix E. Catalogue of specimens in the United States National Museum illustrating the history of the menhaden	285
Appendix F. Tables of ocean temperature for certain points on the east coast of the United States	291
Appendix G. Table showing comparative amounts of menhaden, mackerel, shad, and alewives inspected in the State of Massachusetts, 1804 to 1877	295
Appendix H. List of manufacturers of menhaden oil and guano. Compiled by Mr. Jasper Pryer	296
Appendix I. Partial list of vessels employed in the menhaden fishery	297
Appendix K. Prices-current of menhaden oil and review of the markets (from the Oil, Paint, and Drug Reporter)	299
Appendix L. Proceedings of the United States Menhaden Oil and Guano Association	358
Appendix M. Annual reports of menhaden oil and guano manufacturers in the State of Maine	368
Appendix N. Statements of correspondents	373
Appendix O. Miscellaneous items regarding the use of fish for manure	483

1879. BAIRD, SPENCER F.—Continued.

Appendix P. Exports of menhaden oil from the port of New York from January, 1875, to July, 1878	503
Appendix Q. Supplementary works, September 22, 1878	506
(For list of illustrations, occupying 31 plates, see page 15.)	
II. KARL DAMEBECK. Geographical distribution of the <i>Gadidæ</i> , or the cod family, in its relation to fisheries and commerce. By Karl Damebeck. Translated from the German	531
A. Characteristics of the <i>Gadidæ</i>	531
B. General distribution	534
C. The Arctic region of the <i>Gadidæ</i>	536
D. The Atlantic region of the <i>Gadidæ</i>	543
E. The Pacific region of the <i>Gadidæ</i>	545
E. Distribution and fishing of the different species	547
G. Fisheries and trade	555
III. ANONYMOUS. An account of the Loffoden Islands of Norway. Translated by H. Jacobson from the German	559-564
IV. G. O. SARS. Report of practical and scientific investigations of the cod fisheries near the Loffoden Islands, made during the years 1864-'69. By G. O. Sars. Translated by H. Jacobson from the Norwegian.	565
A. Report for 1864	565
B. Report for 1865	581
C. Report for 1866 and 1867	587
I. Report for 1868 and 1869	599
V. G. O. SARS. Report of practical and scientific investigations on the cod fisheries near the Loffoden Islands, made during the years 1870-'73. By G. O. Sars. Translated from the Norwegian by H. Jacobson.	612
A. Report for 1870	612
B. Report for 1871	630
C. Report for 1872	635
D. Report for 1873	643-662
VI. G. O. SARS. Report made to the Department of the Interior of investigations of the salt-water fisheries of Norway during the years 1874-'77. By Prof. G. O. Sars. Translated from the Norwegian by H. Jacobson.	693
I. Report for 1874	693
II. Report for 1875	667
A. The mackerel fisheries of our Southern and Western coasts	667
B. The lobster and lobster fisheries on our Southern and Western coasts	674
C. On drag-net fishing on the coast from Nevlungt'even to Tönsbergfiord	680
III. Extracts from Prof. G. O. Sars' report on the Norwegian Atlantic expedition of 1876	681
A. Zoological observations	681
B. Investigation of the salt-water fisheries	687
N. Preliminary report on the zoölogical observations made during the second Norwegian polar expedition of 1877	692
Y. Report on the practical and scientific investigation of the salt-water fisheries made during the second Norwegian polar expedition of 1877	698-706
VII. M. FRIELE. An account of the fisheries of Norway in 1877. By M. Friele. Translated from the French by J. Paul Wilson.	707
A. Introduction	707
B. The cod fishery	707
1. Apparatus used in the cod fishery	710
2. The daily fishing	713
3. Quality of the cod	715
4. Preparation of the cod	716
5. Preparation of the oil	717
6. Roe	718
7. Other species of the genus <i>Gadus</i>	718
8. The codfish trade	722
C. The herring fishery	723
1. The spring herring	723
2. The great herring in Nordland	728
3. The summer herring	729

1879. BAIRD, SPENCER F.—Continued.

D. The brisling fishery	730
E. The mackerel fishery	731
1. Apparatus and methods in use	731
4. Preparation of the mackerel, and the trade	733
F. The lobster fishery	733
G. The whale fishery	735
H. The seal fishery	735
I. The salmon fishery	736
J. Miscellaneous fisheries	736
K. Value of the principal products of the Norway fisheries	737
1. Value at places of export	737
2. Value at the fisheries	738
3. Statistics of the winter and spring fisheries	738
4. Statistics of the summer fishery	739
5. Products of other fisheries	739, 740
VIII. G. VON YHLEN. Report on the sea-fisheries of the Län of Göteborg and Bohus in the year 1877. By Gerhard Von Yhlen. Translated from the Swedish by Dr. Josua Lindahl	741
A. The great fishery	741
B. The mackerel fishery	742
C. The winter fishery	743
D. The herring and sprat fisheries	743
E. The lobster and oyster fisheries	749, 750
IX. SENATOR DANTZIGER. The first five years of the Emden Joint Stock Herring Fishery Association. By Senator Dantziger, of Emden. Translated from the German by H. Jacobson	751-776
<i>Appendix B.—The propagation of food-fishes.</i>	
X. ANONYMOUS. The best food for young salmonoids and for larger salmonoids in ponds. Translated from the German by H. Jacobson	779-782
XI. LIVINGSTON STONE. Report of operations at the salmon-hatching station on the Clackamas River, Oregon, in 1877. By Livingston Stone	783-796
XII. LIVINGSTON STONE. Report of operations at the United States salmon-hatching station on the McCloud River, California, in 1877. By Livingston Stone	797-810
XIII. FRED MATHER. Account of trip to Europe with eggs of the Quinnet salmon. By Fred Mather	811-816
XIV. CHARLES G. ATKINS. Report on the collection and distribution of Schoodic salmon eggs in 1877-78. (With one plate.) By Charles G. Atkins	817
1. Preparations	817
2. The fishing	818
3. Taking spawn	820
4. Incubation	822
5. Distribution of eggs	822
Table I. Record of fishing at Grand Lake Stream, Maine, October and November, 1877	823
Table II. Record of spawning operations, Grand Lake Stream, 1877	827
Table III. Record of surplus salmon spawn from Grand Lake Stream, January and February, 1878	830
Table IV. Statement of the distribution of young Schoodic salmon, 1878	832
Table V. Observations on the temperature and weather at Grand Lake Stream, 1875-78	836
Table VI. General summary of observations on temperature of Grand Lake Stream from October, 1875, to March, 1878, inclusive	841
Table VII. Measurements of Schoodic salmon at Grand Lake Stream, 1875 ..	842
Table VIII. Measurements of Schoodic salmon at Grand Lake Stream, 1876 ..	843
Table IX. Measurements of Schoodic salmon at Grand Lake Stream, 1877 ..	844
Table X. Record of spawning operations at Grand Lake Stream, 1875	845
Table XI. Record of spawning operations at Grand Lake Stream, 1876	846

CONTENTS.

I—REPORT OF THE COMMISSIONER.

A.—GENERAL CONSIDERATIONS.

	Page.
1. Introductory remarks	xv
Number of reports hitherto published	xv
Period covered by present report	xv
Continued increase in the scale of operations each year	xv
Division of subjects	xv
Special assistants in charge of divisions	xv
Of inquiry	xv
Of propagation	xv
2. Objects of the United States Fish Commission	xvi
Results aimed at by its work	xvi
1. Illustrated reports on aquatic animals and plants	xvi
2. Collection of specimens for National Museum and for distribution to educational establishments	xvi
3. Reports on chemical and physical character of the waters, with reference to the introduction of food-fishes	xvi
4. An account of the various methods and products of the fisheries, with suggestions as to improvements, especially by the introduction of.	xvii

1880. BAIRD, SPENCER F.—Continued.

Beam-trawling	xvii
Gill-nets for capture of cod	xvii
5. Statistics and history of American fisheries from the earliest time to the present	xvii
Methods by which this is to be accomplished	xviii
6. Improved system of obtaining statistics in the future	xviii
7. A complete exhibit in the National Museum of apparatus and products of the fisheries	xviii
The work commenced in connection with the International Exhibition at Philadelphia in 1876	xviii
Continuation since that time	xviii
8. Investigation of the movements and habits of fish as a basis for legislation	xviii
Necessity of covering the whole country in this research	xviii
Structure of fishways and method of purifying the waters, a corollary ..	xviii
9. Preparing a judicious system of regulations as to close seasons, varying with the circumstances	xix
10. Actually stocking the waters of the United States with useful food-fishes, and the best methods of accomplishing the object	xix
3. Assistance rendered the Commission	xix
By the government in general	xix
General requirement to render all possible aid	xix
The Secretary of the Navy	xix
Detail of steamer Speedwell	xix
Supply of two launches	xix
Repair of Fish Commission vessels	xix
The Secretary of the Treasury	xix
Towing of vessels by revenue cutters	xix
The Light-House Board	xx
Temperature observations	xx
The Secretary of War	xx
Supply of arms and men to McCloud River station	xx
The Chief Signal-Officer	xx
River and coast temperature observations	xx
Signal station at Gloucester	xx
Daily forecasts of the weather	xx
The Patent Office	xx
Report on apparatus of fishing and fish-culture	xx
The Post-Office Department	xx
Establishment of post-office at McCloud River hatchery	xx
The Superintendent of Public Buildings and Grounds	xx
Supervision of construction of carp-ponds	xx
By private associations and individuals	xxi
The Fish Commission of Maryland	xxi
The Commissioners of Druid Hill Park	xxi
The railroads throughout the United States	xxi
B.—INQUIRY INTO THE HISTORY AND STATISTICS OF FOOD-FISHES.	
4. Field operations during the season of 1878	xxi
Co-operation of the Navy Department	xxi
Detail of Speedwell	xxii
Personnel of Speedwell	xxii
Establishment of headquarters at Gloucester, July 9	xxii
Wharf and offices	xxii
Associates and assistants	xxii
Researches of Dr. Fallow	xxii
Investigation of fishes for food and fertilizers, by Professor Atwater	xxiii
Other researches and results	xxiii
Collections made	xxiii
Statistics and history of the fisheries	xxiii
Temperatures and soundings	xxiii
Aid from Signal Office	xxiii
Storm-signal station	xxiii
Daily forecast	xxiv
Visitors during season	xxiv

1880. BAIRD, SPENCER F.—Continued.

Arrival of Tallapoosa with Secretary of Navy.....	xxiv
Trip to the fishing banks, by R. L. Newcomb.....	xxiv
Close of field operations, September 30.....	xxiv
Departure from Gloucester, October 15.....	xxiv
Portion of party remaining for operations with codfish.....	xxiv

C.—THE PROPAGATION OF FOOD-FISHES.

5. Work accomplished in 1878.....	xxv
The quinnat, or California salmon (<i>Salmo quinnat</i>).....	xxv
The McCloud River station.....	xxv
Extensive repairs required on account of the floods.....	xxv
Establishment there of the post-office, Baird.....	xxv
Threatened violence; and aid by the War Department.....	xxv
Enormous product of salmon-eggs.....	xxv
Commencement and close of the season.....	xxv
Incidents of the fishery.....	xxv
Shipment eastward of embryonized eggs.....	xxvi
Deposit of fish in the Sacramento.....	xxvi
Shipment of eggs to foreign countries.....	xxvi
Canada.....	xxvi
Great Britain.....	xxvi
Germany.....	xxvii
France.....	xxvii
Netherlands.....	xxvii
New Zealand.....	xxvii
The Clackamas station.....	xxvii
Establishment in 1877.....	xxvii
Operations and results of 1878.....	xxvii
Expense of the work.....	xxviii
Proposed southern station.....	xxviii
Object of such a station.....	xxviii
Difficulties in selection of a site.....	xxviii
The Atlantic salmon (<i>Salmo salar</i>).....	xxix
The Bucksport station.....	xxix
Reasons for temporary cessation of efforts.....	xxix
Proposed renewal of operations in 1879.....	xxix
Very marked increase in salmon in 1878.....	xxix
Appearance in new waters, where planted.....	xxix
General summary of facts of increase of salmon.....	xxix
Rivers of Maine.....	xxix
The Merrimac.....	xxix
South coast of New England.....	xxix
The Connecticut.....	xxx
The Hudson.....	xxx
The Delaware.....	xxx
The Susquehanna.....	xxxi
Reference to appendix for full details.....	xxxi
Necessity of State legislation to keep up the supply.....	xxxii
The Schoodic salmon; land-locked salmon (<i>Salmo salar</i> , subsp. <i>sebago</i>).....	xxxii
Grand Lake Stream station.....	xxxii
Nature and distribution of this fish.....	xxxii
Merits of the fish.....	xxxiii
Work in previous years at other stations.....	xxxiii
Dates of beginning and ending the taking of eggs.....	xxxiii
Statistics of taking of eggs.....	xxxiv
Importance of artificial propagation from these fish.....	xxxiv
Difference in results with the Schoodic and the sea salmon.....	xxxiv
Sebago station.....	xxxiv
The whitefish (<i>Coregonus elupeiformis</i>).....	xxxv
Northville (Mich.) station.....	xxxv
Distribution of impregnated eggs.....	xxxv
The shad (<i>Alosa sapidissima</i>).....	xxxv
General remarks.....	xxxv
Albemarle Sound station.....	xxxv
Assistance rendered by the departments.....	xxxvi

1880. BAIRD, SPENCER F.—Continued.

Equipment and apparatus	xxxvi
Commencement of work	xxxvi
Results of the season	xxxvi
Abundance of herring	xxxvi
Acknowledgments to Col. Marshal Parks	xxxvii
Potomac River station	xxxvii
Havre de Grace station	xxxvii
Shipment of fish	xxxvii
Visits of the President and others	xxxvii
Total yield of shad for the season	xxxvii
Rappahannock station of Colonel McDonald	xxxvii
General result of shad-planting in the United States	xxxvii
The Sacramento River	xxxviii
The Mississippi Valley	xxxviii
At Louisville	xxxviii
Other points	xxxviii
Short rivers of the Gulf of Mexico	xxxix
The Roanoke River	xxxix
The May shad	xxxix
The sea herring (<i>Clupea harengus</i>)	xxxix
The Gloucester station	xxxix
Experiments by Mr. Clark	xxxix
Norman's Land station	xxxix
Experiments of Vinal Edwards	xxxix
Experiments of Dr. Meyer, of Kiel	xl
The carp (<i>Cyprinus carpio</i>)	xl
The Druid Hill Park station	xl
The Washington station	xl
Appropriation by Congress for the Monument Lot pond	xl
Transfer of part of the fish from Druid Hill Park, Baltimore	xli
The Arsenal pond	xli
Freezing of the ponds no injury to the fish	xlii
The cod (<i>Gadus morhua</i>)	xlii
The Gloucester station	xlii
Initiation of the enterprise	xliii
Facilities for the work at Gloucester	xliii
Previous investigations of Sars	xliii
Experiments as to proper apparatus	xliii
Persons engaged in the work	xliii
Close of work in January, 1879	xliii
Experiments on other <i>Gadidæ</i>	xliii
Contemplated arrangements in the future	xliii
Reference to article by Mr. Earll	xliv
The sole (<i>Solea vulgaris</i>)	xliv
Southport station	xliv
Collection of specimens of sole and turbot	xliv
Transfer in charge of Fred Mather	xliv
Failure of the experiment, and its cause	xliv
The sponge	xliv
Experiments of Oscar Schmidt	xlv
Concluding remarks	xlv

D.—THE RELATION OF FISH-CULTURE TO THE AMERICAN FISHERIES.

6. Influence of civilized man on the abundance of animal life	
Illustrations of former abundance of life in America	xlvi
Mammals and birds	xlvi
Fishes	xlvi
Salmon in the Connecticut	xlvi
Shad and herring in the Potomac	xlvi
Striped bass along the coast	xlvi
Marine fishes: the halibut, &c	xlvi
Especial influence of man on abundance of fishes	xlvi
Upon inshore marine fisheries of cod, &c	xlvi
Influenced by decrease of anadromous fish	xlvi
Marine fish follow the anadromous to the coast	xlvi

1880. BAIRD, SPENCER F.—Continued.

Also lie in wait to catch returning adults and young	xlviii
No inducements to come inshore with diminution of anadromous fish	xliv
Consequent necessity to go many miles from land to take cod, &c. . .	xliv
Upon anadromous fishes, as shad, salmon, &c.	xliv
Influence of artificial dams.	xliv
Prevent ascent to spawning grounds.	xliv
Time required to show marked effect.	xliv
Sawdust	1
Coal-tar and factory refuse	1
Nets and pounds	1
Remedies for the decrease	1
Legislation and protection.	1
Artificial propagation	1
7. Political and social importance of increase of fish supply	1
Relation between fish and butchers' meat.	1
Former extent to which fish were used as food.	1
8. Mode of increasing supply of fish	li
By legislation.	li
By fish-culture.	li
Transfer and rearing of parent or young fish and eggs laid naturally.	li
Practice of Chinese.	li
Artificial propagation	lii
General principles and methods.	lii
Economy of artificial propagation compared with natural.	lii
Great superiority in results, of the former.	lii
More complete fertilization of eggs	lii
Protection of eggs and young fish from enemies.	lii
Estimated ratio	lii
History of artificial propagation	lii
In Europe	lii
In America	lii
Trout.	lii
Shad.	liii
Seth Green's method	liii
Ferguson's method	liii
9. Operations of United States Fish Commission.	liii
First established in 1871 for inquiry into the fisheries.	liii
Propagation of fishes added in 1872	liv
Fishes receiving special attention	liv
Shad and its importance	liv
Successful results of planting them	liv
The eastern or Atlantic salmon	liv
Results in the Connecticut and elsewhere.	lv
The California salmon	lv
Advantages over other species.	lv
Great demand and extensive distribution	lv
The German carp	lvi
Best varieties	lvi
Introduction of steam in hatching fish	lvi
Invention of Mr. Ferguson	lvi
Great increase in the number of shad hatched	lvi
Application of apparatus to hatchery of cod.	lvi
Establishment at Gloucester, Mass	lvi
Expectation of extending line of coast cod-fisheries	lvii
Application to hatching of mackerel, halibut, &c.	lvii
Effect on British fisheries of increase in American supply	lvii

E.—TABLES OF DISTRIBUTION OF FISH FOR 1878.

Table I.—Distribution of shad from April 11 to June 14, 1878, by the United States and Maryland Commissions of Fish and Fisheries	lviii
Table II.—Distribution of California salmon reared from eggs collected in 1878*	lxi

* The eggs of the California salmon were hatched out in 1878 but not distributed, for the most part, until 1879. The hatching and distribution were made by the State fishery commissions, except when otherwise stated. The imperfections of the returns will be remedied in the next report.

1880. BAIRD, SPENCER F.—Continued.

Table III.—Distribution of land-locked salmon reared from eggs collected in 1878.
(Deferred until the next report, on account of incomplete returns.)

Table IV.—Distribution of whitefish reared from eggs collected in 1878f. lxiv

II.—APPENDIX TO REPORT OF COMMISSIONER.

APPENDIX A.—PATENTS; LEGISLATION; PROTECTION.

I. Robert G. Dyrenforth. List of patents issued in the United States, Great Britain, and Canada, up to the end of 1878, relating to fish and the methods, products, and applications of the fisheries. By Robert G. Dyrenforth, principal examiner, United States Patent Office	3
American patents	3-15
English patents	11-14
Canadian patents	16
II. Robert G. Dyrenforth. Abstract of patents issued in Great Britain, up to the year 1878, having reference to the pursuit, capture, and utilization of the products of the fisheries. By Robert G. Dyrenforth, M. D., examiner, United States Patent Office. With sixteen plates	17
III. Memorial. A petition to the Fish Commission of the United States, signed by the fishermen of Block Island, June 12, 1877	35
APPENDIX B.—FISHERY EXPOSITIONS.	
IV. A. Feddersen. Abstract of an article from the "No:disk Tidsskrift for Fiskevi," 1878, entitled "Observations on Fishery Expositions," &c. By A. Feddersen	43
V. Joakim Anderssen. Report on the Department of Fisheries in the World's Exposition in Philadelphia, 1876. By Joakim Anderssen, jurymen	47
I. The fishery exhibition in Philadelphia in 1876	47
II. The fisheries of North America	54
III. Brief account of the fisheries of Nova Scotia and Newfoundland	64
IV. Postscript	67

APPENDIX C.—THE SEA FISHERIES.

VI. Frederick M. Wallem. Report on the American fisheries. By Frederick M. Wallem	75
Introductory remarks	75
I. The fresh-fish trade	77
II. Kinds and prices of fish	78
III. A culinary fish dinner, with international dishes	
IV. North America as a market for imported fish products. A few statistics	83
V. Preserving fish with ice, and the significance to Norway of this mode of treatment	89
VI. The American refrigerator	92
VII. Two kinds of refrigerators on board packet steamers for carrying fresh meat	94
VIII. Fresh-water fisheries in America	98
IX. Hatching young fishes for the sake of the fisheries	102
X. Life on board a fishing schooner at sea. Mackerel catching with the purse-seine	108
XI. Concluding remarks	114
VII. H. Widegren. Short introduction to the proper care and management of the Baltic fishery. By H. Widegren, Stockholm, 1874	117
The fauna of the Baltic	117
I. The coast fishery on the coast and in the bays of the Baltic	118
II. The fisheries in the open Baltic	124
VIII. Axel Vilhelm Ljungman. The salt-water fisheries of Bohuslän and the scientific investigation of the salt-water fisheries. By Axel Vilhelm Ljungman	143

† Not hatched until 1879. The hatching and distribution made by the New Jersey Fish Commission. The eggs were collected by F. N. Clark, of Northville, Mich.

1880. BAIRD, SPENCER F.—Continued.

I. The necessary basis for carrying on the Bohuslän salt-water fisheries and the scientific and practical investigations and experiments required for obtaining this basis	143
II. Brief review of our present knowledge of the mode of life and the migrations of the herring, and their physical and biological causes	160

1874. BAIRD, SPENCER F., T. M. BREWER, and R. RIDGWAY. A | History | of | North American Birds | By | S. F. Baird, T. M. Brewer, and R. Ridgway | Land Birds | Illustrated by 64 Colored Plates and 593 Woodcuts. | Volume [1-2-3] | [Cut] | Boston | Little, Brown, and Company | 1874. Three volumes, 4to, pp.: Vol. I, XXVIII, 596, VI; Vol. II, 590, VI; Vol. III, 560, XXVIII.

The present work is designed to meet the want, which has long been felt, of a descriptive account of the Birds of North America, with notices of their geographical distribution, habits, methods of nesting, character of eggs, their popular nomenclature, and other points connected with their life history.

For many years past the only systematic treatises bearing upon this subject have been "The American Ornithology" of Alexander Wilson, finished by that author in 1814, and brought down to the date of 1827 by George Ord; the "Ornithological Biography" of Audubon, bearing the date of 1838, with a second edition "Birds of America," embracing a little more of detail, and completed in 1844; and "A Manual of the Ornithology of the United States and Canada," by Nuttall, of which a first edition was published in 1822 and a second in 1840. Since then no work relating to American Ornithology, of a biographical nature, has been presented to the public, with the exception of some of limited extent, such as those of Girard, on the "Birds of Long Island," in 1844; DeKay's "Birds of N. Y.," 1844; Samuel's "Ornithology and Oölogy of New England," 1868, and a few others; together with quite a number of minor papers on the birds of particular localities of greater or less moment, chiefly

1874. BAIRD, SPENCER F., T. M. BREWER, and R. RIDGWAY—Continued.

published in periodicals and the Proceedings of Societies. The reports of many of the government exploring parties also contain valuable data, especially those of Dr. Newberry, Dr. Heermann, Dr. J. G. Cooper, Dr. Suckley, Dr. Kennerly, and others.

More recently (in 1870) Professor Whitney, Chief of the Geological Survey of California, has published a very important volume on the ornithology of the entire west coast of North America, written by Dr. J. G. Cooper, and containing much original detail in reference to the habits of the western species. This is by far the most valuable contribution to the biography of North American birds that has appeared since the time of Audubon, and, with its typographical beauty and numerous and excellent illustrations, all on wood and many of them colored, constitutes one of the most noteworthy publications in American Zoology.

Up to the time of the appearance of the work of Audubon, nearly all that was known of the great region of the United States west of the Missouri River was the result of the journey of Lewis & Clark up the Missouri and across to the Pacific Coast, and that of John K. Townsend and Mr. Nuttall, both of whom made some collections and brought back notices of the country, which, however, they were unable to explore to any great extent. The entire region of Texas, New Mexico, Colorado, Arizona, Nevada, and California was unvisited, as also a great portion of territory north of the United States boundary, including British Columbia and Alaska.

A work by Sir John Richardson, forming a volume in his series of "Fauna Boreali-Americana," in reference to the ornithology of the region covered by the Hudson Bay Company's operations, was published in 1831, and has been much used by Mr. Audubon, but embraces little or nothing of the great breeding grounds of water birds in the neighborhood of the Great Slave and Bear Lakes, the Upper Yukon, and the shores of the Arctic coast.

It will thus be seen that a third of a century has elapsed since any attempt has been made to present a systematic history of the birds of North America.

The object of the present work is to give, in as concise a form as possible, an account of what is known of the birds, not only of the United States, but of the whole region of North America north of the boundary-line of Mexico, including Greenland on the one side, and Alaska with its islands on the other. The published materials for such a history are so copious that it is a matter of surprise that they have not been sooner utilized, consisting, as they do, of numerous scattered biographies and reports of many government expeditions and private explorations. But the most productive source has been the great amount of manuscript contained in the archives of the Smithsonian Institution, in the form of correspondence, elaborate reports, and field-notes of collectors and travelers, the use of which, for the present work, has been liberally allowed by Professor Henry. By far the most important of these consist of notes made by the late Robert Kennicott in British America, and received from him and other gentlemen in the Hudson Bay Territory, who were brought into intimate relationship with the Smithsonian Institution through Mr. Kennicott's efforts. Among them may be mentioned more especially Mr. R. MacFarlane, Mr. B. R. Ross, Mr. James Lockhart, Mr. Lawrence Clark, Mr. Strachan Jones, and others, whose names will appear in the course of the work. The especial value of the communications received from these gentlemen lies in the fact that they resided for a long time in a region to which a large proportion of the rapacious and water birds of North America resort during the summer for incubation, and which until recently has been sealed to explorers.

Equally serviceable has been the information received from the Yukon River and Alaska generally, including the Aleutian Islands, as supplied by Messrs. Robert Kennicott, William H. Dall, Henry M. Bannister, Henry W. Elliott, and others.

It should be understood that the remarks as to the absence of general works on American Ornithology, since the time of Audubon, apply only to the life-history of the species, as, in 1858, one of the authors of the present work published a systematic account of the birds of North America, constituting volume IX of the series of Pacific Railroad Reports; while from the pen of Dr. Elliott Coues, a well-known and eminent ornithologist, appeared in 1872 a comprehensive volume, entitled "A Key to North American Birds," containing descriptions of the species and higher groups.

The technical, or descriptive, matter of the present work has been prepared by Messrs. Baird and Ridgway, that relating to the *Raptores* entirely by Mr. Ridgway; and all the accounts of the habits of the species are from the pen of Dr. Brewer. In addition to the matter supplied by these gentlemen, Professor Theodore N. Gill has furnished that portion of the introduction defining the class of birds as compared with other vertebrates; while to Dr. Coues is to be given the entire credit for the pages embracing the tables of the Orders and Families, as well as for the Glossary beginning on page 535 of Vol. III.

Nearly all the drawings of the full-length figures of birds contained in the work were made directly on the wood, by Mr. Edwin L. Sheppard, of Philadelphia, from original sketches taken from nature; while the heads were executed for the most part by Mr. Henry W. Elliott and Mr. Ridgway. Both series have been engraved by Mr. Hobart H. Nichols, of Washing-

1874. BAIRD, SPENCER F., T. M. BREWER, and R. RIDGWAY—Continued.

ton. The generic outlines were drawn by Anton H. Schönborn, and engraved by the peculiar process of Jewett, Chandler & Co., of Buffalo. All of these, it is believed, speak for themselves, and require no other commendation.

A considerable portion of the illustrations were prepared, by the persons mentioned above, for the Reports of the Geological Survey of California, and published in the volume on Ornithology. To Professor Whitney, Chief of the Survey, acknowledgments are due for the privilege of including many of them in the present History of North American Birds, and also for the Explanation of Terms on page 526 of Vol. III.

A few cuts, drawn by Wolf and engraved by Whymper, first published in "British Birds in their Haunts," and credited in their proper places, were kindly furnished by the London Society for the Diffusion of Christian Knowledge; and some others prepared for an unpublished volume by Dr. Blasius, on the Birds of Germany, were obtained from Messrs. Vieweg and Son, of Braunschweig.

The volume on the Water Birds is in an advanced state of preparation, and will be published with the least possible delay.

SPENCER F. BAIRD.

II. SYSTEMATIC CATALOGUE.

NOTE.—In the Systematic Catalogue which follows, Professor Baird's writings are classified with reference to the topics of which they treat. It should be noted that the articles in the *Annual Record of Science and Industry*, to which frequent reference is made, are in large part critical notices and reviews of the work of other writers.

ANALYSIS.

	Page.
Mammals.....	247
Birds.....	250
Reptiles and Batrachians.....	253
Fishes and Fisheries.....	255

M A M M A L S .

- 22.—1851. On the ruminating animals of North America and their susceptibility of domestication. <*Report of Commissioner of Patents for 1851*, pp. 104-128, 8 plates.
- 29.—1852. Mammals of the Valley of the Great Salt Lake. <*Stansbury's Exploration and Survey of the Valley of the Great Salt Lake of Utah, etc.* Philadelphia, 1852. [App. C.] pp. 309-313.
- 30.—1852. Mammals Collected by Lieutenant Abert in New Mexico. <*Stansbury's Exploration and Survey of the Valley of the Great Salt Lake of Utah, etc.* Philadelphia, 1852. [App. C.] p. 313.
- 34.—1852. [Note in reference to *Vulpes Utah*, And. and Bach.] <*Proc. Acad. Nat. Sci. Phila.*, vi, 1852-3 (1854), p. 124.
- 59.—1854. Characteristics of some New Species of Mammalia, collected by the U. S. and Mexican Boundary Survey. Part I. <*Proc. Acad. Nat. Sci. Phila.*, vii, pp. 331-3.
- 60.—1854. Characteristics of some New Species of North American Mammalia, collected chiefly in connection with the U. S. Surveys of a Railroad Route to the Pacific. Part I. <*Proc. Acad. Nat. Sci. Phila.*, vii, pp. 333-6.
- 64.—1855. Mammals of Chili. <*Gillis, Naval Astron. Exp.*, ii, pp. 153-162.*
- 65.—1855. List of Mammalia found in Chile. <*Gillis, Naval Astron. Exp.*, ii, pp. 163-171.*
- 72.—1857. [Name *Tamias pallasii* proposed instead of *Sciurus striatus*, Pallas, nec Linn.] <*Eleventh Ann. Rep. Smithsonian Institution*, p. 55.

- 75.—1857. Catalogue of North American Mammals, chiefly in the Museum of the Smithsonian Institution, Washington. Smithsonian Institution, July 1857. 4to. pp. 21.
- 76.—1857. Explorations and Surveys for a Railroad Route from the Mississippi River to the Pacific Ocean: War Department. Mammals. By Spencer F. Baird, Assistant Secretary of the Smithsonian Institution, Washington, D. C., 1857. <Reports of Explorations and Surveys to ascertain the most practicable and economical Route for a Railroad from the Mississippi River to the Pacific Ocean. Volume viii, 1857. 4to. pp. xlviii, 757, pl. xviii—lx.
- *82.—1858. Description of a Phyllostome Bat from California, in the Museum of the Smithsonian Institution. <Proc. Acad. Nat. Sci. Phila., x, 1858, pp. 116, 117.
- 86.—1859. United States and Mexican Boundary Survey, under the order of Lieut. Col. W. H. Emory, Major First Cavalry, and United States Commissioner. Mammals of the Boundary, by Spencer F. Baird, Assistant Secretary of the Smithsonian Institution. With notes by the naturalists of the Survey. <Report on the United States and Mexican Boundary Survey. Volume II, 1859, 4to, 2d part Zoology, pp. (2) + 3—62, pl. xxvii (Mammals); (2) × 3—1.
- 93.—1859. Report upon Mammals collected on the Survey. <Explorations and Surveys for a Railroad Route from the Mississippi River to the Pacific Ocean. War Department. Report of Lieut. E. G. Beckwith, Third Artillery, upon Explorations for a Railroad Route, near the 35th and 39th parallels of north latitude, by Captain J. W. Gunnison, Corps of Topographical Engineers, and near the forty-first parallel of north latitude, by Lieut. E. G. Beckwith, Third Artillery. 1854. Zoological Report, xx, 1857, in Report P. R. R. Surv., vol. x, 1859.
- 97.—1859. Report on Mammals collected on the Survey. <Explorations and Surveys for a Railroad Route from the Mississippi River to the Pacific Ocean. War Department. Routes in California, with the routes near the Thirty-fifth and Thirty-second Parallels, explored by Lieut. R. S. Williamson, Corps of Top. Eng., in 1853. Zoological Report. Washington, D. C. 1859.
- 101.—1859. Mammals of North America; the descriptions of species based chiefly on the collections in the Museum of the Smithsonian Institution. Philadelphia: J. B. Lippincott & Co. 1859. 4to. pp. xxxiv, 1-735+1-55+737-764, pl. i-lxxxvi.
- 172.—1871. Immunity of the Pig from injury by serpent bite. <Ann. Rec., 1871-72, pp. 255, 256.
- 196.—1871. American Tapirs. <Ann. Rec., 1871-72, p. 278.
- 261.—1872. Characteristics of higher groups of Mammals. <Ann. Rec., 1872-73, p. 238.
- 262.—1872. Fur-bearing Animals of New Jersey. <Ann. Rec., 1872-72, p. 240.
- 263.—1872. Capture of Bassaris in Ohio. <Ann. Rec., 1872-73, p. 240.
- 264.—1872. Law in regard to Killing Buffalo. <Ann. Rec. 1872-73, p. 241.
- 265.—1872. New American Mastodon. <Ann. Rec., 1872-73, p. 242.
- 296.—1872. The Proboscidians of the American Eocene. <Ann. Rec., 1872-73, p. 307.
- 297.—1872. The Armed Metalophodon. <Ann. Rec., 1872-73, p. 308.
- 304.—1872. Scammon on the West Coast Cetaceans. <Ann. Rec., 1872-73, p. 312.
- 306.—1871. Origin of the Domestic Dog. <Ann. Rec., 1872-73, p. 317.
- 307.—1872. The Mammals of Thibet. <Ann. Rec., 1872-73, p. 318.
- 313.—1872. A fossil Lemnroid from the Eocene of Wyoming. <Ann. Rec., 1872-73, p. 326.
- 317.—1872. Peculiar Mound Crania. <Ann. Rec., 1872-73, p. 321.

- 318.—1872. Migrations of the California Gray Whale. <Ann. Rec., 1872-73, p. 332.
- 320.—1872. Fossil Elephant in Alaska. <Ann. Rec., 1872-73, p. 333.
- 324.—1872. Fossil Mammals from the West. <Ann. Rec., 1872-73, p. 337.
- 328.—1872. Report of the United States Agricultural Department of Cattle Diseases.
<Ann. Rec., 1872-73, p. 381.
- 383.—1872. Catch of Fur Seals in 1872. <Ann. Rec., 1872-73, p. 435.
- 384.—1872. Oil Works on Unalasehka. <Ann. Rec., 1872-73, p. 436.
- 387.—1872. American Whale Fishery in 1871. <Ann. Rec., 1872-73, p. 437.
- 402.—1872. Rat Catching. <Ann. Rec., 1872-73, p. 458.
- 479.—1873. New Fossil Carnivora. <Ann. Rec., 1873-75, p. 284.
- 480.—1873. Orohippus agilis. <Ann. Rec., 1873-75, p. 286.
- 481.—1873. Maynard on the Mammals of Florida. <Ann. Rec., 1873-75, p. 286.
- 488.—1873. Number of Glyptodonts, or Extinct Giant Armadillos. <Ann. Rec.,
1873-75, p. 302.
- 489.—1873. International Exhibition of Horns. <Ann. Rec., 1873-75, p. 303.
- 495.—1873. New Vertebrate Fossils. <Ann. Rec., 1873-75, p. 308.
- 496.—1873. Aboriginal Monkey. <Ann. Rec., 1873-75, p. 310.
- 500.—1873. The Relationship of the Coyote to the Pointer Dog. <Ann. Rec., 1873-75,
p. 314.
- 505.—1873. Relations of the Megatheriidae. <Ann. Rec., 1873-75, p. 318.
- 535.—1873. Extermination of Field-Mice. <Ann. Rec., 1873-75, p. 412.
- 541.—1873. Is Seal Oil Fish Oil? <Ann. Rec., 1873-75, p. 430.
- 648.—1874. Paucity of Mammals in Cuba. <Ann. Rec., 1874-75, p. 300.
- 649.—1874. Embryology of the Lemurs. <Ann. Rec., 1874-75, p. 301.
- 650.—1874. Genesis of the Horse. <Ann. Rec., 1874-75, p. 301.
- 651.—1874. Extermination of Buffaloes. <Ann. Rec., 1874-75, p. 303.
- 674.—1874. The Species of American Squirrels. <Ann. Rec., 1874-75, p. 332.
- 675.—1874. Relationship of American Deer to their British analogues. <Ann. Rec.,
1874-75, p. 335.
- 676.—1874. The Characters and Relations of the Hyopotamidæ. <Ann. Rec., 1874-75,
p. 336.
- 678.—1874. History of the Pacific Coast Marine Mammals. <Ann. Rec., 1874-75,
p. 338.
- 679.—1874. Decrease in the European Bison. <Ann. Rec., 1874-75, p. 339.
- 681.—1874. Discovery of Putorius nigripes. <Ann. Rec., 1874-75, p. 339.
- 682.—1874. The Fossil Hog of America. <Ann. Rec., 1874-75, p. 340.
- 698.—1874. Taming the Zebra. <Ann. Rec., 1874-75, p. 352.
- 704.—1874. Destructiveness of Rodents in California. <Ann. Rec., 1874-75, p. 397.
- 822.—1875. Fisheries and Seal-Hunting in the White Sea and Northern Ocean.
<Ann. Rec., 1875-76, p. 413.
- 823.—1875. Close time for the Capture of Seals. <Ann. Rec., 1875-76, p. 414.
- 824.—1875. Bad Condition of the Hair-Seal Fisheries. <Ann. Rec., 1875-76, p. 414.
- 900.—1876. Remains of the Irish Elk. <Ann. Rec., 1876-77, p. 300.
- 901.—1876. Revision of the Glires. <Ann. Rec., 1876-77, p. 301.
- 902.—1876. Rapid Destruction of the Buffalo. <Ann. Rec., 1876-77, p. 302.
- 903.—1876. Geographical variations among North American Mammals, especially in
respect to size. <Ann. Rec., 1876-77, p. 302.
- 904.—1876. A New Porpoise in New York Bay. <Ann. Rec., 1876-77, p. 304.
- 937.—1876. Seal-Fisheries of 1876 on the Greenland Coast. <Ann. Rec., 1876-77,
p. 389.
- 938.—1876. Close time for Seals in the Northern Sea. <Ann. Rec., 1876-77, p. 389.
- 939.—1876. Report on Alaska Seal Islands. <Ann. Rec., 1876-77, p. 389.

BIRDS.

- 1.—1843. Descriptions of two Species, supposed to be new, of the Genus *Tyrannula*, Swainson, found in Cumberland County, Pennsylvania. <*Proc. Acad. Nat. Sci. Phila.*, i, pp. 283-285, 1843.
- 2.—1844. List of Birds found in the vicinity of Carlisle, Cumberland County, Penn., about Lat. 40° 12' W., Lon. 77° 11' W. <*Amer. Journ. Sci. and Arts*, xlvi, 1844, pp. 261-273.
- 3.—1844. Descriptions of two species, supposed to be new, of the genus *Tyrannula* (Swainson), found in Cumberland Co., Penn. <*Amer. Journ. Sci. and Arts*, xlvi, 1846, pp. 273-276.
- 6.—1845. Catalogue of birds found in the neighborhood of Carlisle, Cumberland Co., Pa. <*Lit. Rec. and Journ. Linnean Assoc. Pennsylvania College*, i, 1845, pp. 249-257.
- 9.—1847. Dr. Leidy read a letter from Prof. Spencer F. Baird, of Carlisle, Pa., describing a Hybrid between the Canvass back Duck and the Common Duck. <*Proc. Acad. Nat. Sci. Phila.*, iii, 1846 and 1847, p. 209.
- 31.—1852. Birds [of the Valley of the Great Salt Lake]. <*Stansbury's Exploration and Survey of the Valley of the Great Salt Lake of Utah, etc.* Philadelphia, 1852. [App. C.] pp. 314-325.
- 31.—1852. Birds collected in New Mexico by Lieut. Abert. <*Stansbury's Exploration and Survey of the Valley of the Great Salt Lake of Utah, etc.* Philadelphia, 1852. [App. C.] pp. 325, 326.
- 32.—1852. List of birds inhabiting America, west of the Mississippi, not described in Audubon's Ornithology. <*Stansbury's Exploration and Survey of the Valley of the Great Salt Lake, etc.* Philadelphia, 1852. [App. C.] pp. 327-335.
- 40.—1852. Description of a new Species of *Sylvicola*. <*Ann. Lyc. Nat. Hist. N. Y.*, v, 1852, pp. 217, 218, pl. vi.
- 56.—1854. Descriptions of New Birds collected between Albuquerque, N. M., and San Francisco, California, during the winter of 1853-54, by Dr. C. B. R. Kennerly and H. B. Müllhausen, Naturalists attached to the Surveys of the Pacific R. R. Route, under Lt. A. W. Whipple. <*Proc. Acad. Nat. Sci. Phila.*, vii, pp. 118-20.
- 74.—1857. American Oology. <*Edinb. New Philos. Journal*, new ser., v, 1857, p. 374.
- 78.—1858. Explorations and Surveys for a Railroad Route from the Mississippi River to the Pacific Ocean. War Department. Birds. By Spencer F. Baird, Assistant Secretary Smithsonian Institution, with the co-operation of John Cassin and George N. Lawrence. Washington, D. C., 1858, pp. i-lvi 1-1005. (No illustrations.) Dated Washington, Oct. 20, 1853.
- 79.—1858. Birds found at Fort Bridger, Utah. <*Pacific Railroad Report*, ix, 1858, App. B, pp. 926, 927.
- 80.—1858. Catalogue of North American Birds, chiefly in the Museum of the Smithsonian Institution. Washington: Smithsonian Institution, October, 1858, 4to. pp. xv-lvi.
- 83.—1858. "Description of a new Sparrow collected by Mr. Samuels in California." <*Proc. Bost. Soc. Nat. Hist.*, vi, pp. 379, 380, Aug., 1858. Read June 2.
- 87.—1859. United States and Mexican Boundary Survey, under the order of Lieut. Col. W. H. Emory, Major First Cavalry, and United States Commissioner. Birds of the Boundary, by Spencer F. Baird, Assistant Secretary of the Smithsonian Institution. With notes by the Naturalists of the Survey. Report on the United States and Mexican

- 87.**—1859. United States and Mexican Boundary—Continued.
Boundary Survey, made under the direction of the Secretary of the Interior, by William H. Emory, Major First Cavalry, and United States Commissioner. Volume ii, Washington: Cornelius Wendell, Printer. 1859. 4to. pp. (2) 3-33 (1) pl. xxv.
- 90.**—1859. Smithsonian Miscellaneous Collections. Catalogue of North American Birds, chiefly in the Museum of the Smithsonian Institution. [First octavo edition.] Washington: Smithsonian Institution. 1859. 8vo. 2 p. ll., pp. 19 + 2.
- 94.**—1859. No. 2. Report on Birds collected on the Survey. <Explorations and Surveys for a Railroad Route from the Mississippi River to the Pacific Ocean. War Department. Report of Lieut. E. G. Beckwith, Third Artillery, upon Explorations for a Railroad Route, near the 38th and 39th parallels of north latitude, by Captain J. W. Gunnison, Corps of Topographical Engineers, and near the forty-first parallel of north latitude, by Lieut. E. G. Beckwith, Third Artillery. 1854. pp. 11-16, pl. xii, xiii, xiv, xv, xvii, xxxii, xxxv, in Rep. P. R. R. Surv., vol. x. Third article.
- 98.**—1859. “[Résumé of Ornithological Field Operations in progress in America, etc.] <*Ibis*, i,” 1859, pp. 334, 335.
- 99.**—1859. Notes on a collection of Birds made by Mr. John Xantus, at Cape St. Lucas, Lower California, and now in the Museum of the Smithsonian Institution. <*Proc. Acad. Nat. Sci. Phila.*, xi, 1859 (1860), pp. 299-306.
- 103 (104).**—1860. The Birds of North America; the descriptions of Species based chiefly on the Collections in the Museum of the Smithsonian Institution. By Spencer F. Baird, Assistant Secretary of the Smithsonian Institution, with the co-operation of John Cassin, of the Academy of Natural Sciences of Philadelphia, and George N. Lawrence, of the Lyceum of Natural History of New York. With an Atlas of One Hundred Plates. Text. Philadelphia: J. B. Lippincott & Co. 1860. 4to. pp. lvi, 1005.
- 106.**—1861. Smithsonian Miscellaneous Collections; instructions in reference to collecting Nests and Eggs of North American Birds. 8vo. pp. 82. (No title-page.)
- 108.**—1861. Report upon the Colorado River of the West, Explored in 1857 and 1858 by Lieutenant Joseph C. Ives, Corps of Topographical Engineers, under the direction of the Office of Explorations and Surveys, A. A. Humphreys, Captain Topographical Engineers, in charge. By order of the Secretary of War. Washington: Government Printing Office. 1861. 1 vol., 4to.
List of birds. pp. 5-6. (This part dated 1860.)
- 111.**—1863. [Notice of R. Kennicott's and J. Xantus's Movements in North America.] <*Ibis*, v, 1863, pp. 238, 239.

- 80.—1858. Catalogue of North American Birds, chiefly in the Museum of the Smithsonian Institution. By Spencer F. Baird, Assistant Secretary of the Smithsonian Institution. Washington: Smithsonian Institution. October, 1858. 4to. pp. xv-lvi.
- 87.—1859. Birds of the Boundary, by Spencer F. Baird, Assistant Secretary of the Smithsonian Institution. With notes by the Naturalists of the Survey. United States and Mexican Boundary Survey, under the order of Lieut.-Col. W. H. Emory, Major First Cavalry, and United States Commissioner. <pp. (2) 3-35 (1) pl. xli.

- 88.**—1859. United States and Mexican Boundary Survey, under the order of Lieut. Col. W. H. Emory, Major First Cavalry, and United States Commissioner. Reptiles of the Boundary, by Spencer F. Baird, Assistant Secretary of the Smithsonian Institution. With notes by the Naturalists of the Survey. pp. (2) 3-35, pll. xli (for title of volume see under 80 and 81). <Ibid.
- 91.**—1859. Smithsonian Miscellaneous Collections. Catalogue of North American Birds, chiefly in the Museum of the Smithsonian Institution. By Spencer F. Baird. Washington: Smithsonian Institution. 1859. 8vo. 2 p. ll., pp. 19 + 2.
- 93.**—1859. Report upon Mammals collected on the Survey. <Explorations and Surveys for a Railroad Route from the Mississippi River to the Pacific Ocean. Report of Lieut. E. G. Beckwith, Third Artillery, upon Explorations for a Railroad Route, near the 38th and 39th parallels of north latitude, by Captain J. W. Gunnison, Corps of Topographical Engineers, and near the forty-first parallel of north latitude, by Lieut. E. G. Beckwith, Third Artillery. 1854. Zoological Report, xx, 1857, in Report P. R. R. Surv., vol. x, 1859. Third Article, pp. (1) 7-9 (1), pll. v-x.
- 94.**—1859. Report on Birds collected on the Survey. <Explorations and Surveys for a Railroad Route from the Mississippi River to the Pacific Ocean. War Department. Report of Lieut. E. G. Beckwith, Third Artillery, upon Explorations for a Railroad Route, near the 38th and 39th parallels of north latitude, by Captain J. W. Gunnison, Corps of Topographical Engineers, and near the forty-first parallel of north latitude, by Lieut. E. G. Beckwith, Third Artillery. 1854. pp. 27, pll. xii, xiii, xiv, xv, xvii, xxxii, xxxv, in Rep. P. R. R. Surv., vol. x.
- 95.**—1859. No. 3. Report on Reptiles collected on the Survey. <Explorations and Surveys for a Railroad Route from the Mississippi River to the Pacific Ocean. War Department. Report of Lieut. E. G. Beckwith, Third Artillery, upon Explorations for a Railroad Route, near the 38th and 39th parallels of north latitude, by Captain J. W. Gunnison, Corps of Topographical Engineers, and near the forty-first parallel of north latitude, by Lieut. E. G. Beckwith, Third Artillery. 1854. pp. 17-20 [in Rep. P. R. R. Surv., vol. x, third article], pll. xvii, xviii, xxiv.
- 96.**—1859. No. 4. Report upon the Reptiles of the Route. <Explorations and Surveys for a Railroad Route from the Mississippi River to the Pacific Ocean. War Department. Route near the Thirty-fifth Parallel, explored by Lieutenant A. W. Whipple, Topographical Engineers, in 1853 and 1854. Zoological Report. Washington, D. C. 1859. [In vol. x, Report P. R. R. Surv., part vi, No. 4.] pp. 37-45, pll. xxv, xxvi, xxvii.
- 97.**—1859. Report on Mammals collected on the Survey. <Explorations and Surveys for a Railroad Route from the Mississippi River to the Pacific Ocean. War Department. Routes in California, to connect with the routes near the Thirty-fifth and Thirty-second Parallels, explored by Lieut. R. S. Williamson, Corps of Top. Eng., in 1853. Zoological Report. Washington, D. C. 1859. [In vol. x, Report P. R. R. Surv., part iv, art. 3.] pp. 81, 82.
- 99.**—1859. Notes on a collection of Birds made by Mr. John Xantus, at Cape St. Lucas, Lower California, and now in the Museum of the Smithsonian Institution. <Proc. Acad. Nat. Sci. Phila., xi, 1859 (1860), pp. 299-306.

- 103.—1860. The Birds of North America; the descriptions of species based chiefly on the collections in the Museum of the Smithsonian Institution. By Spencer F. Baird, Assistant Secretary of the Smithsonian Institution, with the co-operation of John Cassin, of the Academy of Natural Sciences of Philadelphia, and George N. Lawrence, of the Lyceum of Natural History of New York. With an Atlas of One Hundred Plates. Text. Philadelphia: J. B. Lippincott & Co. 1860. 4to. pp. lvi, 1005.
- 115.—[1864-66.] Smithsonian Miscellaneous Collections. Review of American Birds, in the Museum of the Smithsonian Institution. By S. F. Baird. Part I. North and Middle America. [Medallion.] Washington; Smithsonian Institution. [No date on title: June, 1864, to p. 33; July 1864, to p. 81; Aug., 1864, to p. 129; Sept., 1864, to p. 145; Oct., 1864, to p. 161; Nov., 1864, to p. 177; Apr., 1865, to p. 241; May, 1865, to p. 321; May, 1866, to p. 417; June, 1866, to end.] 1 vol. 8vo. Originally issued in sheets as successively printed, at above dates. pp. iv, 450.
- 118.—1866. The Distribution and Migrations of North American Birds; by Spencer F. Baird, Assistant Secretary Smithsonian Institution. (Abstract of a memoir presented to the National Academy of Sciences, Jan., 1865.) <Amer. Jour. Sci. and Arts (2), xli, pp. 78-90, 184-92, 337-47.
- 123.—1866. Prof. Spencer F. Baird. Die Verbreitung und Wanderungen der Vögel Nord-Amerika's. <Journal für Ornithologie, xiv, 1866, pp. 244-269, 338-352.
Translated from *American Journal of Science and Arts*, vol. xli, 1866.

EXPLORATION AND GEOGRAPHY.

- 24.—1852. An account of natural history explorations in the United States during 1851. <*Sixth Annual Report Smithsonian Institution for the year 1851, 1852*, pp. 52-56. Appendix A to Report of Assistant Secretary.
 42.—1853. Account of scientific explorations and reports on explorations, made in America during the year 1852. <*Seventh Annual Report Smithsonian Institution for the year 1852, 1853*, pp. 52-65. Appendix A to Assistant Secretary's Report.
 72.—1855. Report on American Explorations in the years 1853 and 1854. <*Ninth Annual Report Smithsonian Institution (1854), 1855*, pp. 79-97.
 68.—1856. [Report of the Assistant Secretary of the Smithsonian Institution for the year 1855.] <*Tenth Annual Rep. Smithsonian Institution (1855), 1856*, pp. 36-61.
 71.—1857. [Report of the Assistant Secretary of the Smithsonian Institution for the year 1856.] <*Eleventh Annual Rep. Smithsonian Institution for the year 1856, 1857*, pp. 47-68.
 81.—1858. [Report for 1857 of the Assistant Secretary of the Smithsonian Institution.] <*Ann. Rep. Smithsonian Institution for the year 1857, 1858*, pp. 38-54.
 89.—1859. Report for 1858 of the Assistant Secretary of the Smithsonian Institution. <*Ann. Rep. Smiths. Inst. for the year 1858, 1859*, pp. 44-62.
 98.—1859. S. F. BAIRD'S Résumé of Ornithological Field Operations in progress in America, etc. <*Ibis*, i, 1859, pp. 334, 335.
 102.—1860. [Report for 1859 of the Assistant Secretary of the Smithsonian Institution.] <*Ann. Rep. Smiths. Inst. for the year 1859, 1860*, pp. 54-78.
 107.—1861. [Report for 1860 of the Assistant Secretary of the Smithsonian Institution.] <*Ann. Rep. Smithsonian Institution for the year 1860, 1861*, pp. 55-86.
 American explorations of the year..... pp. 66-72
 Continuation of enumeration of collections in the Museum, Nos. 73-94. 75
 109.—1862. [Report for 1861 of the Assistant Secretary of the Smithsonian Institution.] <*Ann. Rep. Smithsonian Institution for the year 1861, 1860*, pp. 48-67.
 Explorations of the year..... pp. 58-61
 110.—1863. [Report for 1862 of the Assistant Secretary of the Smithsonian Institution.] <*Ann. Rep. Smithsonian Institution for the year 1862, 1863*, pp. 46-59.
 111.—1863. [Notice of R. Kennicott's and J. Xantus's Movements in North America.] <*Ibis*, v, 1863, pp. 238, 239.
 112.—1863. [Letter on J. Xantus's collections at Colima, Mexico.] <*Ibis*, v, 1863, p. 476.

- 113.—1864. [Report for 1863 of the Assistant Secretary of the Smithsonian Institution.] <Ann. Rep. Smithsonian Institution for the year 1863, 1864, pp. 44-63.
Explorations of the year..... pp. 52-56
- 116.—1865. Report of the Assistant Secretary (of the Smithsonian Institution for the year 1864). <Ann. Rep. Smithsonian Institution for the year 1864, 1865, pp. 74-100.
Explorations of the year..... pp. 81-84
- 117.—1866. Report of the Assistant Secretary, Spencer F. Baird, relative to exchanges, collections of Natural History, &c. <Ann. Rep. Smithsonian Institution for the year 1865, pp. 75-88.
- 126.—1868. Report of Prof. S. F. Baird (Assistant Secretary of the Smithsonian Institution, for the year 1867). <Ann. Rep. Smithsonian Institution for the year 1867, 1868, pp. 64-78.
The report on the additions to the Museum and on the explorations, hitherto given in the report of the Assistant Secretary, are this year and afterwards incorporated in the report of the Secretary.
- 128.—1869. Explorations and Collections in Natural History (etc.). <Ann. Rep. Smithsonian Institution for the year 1868, 1869 (in Rep. of the Secretary, pp. 22-41 +) and pp. 54-67.
- 134.—1871. Rocky Mountain Explorations. <Annual Record of Science and Industry, 1871-72, p. 131.
- 135.—1871. Explorations of Professor Powell. <Ann. Rec., 1871-72, pp. 132, 133.
- 136.—1871. Explorations of Professor Cope. <Ann. Rec., 1871-72, pp. 133, 134.
- 137.—1871. Headwaters of the Yellowstone. <Ann. Rec., 1871-72, p. 137.
- 138.—1871. Raymond's Report on the Yukon. <Ann. Rec., 1871-72, pp. 138, 139.
- 139.—1871. Explorations in Vineyard Sound [by Professor Verrill]. <Ann. Rec., 1871-72, p. 140.
- 140.—1871. Explorations in the West Indies. <Ann. Rec., 1871-72, pp. 141, 142.
- 141.—1871. Explorations of Dr. Habel (in South America). <Ann. Rec., 1871, pp. 142, 143.
- 142.—1871. Explorations of Professor Hartt (in Brazil). <Ann. Rec., 1871-72, pp. 146, 147.
- 192.—1871. Zoological Stations in the Gulf of Naples. <Ann. Rec., 1871-72, pp. 274, 275.
- 193.—1871. Verrill's Exploration in New Jersey. <Ann. Rec., 1871-72, p. 276.
- 194.—1871. Dr. Stimpson's Exploration in Florida. <Ann. Rec., 1871-72, p. 377.
- 213.—1871. Return of Mr. Gwyn Jeffreys to England. <Ann. Rec., 1871-72, p. 608.
- 219.—1872. Explorations and Collections (of the Smithsonian Institution in the year 1871). <Ann. Rep. Smithsonian Institution for the year 1871, 1872, in Report of Secretary, pp. 26-34 + 42-62.
- 220.—1872. [Instructions to Capt. C. F. Hall for collecting objects of Natural History on the Expedition toward the North Pole.] <Ann. Rep. Smithsonian Institution for the year 1871, 1872, pp. 379-381.
- 223.—1872. Yellowstone Park. <Ann. Rec., 1872-73, p. 125.
(Notice of passage of law establishing National Park.)
- 224.—1872. Second Report of the Geological Survey of Indiana for 1870. <Ann. Rec., 1872-73, p. 125.
- 225.—1872. Report of the Geological Survey of Ohio for 1870. <Ann. Rec., 1872-73, p. 125.
- 226.—1872. Report of Professor Hayden's Explorations. <Ann. Rec., 1872-73, p. 126.

Memorandum given to Mr. L. Kumlein.

SPECIAL PAPERS IN THE REPORT OF THE UNITED STATES COMMISSIONER OF FISHERIES.

[Report for 1871.] See Nos. 421 and 422, pp. vii-xl. [Analysis, see above, pp. 134-135.]

- 423.—1873. Memoranda of inquiry relative to the Food-Fishes of the United States. <Rep. U. S. Comm. Fish and Fisheries, part i, 1873, pp. 1-3.

- 424.—1873. Questions relative to the Food-Fishes of the United States. <Rep. U. S. Comm. Fish and Fisheries, part i, 1873, pp. 3-6.
- 425.—1873. Testimony in regard to the present condition of the Fisheries, taken in 1871. <Rep. U. S. Comm. Fish and Fisheries, part i, 1873, pp. 7-72.
- 426.—1873. Report of conference held [by the U. S. Commissioner of Fish and Fisheries] at Boston, October 5, 1871, with the Fishery Commissioners of Massachusetts and Rhode Island. <Rep. U. S. Comm. Fish and Fisheries, 1873, part i, pp. 125-131.
- 427.—1873. Draught of law proposed for the consideration of and enactment by the Legislatures of Massachusetts, Rhode Island, and Connecticut. <Rep. U. S. Comm. Fish and Fisheries, part i, 1873, pp. 132-134.
- 428.—1873. Notices in regard to the Abundance of Fish on the New England Coast in former times. <Rep. U. S. Comm. Fish and Fisheries, part i, 1873, pp. 148-172.
- 429.—1873. Statistics of Fish and Fisheries on the South Shore of New England. <Rep. U. S. Comm. Fish and Fisheries, part i, 1873, pp. 172-181.
- 430.—1873. Supplementary Testimony and Information relative to the Condition of the Fisheries of the South Side of New England, taken in 1872. <Rep. U. S. Comm. Fish and Fisheries, part i, 1873, pp. 182-195.
- 431.—1873. Natural History of some of the more important Food-fishes of the South Shore of New England.—I. The Scup, *Stenotomus argyrops*, (Linn.,) Gill. <Rep. U. S. Comm. Fish and Fisheries, part i, 1873, pp. 228-235.
- 432.—1873. [Natural History of some of the more important Food-fishes of the South Shore of New England.]—II. The Blue-Fish, *Pomatomus saltatrix*, (Linn.,) Gill. <Rep. U. S. Comm. Fish and Fisheries, part i, 1873, pp. 235-252.
- 433.—1873. Description of Apparatus used in capturing Fish on the Sea-coast and Lakes of the United States. <Rep. U. S. Comm. Fish and Fisheries, part i, 1873, pp. 253-274.
- 434.—1873. List of Patents granted by the United States to the end of 1872, for inventions connected with the Capture, Utilization or Cultivation of Fishes and Marine Invertebrates. <Rep. U. S. Comm. Fish and Fisheries, part i, 1873, pp. 275-280.
- 435.—1873. List of Fishes collected at Wood's Hole. <Rep. U. S. Comm. Fish and Fisheries, part i, 1873, pp. 823-827.
- 627 and 628.—Report of Commission for 1872-3.—Letters 627 and 628, pp. I-XCH. [Analysis above, pp. 154-157.]

PUBLICATIONS AS COMMISSIONER OF FISHERIES.

C I R C U L A R S.

- 133.—1871. [Letter addressed to fishermen and others living on the shores of Lake Michigan, and announcing that fishes with metallic tags had been liberated at twenty points, and asking for information about the subsequent capture.] 8vo., 1 page. Serial mark E—y. Dated October 30, 1871. [U. S. F. C., 1.]
- 216.—1872. Memoranda of Inquiry relative to the food-fishes of the United States. [Washington: Government Printing Office, 1872.] 8vo. 5 pp. No title-page. [U. S. F. C., 2.]
- 217.—1872. Questions relative to the food-fishes of the United States. [Washington: Government Printing Office, 1872.] 8vo. 7 pp. No title-page. [U. S. F. C., 3.]
- 218.—1872. Letter to accompany No. 217, inviting information concerning food-fishes. 1 p., letter size. [U. S. F. C., 4.]
- 419.—1873. Statistics of the Menhaden Fisheries, etc. (E γ). [Questions addressed to fishermen, etc.]—Washington, December 20, 1873. 4to., letter form, 2 l. [U. S. F. C., 5.]
- 631.—1874. Statistics of the Menhaden Fisheries, etc. (12). [Questions addressed to fishermen, etc.]—Washington, December 20, 1873. 4to., letter form, 2 l. Reprint of U. S. F. C., 5 [U. S. F. C., 10].
- 770.—1875. (E) ζ . U. S. Commission of Fish and Fisheries. Statistics of the Fishery Marine. Circular. [U. S. F. C., 12.] [Foolscap size, 2 pp. Washington: Government Printing Office, 1875.] [U. S. F. C. 12.]
The blank tables to accompany this circular were printed in uniform style, and are registered (U. S. F. C., 11). Prepared by G. Brown Goode.
- 984.—1877. (E) η . U. S. Commission of Fish and Fisheries. Questions relative to the Food-fishes of the United States. Foolscap, one sheet. 4 pp. Government Printing Office, 1877. [U. S. F. C. 15.]
A new edition of the circular bearing the same title, previously issued. [U. S. F. C., 3= No. 217.]
- 985.—1877. (E) θ . U. S. Commission of Fish and Fisheries. Statistics of the Mackerel Fisheries, etc. Circular. [1 page, foolscap. Washington: Government Printing Office, 1877.] [U. S. F. C., 16.] To accompany circular No. 984. [U. S. F. C., 15.]
- 986.—1877. (E) ι . U. S. Commission of Fish and Fisheries. Statistics of the Cod Fisheries, etc. Circular. [1 page, foolscap. Washington: Government Printing Office, 1877.] [U. S. F. C., 17.] To accompany circular No. 984. [U. S. F. C., 15.]
- 987.—1877. (E) κ . U. S. Commission of Fish and Fisheries. Statistics of the Mullet Fisheries, etc. Circular. [1 page, foolscap. Washington: Government Printing Office, 1877.] [U. S. F. C., 18.] To accompany circular No. 984. [U. S. F. C., 15.]

- 988.—1877. (E) $\frac{p}{p}$. U. S. Commission of Fish and Fisheries. Statistics of Coast and River Fisheries. [4 pp., foolscap. Government Printing Office, 1877. Oct.] [U. S. F. C., 19.]
- 1005.—1878. (E) $\frac{p}{p}$. U. S. Commission of Fish and Fisheries. Questions relative to the Cod and the Cod Fisheries. [Foolscap size. 4 pp. Washington: Government Printing Office, 1878.] [U. S. F. C., 28.]
- 1006.—1878. $\frac{167}{167}$, $\frac{p}{p}$. U. S. Commission of Fish and Fisheries. Questions relative to the Alewife and the Alewife Fisheries. [Foolscap size. 4 pp. Washington: Government Printing Office, 1878.] [U. S. F. C., 29.]
- 1007.—1878. $\frac{182}{182}$, $\frac{p}{p}$. U. S. Commission of Fish and Fisheries. Questions relative to the Smelt and Smelt Fisheries. [Foolscap size. 4 pp. Washington: Government Printing Office, 1878.] [U. S. F. C., 30.]
- 1007.—1878. (E) $\frac{p}{p}$. U. S. Commission of Fish and Fisheries. Questions relative to the Mackerel and Mackerel Fisheries. [Foolscap size. 4 pp. Washington: Government Printing Office, 1879.] [U. S. F. C., 32.]

REPORTS.

I.

- 421.—1873. 42d Congress, 2d session. Senate Mis. Doc. No. 61. United States Commission on Fish and Fisheries. Part I. Report on the condition of the sea fisheries of the south coast of New England in 1871 and 1872, by Spencer F. Baird, Commissioner. Washington: Government Printing Office. 1873. 8vo. pp. (5) 6-4 (1). [U. S. F. C.—6.]
- The report of the Commissioner, without supplementary papers, pp. xlvii, was issued separately in advance, pagged in Arabic numbers.
- 422.—1873. 42d Congress, 2d session. Senate Mis. Doc. No. 61. United States Commission of Fish and Fisheries. Part I. Report on the condition of the sea fisheries of the south coast of New England in 1871 and 1872, by Spencer F. Baird, Commissioner. With supplementary papers. Washington: Government Printing Office. 1873. 8vo. pp. xlvii, 852, plates xxxviii, with 38 leaves explanatory to plates, 2 maps. [U. S. F. C.—7.]
- Report in full—for contents see above, pp. 134-138, above.
- This report includes papers numbered 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, for titles of which see *Chronological Catalogue*, pp. 138-140 above.
- 627.—1874. United States Commission of Fish and Fisheries. Part II. Report of the Commissioner for 1872 and 1873. A.—Inquiry into the decrease of the food-fishes. B.—The propagation of food-fishes in the waters of the United States. Washington: Government Printing Office. 1874. 8vo. pp. (v) vi-viii, (1) 2-92. [U. S. F. C., No. 8.]
- Report without supplementary papers.
- 628.—1874. United States Commission of Fish and Fisheries. Part II. Report of the Commissioner for 1872 and 1873. A.—Inquiry into the decrease of the food-fishes. B.—The propagation of food-fishes in the waters of the United States. With supplementary papers. Washington: Government Printing Office. 1874. 8vo. pp. cii, 808, pls. xxxvii, 4 maps. [U. S. F. C., No. 9.]
- Full Report—for contents see above pages 154-165, above.
- Contains title 630.
- 889.—1876. United States Commission of Fish and Fisheries. Part III. Report of the Commissioner for 1873-4 and 1874-5. A.—Inquiry into the decrease of the food-fishes. B.—The propagation of food-fishes in the waters of the United States. Washington: Government Printing Office. 1876. 8vo. pp. (v) vi-xlvi. [U. S. F. C., 13.]
- Report without supplementary papers.

890.—1876. United States Commission of Fish and Fisheries. Part III. Report of the Commissioner for 1873-4 and 1874-5. A.—Inquiry into the decrease of the food-fishes. B.—The propagation of food-fishes in the waters of the United States. Washington: Government Printing Office. 1876. 8vo. pp. lii, 777. [U. S. F. C., 14.]

Full Report—for contents see pages 184-190, above.

1002.—3878. United States Commission of Fish and Fisheries. Part IV. Report of the Commissioner for 1875-1876. A.—Inquiry into the decrease of the food-fishes. B.—The propagation of food-fishes in the waters of the United States. Washington: Government Printing Office, 1878. 8vo. pp. ix, 50*, 1029, plates vi (Hist. of Whale Fishery). [U. S. F. C., 26.]

Report without supplementary papers.

1003.—1878. United States Commission of Fish and Fisheries. Part IV. Report of the Commissioner for 1875-1876. A.—Inquiry into the decrease of the food-fishes. B.—The propagation of food-fishes in the waters of the United States. Washington: Government Printing Office. 1878. 8vo. pp. ix, 50*, 1029, plates vi (Hist. of Whale Fishery). [U. S. F. C., 27.]

Full Report, for contents see pp. 199-204, above.

1030.—1879. United States Commission of Fish and Fisheries. Part V. Report of the Commissioner for 1877. A.—Inquiry into the decrease of food-fishes. B.—The propagation of food-fishes in the waters of the United States. Washington: Government Printing Office. 1879. 8vo. pp. 48. [U. S. F. C., 37.]

Report without supplement.

1031.—1879. United States Commission of Fish and Fisheries. Part V. Report of the Commissioner for 1877. A.—Inquiry into the decrease of food-fishes. B.—The propagation of food-fishes in the waters of the United States. Washington: Government Printing Office. 1879. 8vo. pp. 48, 972. [U. S. F. C., 38.]

Full Report, for contents see pp.—208-215, above.

1051.—1880. United States Commission of Fish and Fisheries. Part VI. Report of the Commissioner for 1878. A.—Inquiry into the decrease of food-fishes. B.—The propagation of food-fishes in the waters of the United States. Washington: Government Printing Office 1880. 8vo. pp. lxiv.

(Report of the Commissioner without supplementary papers.)

1952.—1880. United States Commission of Fish and Fisheries. Part VI. Report of the Commissioner for 1878. A.—Inquiry into the decrease of food-fishes. B.—The Propagation of food-fishes in the waters of the United States. Washington: Government Printing Office. 1880. 8vo. pp. lxiv.

Full Report—for table of contents. See above, pp. 217-226, above.

ANNUAL RECORD OF SCIENCE AND INDUSTRY.

(I.)

221.—1872. Annual Record of Science and Industry for 1871. Edited by Spencer F. Baird, with the assistance of eminent men of science. [Cut.] New York: Harper & Brothers, publishers, Franklin Square, 1872 [8vo. pp. xxxii, 634] Titles 134 to 215, 222.

(II.)

417.—1873. Annual Record of Science and Industry for 1872. Edited by Spencer F. Baird, with the assistance of eminent men of science. [Cut.] New York: Harper & Brothers, Publishers, Franklin Square. 1873. (8vo. pp. lxxviii, 650.) Titles 223-416.

(III.)

- 756.**—1875. Annual Record of Science and Industry for 1873. Edited by Spencer F. Baird, with the assistance of Eminent Men of Science. [Cut.] New York: Harper & Brother, Publishers, Franklin Square. 1875. (8vo. pp. cxxxii, 714. Titles 439-613, 757-60.

(IV.)

- 762.**—1875. Annual Record of Science and Industry for 1874. Edited by Spencer F. Baird, with the assistance of Eminent Men of Science. [Cut.] New York: Harper & Brother, Publishers, Franklin Square. 1875. (8vo. pp. cciv, 665.) Titles 632-761, 763-65.

(V.)

- 883.**—1876. Annual Record of Science and Industry for 1875. Edited by Spencer F. Baird, with the assistance of eminent men of science. [Cut.] New York: Harper & Brothers, Publishers, Franklin Square. 1876. (8vo. pp. ccxc. 656.) Titles 777-881, 884. 7.

(VI.)

- 970.**—1877. Annual Record of Science and Industry for 1876. Edited by Spencer F. Baird, with the assistance of Eminent Men of Science. [Cut.] New York: Harper & Brothers, publishers, Franklin Square. 1877. [8vo. pp. ccxxxvi, 609.] Titles 896-969, 971-74.

(VII.)

- 1004.**—1878. Annual Record of Science and Industry for 1877. Edited by Spencer F. Baird, with the assistance of eminent men of science. [Cut.] New York: Harper & Brothers, Publishers, Franklin Square. 1878. 8vo. pp. xiv, 480.—Preface dated March 1, 1878.

(VIII.)

- 1020.**—1879. Annual Record of Science and Industry for 1878. Edited by Spencer F. Baird, with the assistance of eminent men of science. [Cut.] New York: Harper & Brothers, Publishers, Franklin Square. 1879. 8vo. pp. xvii (i), 715. Preface dated March 1, 1879.

III. LIST OF SPECIES DISCUSSED AND ILLUSTRATED.

NOTE.

Under each of the classes mentioned in the analysis the genera and species are arranged alphabetically according to their generic and specific designations. These lists will be of importance chiefly to persons familiar with the synonymy of the several groups. The importance of this collation of references to descriptions and illustrations prepared by Professor Baird will be evident, since his work carried him over the entire field of North American vertebrate zoology, and every mammal, bird, and reptile known at the time of his researches was exhaustively treated, as well as a large number of fishes. These lists have also a definite value as constituting a key to the major portion of the descriptive work accomplished in the National Museum during the first twenty years of its history. The names of all the species illustrated by engravings or lithographs are printed in SMALL CAPS; the list thus serves as an index to the very numerous illustrations prepared under the supervision of Professor Baird.

It has not been thought necessary to specially index each genus of which a diagnosis has been given. It may be understood that each genus of which the species are discussed in "(76) Pacific Railroad Survey, vol. viii," and "(101) Mammals of North America," in "(78) Pacific Railroad Survey, vol. ix," or (632½) Birds of North America, 1874," or in "(39) Catalogue of North American Reptiles" is discussed and briefly diagnosed in those works. Discussions of genera in works other than these are especially indexed.

ANALYSIS.

	Page.
Mammals	295
Birds	305
Reptiles	351
Fishes	360

M A M M A L S .

ALCE AMERICANUS.

- (76) P. R. R. Surv., vol. viii, p. 632, figg. 1-2;
(101) Mammals of N. A., 1859. Horns,
adult, woodcut, fig. 1 young, fig. 2, p. 632.

ALCES AMERICANA.

- (22) Rep. Comm. Pat. for 1851, p. 112, pl. viii.

ANTHLOCAPRA AMERICANA.

- (22) Rep. of Comm. of Patents for 1851, p. 121,
plate 1; (76) P. R. R. Surv., vol. viii, p. 666,
pl. xvi, xxx, figg. 23-24, p. 668; (86) Mex.
Bound. Surv., vol. ii, p. 51; (101) Mammals
of N. A., 1859. Animal, pl. xvi. Various
horns, pl. xxx. Muzzle and hoof, woodcut,
figg. 23-24, p. 668.

Aplocerus montanus.

- (76) P. R. R. Surv., vol. viii, p. 671.

APLODONTIA LEPORENA.

- (76) P. R. R. Surv., vol. viii, p. 353, pl. xx, fig. 4;
(101) Mammals of N. A., 1859. Details,
pl. xx, fig. 4. Skull, pl. xlix, fig. 2.

ARCTOMYS FLAVIVENTER.

- (76) P. R. R. Surv., vol. viii, p. 343, pl. xlvii, fig.
1; (101) Mammals of N. A., 1859. Skull,
pl. xlvii, fig. 1.

Arctomys Lewisii.

- (76) P. R. R. Surv., vol. viii, p. 347.

ARCTOMYS MONAX.

- (76) P. R. R. Surv., vol. viii, p. 339, pl. xlix, fig.
1; (101) Mammals of N. A., 1859. Skull,
pl. xlix, fig. 1.

Arctomys pruinosus.

- (76) P. R. R. Surv., vol. viii, p. 345.

Arvicola albo-rufescens.

- (76) P. R. R. Surv., vol. viii, p. 549.

ARVICOLA AUSTERA.

- (76) P. R. R. Surv., vol. viii, p. 539, pl. liv, No.
1587; (101) Mammals of N. A., 1859.
Teeth, pl. liv, No. 1587.

Arvicola borealis.

- (76) P. R. R. Surv., vol. viii, p. 549.

Arvicola Breweri.

- (76) P. R. R. Surv., vol. viii, p. 525.

Arvicola californica.

- (76) P. R. R. Surv., vol. viii, p. 532.

ARVICOLA CINNAMONEA.

- (76) P. R. R. Surv., vol. viii, p. 541, pl. liv, No.
1714; (101) Mammals of N. A., 1859.
Teeth, pl. liv, No. 1714.

Arvicola DeKayi.

(76) P. R. R. Surv., vol. viii, p. 549.

Arvicola Drummondii.

(76) P. R. R. Surv., vol. viii, p. 550.

Arvicola edax.

(76) P. R. R. Surv., vol. viii, p. 531.

Arvicola Gapperi.

(76) P. R. R. Surv., vol. viii, p. 518.

Arvicola Haydenii.

(76) P. R. R. Surv., vol. viii, p. 543.

Arvicola hispidus.

(76) P. R. R. Surv., vol. viii, p. 550.

Arvicola longirostris.

(76) P. R. R. Surv., vol. viii, p. 530.

Arvicola modesta.

(76) P. R. R. Surv., vol. viii, p. 535; (93) P. R. R. Surv., vol. x, p. 9.

ARVICOLA MONTANA.

(76) P. R. R. Surv., vol. viii, p. 528, pl. xxi, fig. 2; (191) Mammals of N. A., 1859. Details, pl. xxi, fig. 2.

Arvicola nasuta.

(76) P. R. R. Surv., vol. viii, p. 550.

Arvicola occidentalis.

(76) P. R. R. Surv., vol. viii, p. 534.

Arvicola oneida.

(76) P. R. R. Surv., vol. viii, p. 551.

Arvicola oregoni.

(76) P. R. R. Surv., vol. viii, p. 537.

ARVICOLA PINETORUM.

(76) P. R. R. Surv., vol. viii, p. 544, pl. liv, No. 1719; (101) Mammals of N. A., 1859. Teeth, pl. liv, No. 1719.

Arvicola Richardsonii.

(76) P. R. R. Surv., vol. viii, p. 551.

Arvicola riparia.

(76) P. R. R. Surv., vol. viii, p. 522.

Arvicola rubricatus.

(76) P. R. R. Surv., vol. viii, p. 551.

Arvicola rufidorsum.

(76) P. R. R. Surv., vol. viii, p. 526.

Arvicola texiana.

(76) P. R. R. Surv., vol. viii, p. 552.

ARVICOLA TOWNSENDII.

(76) P. R. R. Surv., vol. viii, p. 527; (101) Mammals of N. A., 1859. Teeth, pl. liv, No. 1595.

Arvicola xanthognathus.

(76) P. R. R. Surv., vol. viii, p. 552.

Auchenia llama.(64) Gillis, Naval Astr. Exp., ii, p. 159; (65) *Ibid.*, ii, p. 170.*Balæna antarctica.*

(65) Gillis, Naval Astr. Exp., ii, p. 171.

BASSARIS ASTUTA.

(76) P. R. R. Surv., vol. viii, p. 147; (86) Mex. Bound. Surv., vol. ii, p. 18; (101) Mammals of N. A., 1859. Skull, pl. lxxiv, fig. 2.

Bison americanus.

(22) Rep. of Comm. of Patents for 1851, p. 124, pl. 7, figure 2nd.

BLARINA ANGSTICEPS.

(76) P. R. R. Surv., vol. viii, p. 47, pl. xxx; (101) Mammals of N. Amer., 1859. Details, pl. xxx, fig. 7.

BLARINA BERLANDIERI.

(76) P. R. R. Surv., vol. viii, p. 53, pl. xxviii; (86) Mex. Bound. Surv., vol. ii, p. 5; (101) Mammals of N. Amer., 1859. Animal and skull, pl. xxviii, No. 2159.

BLARINA BREVICAUDA.

(76) P. R. R. Surv., vol. viii, p. 42, pl. xxx; (101) Mammals of N. Amer., 1859. Details, pl. xxx, fig. 5.

BLARINA CAROLINENSIS.

(76) P. R. R. Surv., vol. viii, pl. xxx, p. 45; (101) Mammals of N. Amer., 1859. Details, pl. xxx, fig. 8.

BLARINA CINEREA.

(76) P. R. R. Surv., vol. viii, p. 45, pl. xxx; (101) Mammals of N. Amer., 1859. Details, pl. xxx, figg. 9, 10.

BLARINA EXILIPES.

(76) P. R. R. Surv., vol. viii, p. 51, pl. xxviii; (101) Mammals of N. Amer., 1859. Animal and skull, pl. xxvii, No. 2157.

BLARINA TALPOIDES.

(76) P. R. R. Surv., vol. viii, p. 36, pl. xviii, xxx; (101) Mammals of N. Amer., 1859. Details of external form, pl. xviii, fig. 4, pl. xxx, fig. 6.

BOS AMERICANUS.

(76) P. R. R. Surv., vol. viii, p. 682, figg. 34, 35, p. 683; (86) U. S. and Mex. Bound. Surv., vol. ii, p. 52; (101) Mammals of N. A., 1859. Muzzle and hoof, woodcut, figg. 34, 35, p. 683.

Canis Azaræ.(64) Gillis, Naval Astr. Exp., ii, p. 154; (65) *Ibid.*, ii, p. 164.*Canis fulvipes.*

(65) Gillis, Naval Astr. Exp. ii, p. 164.

CANIS LATRANS.

(76) P. R. R. Surv., vol. viii, p. 113; (86) Mex. Bound. Surv., vol. ii, p. 16, pl. xvi; (101) Mammals of N. Amer., 1859. Skull, pl. lxxvi.

Canis magellanicus.(64) Gillis, Naval Astr. Exp., ii, p. 154; (65) *Ibid.*, ii, p. 164.*Canis occidentalis, ater.*

(76) P. R. R. Surv., vol. viii, p. 113.

CANIS OCCIDENTALIS GRISEO-ALBUS.

(76) P. R. R. Surv., vol. viii, p. 104, pl. xxxi. (101) Mammals of N. Amer., 1859. Skull, pl. xxxi.

Canis occidentalis mexicanus.

(76) P. R. R. Surv., vol. viii, p. 113; (86) Mex. Bound. Surv., vol. ii, p. 14.

Canis occidentalis nubilus.

(76) P. R. R. Surv., vol. viii, p. 111.

Canis occidentalis rufus.

(76) P. R. R. Surv., vol. viii, p. 113; (86) Mex. Bound Surv., vol. ii, p. 15.

CAPELLA RUPICAPRA.

(101) Mammals of N. A., 1859. Horns, pl. xxv, figg. 1854 and 882.

CAPRA AMERICANA.

(22) Rep. of Comm. of Patents for 1851, p. 120, plate 4.

CASTOR CANADENSIS.

- (76) P. R. R. Surv., vol. viii, p. 355, pl. xlvi, fig. 1; (86) Mex. Bound. Surv., vol. ii, p. 40; (101) Mammals of N. A., 1859. Skull, pl. xlvi, fig. 1.

Castoroides ohioensis.

- (76) P. R. R. Surv., vol. viii, p. 363.

Cavia australis.

- (64) Gillis, Naval Astr. Exp., ii, p. 156; (65) Gillis, Naval Astr. Exp., ii, p. 167.

CERVUS CANADENSIS.

- (76) P. R. R. Surv., vol. viii, p. 638, figg. 9, 10, p. 639, fig. 11, p. 641; (101) Mammals of N. A., 1859. Muzzle, wood-cut, fig. 9; hoof, fig. 10, p. 639; horns, fig. 11, p. 641.

Cervus chilensis.

- (65) Gillis, Naval Astr. Exp., ii, p. 171.

CERVUS COLUMBIANUS.

- (76) P. R. R. Surv., vol. viii, p. 659, pl. xxiii, fig. 2, p. 660, figg. 21, 22; (101) Mammals of N. A., 1859. Feet, pl. xxiii, fig. 2; horns, wood-cut, figg. 21, 22, p. 660.

CERVUS LEUCURA.

- (101) Mammals of N. A., 1859. Horn, adult, wood-cut, figg. 14, 15, 17, p. 651; fig. 18, p. 652; young, fig. 16, p. 651.

Cervus leucurus.

- (22) Rep. of Comm. of Patents for 1851, p. 119; (76) P. R. R. Surv., vol. viii, p. 649, figg. 14, 15, 17, p. 651; fig. 18, p. 652; fig. 16, p. 651.

CERVUS LEWISII.

- (22) Rep. of Comm. of Patents for 1851, p. 118, plate 5.

CERVUS MACROTIS,

- (22) Rep. of Comm. of Patents for 1851, p. 118; (76) P. R. R. Surv., vol. viii, p. 656, pl. xxiii, fig. 1, figg. 19, 20, p. 657; (86) Mex. Bound. Surv., vol. ii, p. 51; (101) Mammals of N. A., 1859. Feet, pl. xxiii, fig. 1; horns, wood-cut, figg. 19, 20, p. 657.

CERVUS MEXICANUS.

- (76) P. R. R. Surv., vol. viii, p. 658, pl. xxiv; (86) U. S. and Mex. Bound. Surv., vol. ii, p. 50; (101) Mammals of N. A., 1859. Feet, pl. xxiv, fig. 2.

Cervus Padii.

- (65) Gillis, Naval Astr. Exp., ii, p. 171.

CERVUS VIRGINIANUS.

- (76) P. R. R. Surv., vol. viii, p. 643, pl. xxiv, fig. 1, fig. 12, p. 644, fig. 13, p. 648; (86) Mex. Bound. Surv., vol. ii, p. 50; (101) Mammals of N. A., 1859. Feet, pl. xxiv, fig. 1; muzzle, wood-cut; fig. 12, p. 644; horns, fig. 13, p. 648.

Chinchilla lanigera.

- (65) Gillis, Naval Astr. Exp., ii, p. 167.

CHLAMYPHORUS TRUNCATUS.

- (65) Gillis, Naval Astr. Exp., ii, pp. 158, 170, pl. xi.

CONDYLURA CRISTATA.

- (76) P. R. R. Surv., vol. viii, p. 71, pl. xviii, figg. 1, 2; (101) Mammals of N. A., 1859. Details of external form, pl. xviii, figg. 1, 2.

Ctenomys magellanicus.

- (65) Gillis, Naval Astr. Exp., ii, p. 168.

CYNOMYS GUNNISONII.

- (76) P. R. R. Surv., vol. viii, p. 335, pl. xlvi, fig. 1; (93) P. R. R. Surv., vol. x, p. 8, pl. iv, fig. 2; (101) Mammals of N. A., 1859. Animal, pl. iv, fig. 2; skull, pl. xlvi, fig. 4.

CYNOMYS LUDOVICIANUS.

- (76) P. R. R. Surv., vol. viii, p. 331, pl. xlvi, figg. 2, 3; (86) Mex. Bound. Surv., vol. ii, p. 39; (101) Mammals of N. A., 1859. Skull and teeth, pl. xlvi, figg. 2, 3.

Dasyopus minutus.

- (65) Gillis, Naval Astr. Exp., ii, p. 170.

DASYPUS NOVEN-CINCTUS.

- (76) P. R. R. Surv., vol. viii, p. 623; (86) Mex. Bound. Surv., vol. ii, p. 48, pl. xxvi; (101) Mammals of N. A., 1859. Skull, pl. lxxxvi.

Delphinus albimanus.

- (65) Gillis, Naval Astr. Exp., ii, p. 171.

Delphinus lunatus.

- (65) Gillis, Naval Astr. Exp., ii, p. 171.

Desmodus D'Orbignyi.

- (65) Gillis, Naval Astr. Exp., ii, p. 163

DICOTYLES TORQUATUS.

- (76) P. R. R. Surv., vol. viii, p. 627; (86) Mex. Bound. Surv., vol. ii, p. 50, pl. xxvii, figg. 1, 2; (101) Mammals of N. A., 1859. Skull, pl. lxxxvii, figg. 1, 2.

DIPLOPHYS CALIFORNICA.

- (76) P. R. R. Surv., vol. viii, p. 233; (86) Mex. Bound. Surv., vol. ii, p. 32, pl. iii; (101) Mammals of N. A., 1859. Animal, pl. lxiii, fig. 1, adult; fig. 2, young.

Didelphys virginiana.

- (76) P. R. R. Surv., vol. viii, p. 232; (86) Mex. Bound. Surv., vol. ii, p. 31.

DIPDOMOMYS AGILIS.

- (60) Pr. Ac. Nat. Sci. Phila., 1854, p. 334-5; (76) P. R. R. Surv., vol. viii, p. 414, pl. ix, fig. 1; (86) U. S. and Mex. Bound. Surv., vol. ii, p. 42, pl. xxiii, fig. 2; (101) Mammals of N. A., 1859. Animal, pl. iv, fig. 9; skull, pl. lxxxiii, fig. 2.

Dipodomys Heermanni.

- (76) P. R. R. Surv., vol. viii, p. 415.

Dipodomys montanus.

- (60) Pr. Ac. Nat. Sci. Phila., 1854, p. 334.

DIPDOMOMYS ORDII.

- (76) P. R. R. Surv., vol. viii, p. 410, pl. v, xxi, fig. 1, pl. li, figg. 1, 2; (86) Mex. Bound. Surv., vol. ii, p. 42, pl. ix, fig. 3, pl. xxiii, fig. 3; (93) P. R. R. Surv., vol. x, p. 8; (101) Mammals of N. A., 1859. Animal, pl. v, fig. 1, and pl. lxix, fig. 3. Details, pl. xix, fig. 1; skull much enlarged, pl. li, fig. 1; natural size, fig. 2; also, pl. lxxxiii, fig. 3.

DIPDOMOMYS ORDII MONTANUS.

- (86) Mex. Bound. Surv., vol. ii, p. 42, pl. xxiii, fig. 4; (101) Mammals of N. A., 1859, pl. lxxxiii, fig. 4.

Dipodomys Phillippi.

- (76) P. R. R. Surv., vol. viii, p. 412; (97) P. R. R. Surv., vol. x, p. 82.

Dipodomys Wagneri.

- (76) P. R. R. Surv., vol. viii, p. 415.

Dydelphus elegans.

- (64) Gillis, Naval Astr. Exp., ii, p. 155; (65) Gillis, Naval Astr. Exp., ii, p. 166.

Dysopes nasutus.

- (65) Gillis, Naval Astr. Exp., ii, p. 163.

ELAPHUS CANADENSIS.

- (22) Rep. of Comm. of Patents for 1851, p. 116, pl. 6.

Enhydra marina.

- (76) P. R. R. Surv., vol. viii, p. 189.

ERETHIZON DORSATUS.

- (76) P. R. R. Surv., vol. viii, p. 568, pl. iv, fig. 3; (101) Mammals of N. A., 1859. Upper view of skull, pl. iv, fig. 3.

ERETHIZON EPIXANTHUS.

- (76) P. R. R. Surv., vol. viii, p. 569, pl. iv, figg. 1, 2.

- (101) Mammals of N. A., 1859. Skull, pl. iv, figg. 1, 2.

FELIS CONCOLOR.

- (65) Gillis, Naval Astr. Exp., ii, p. 164; (64) Gillis, Naval Astr. Exp., ii, p. 153; (65) Gillis, Naval Astr. Exp., ii, p. 164; (76) P. R. R. Surv., vol. viii, p. 83, pl. ii, fig. 2; (86) Mex. Bound. Surv., vol. ii, p. 5, pl. xi, figg. 1, 2; (101) Mammals of N. A., 1859. Animal very young, pl. ii, fig. 2; skull, adult, pl. lxxi, fig. 1; young, pl. lxxi, fig. 2.

FELIS EYRA.

- (76) P. R. R. Surv., vol. viii, p. 88; (86) Mex. Bound. Surv., vol. ii, p. 10, pl. 2, fig. 7; pl. xiii, fig. 2; (101) Mammals of N. A., 1859. Animal, pl. lxii, fig. 1; Skull, pl. lxxiii, fig. 2.

Felis guigna.

- (65) Gillis, Naval Astr. Exp., ii, p. 164.

Felis onca.

- (76) P. R. R. Surv., vol. viii, p. 86.

Felis onza.

- (86) Mex. Bound. Surv., vol. ii, p. 6.

Felis pajeros.

- (65) Gillis, Naval Astr. Exp., ii, p. 164.

FELIS PARDALES.

- (76) P. R. R. Surv., vol. viii, p. 87; (86) Mex. Bound. Surv., vol. ii, p. 8, pl. xii, xiii, fig. 1; (101) Mammals of N. A., 1859. Skull, adult, pl. lxxii; young, pl. lxxiii, fig. 1.

FELIS YAGUARUNDI.

- (76) P. R. R. Surv., vol. viii, p. 88; (86) Mex. Bound. Surv., vol. ii, p. 12, pl. xiv, fig. 1; (101) Mammals of N. A., 1859. Skull, pl. lxxiv, fig. 1.

FIBER ZIBETHECUS.

- (29) Stansbury's Surv. Salt Lake [App. C], p. 312; (76) P. R. R. Surv., vol. viii, p. 561, pl. iv, No. 626; (86) U. S. and Mex. Bound. Surv., vol. ii, p. 45, pl. xxiv, fig. 3; (101) Mammals of N. A., 1859. Teeth, pl. liv, No. 626.

Gallietis vittata.

- (64) Gillis, Naval Astr. Exp., ii, p. 155; (65) Gillis, Naval Astr. Exp., ii, p. 165.

GEOMYS BREVICEPS.

- (60) Pr. Ac. Nat. Sci. Phila., 1854, p. 335; (76) P. R. R. Surv., vol. viii, p. 378, pl. lii, fig. 2; (101) Mammals of N. A., 1859. Skull, pl. lii, fig. 2.

GEOMYS BURSARIUS.

- (76) P. R. R. Surv., vol. viii, p. 372, pl. xxii, fig. 1, pl. 1, fig. 2; (101) Mammals of N. A., 1859. Details, pl. xxii, fig. 1; skull, pl. 1, fig. 2.

GEOMYS CASTANOPS.

- (76) P. R. R. Surv., vol. viii, p. 384, pl. x, fig. 2, pl. 1, fig. 1; (93) P. R. R. Surv., vol. x, p. 8, pl. x, fig. 2; (101) Mammals of N. A., 1859. Animal, pl. x, fig. 2; skull, pl. 1, fig. 2.

GEOMYS CLARKII.

- (59) Pr. Ac. Nat. Sci. Phila., 1854, p. 334; (76) P. R. R. Surv., vol. viii, p. 383; (86) Mex. Bound. Surv., vol. ii, p. 41, pl. ix, fig. 1, pl. xxiii, fig. 1; (101) Mammals of N. A., 1859. Animals and details, pl. lxxix, fig. 1; skull, pl. lxxxiii, fig. 2.

GEOMYS HISPIDUS.

- (76) P. R. R. Surv., vol. viii, p. 386, pl. xxii, fig. 4; (101) Mammals of N. A., 1859. Details, pl. xxii, fig. 4.

Geomys mexicanus.

- (76) P. R. R. Surv., vol. viii, p. 387.

GEOMYS PINETIS.

- (76) P. R. R. Surv., vol. viii, p. 380, pl. xxii, fig. 3; (101) Mammals of N. A., 1859. Details, pl. xxii, fig. 3.

Gulo luscus.

- (29) Stansbury's Surv. Salt Lake [App. C], p. 311; (76) P. R. R. Surv., vol. viii, p. 181.

Habrocoma Bennettii.

- (65) Gillis, Naval Astr. Exp., ii, p. 168.

Habrocoma Cuvieri.

- (65) Gillis, Naval Astr. Exp., ii, p. 168.

Hesperomys ansterus.

- (60) Pr. Ac. Nat. Sci. Phila., 1854, p. 336; (76) P. R. R. Surv., vol. viii, p. 466.

HESPEROMYS BOYLI.

- (60) Pr. Ac. Nat. Sci. Phila., 1854, p. 335; (76) P. R. R. Surv., vol. viii, p. 471, pl. viii, fig. 3, pl. lii, fig. 3.

Hesperomys brachyotis.

FALCO GYRFALCO CANDICANS.

(632½) Birds of N. A., 1874, vol. iii, p. 111 (cut, p. 112).

FALCO GYRFALCO ISLANDICUS.

(632½) Birds of N. A., 1874, vol. iii, p. 113 (cut, p. 114).

Falco gyrfalco labradoria.

(632½) Birds of N. A., 1874, vol. iii, p. 117.

FALCO GYRFALCO SACER.

(632½) Birds of N. A., 1874, vol. iii, p. 115 (cut, p. 110); *Ibid.*, App., p. 522 (cut).

Falco islandicus.

(78) P. R. R. Surv., vol. ix, p. 13.

FALCO LANARIUS POLYAGRUS.

(632½) Birds of N. A., 1874, vol. iii, p. 123 (cuts, pp. 110, 124); *Ibid.*, App., p. 522 (cut)

FALCO LITHOFALCO COLUMBARIUS.

(632½) Birds of N. A., 1874, vol. iii, p. 144 (cut, p. 146).

Falco lithofalco Richardsoni.

(632½) Birds of N. A., 1874, vol. iii, p. 148.

Falco lithofalco Suckleyi.

(632½) Birds of N. A., 1874, vol. iii, p. 147.

Falco (Falco) nigriceps.

(78) P. R. R. Surv., vol. ix, p. 8.

FALCO NIGRICEPS.

(104) Birds of N. A., 1860, p. 8, pl. xi.

Falco polyagrus.

(78) P. R. R. Surv., vol. ix, p. 12.

FALCO RICHARDSONI.

(632½) Birds of N. A., 1874, App., p. 522 (cut).

Falco sparverius.

(31-a) Stansbury's Surv. Salt Lake [App. C], p. 325; (78) P. R. R. Surv., vol. ix, p. 13; (87) Mex. Bound. Surv., vol. ii, p. 3.

Falco sparverius Isabellinus.

(632½) Birds of N. A., 1874, vol. iii, p. 171.

FALCO SPARVERIUS SPARVERIUS.

(632½) Birds of N. A., 1874, vol. iii, p. 169 (cuts, pp. 159, 173).

Falconidae.

(632½) Birds of N. A., 1874, vol. iii, p. 103; *Ibid.*, App., p. 522.

Falconine.

(632½) Birds of N. A., 1874, vol. iii, p. 106.

Florida caerulea.

(78) P. R. R. Surv., vol. ix, p. 671; (87) Mex. Bound. Surv., vol. ii, p. 24.

Fratereula arctica.

(78) P. R. R. Surv., vol. ix, p. 903.

Fratereula corniculata.

(78) P. R. R. Surv., vol. ix, p. 902.

Fratereula glacialis.

(78) P. R. R. Surv., vol. ix, p. 903.

Fregatta Lawrencii.

(78) P. R. R. Surv., vol. ix, p. 832.

Fringillidae.

(632½) Birds of N. A., 1874, vol. i, p. 446.

Fringilla meruloides.

(32) Stansbury's Surv. Salt Lake [App. C], p. 330.

Fulica americana.

(78) P. R. R. Surv., vol. ix, p. 751; (87) Mex. Bound. Surv., vol. ii, p. 26; (94) P. R. R. Surv., vol. x, p. 15; (99) Pr. Acad. Nat. Sci. Phila., 1859, p. 306.

Fuligula affinis.

(31) Stansbury's Surv. Salt Lake [App. C], p. 324.

Fulix affinis.

(78) P. R. R. Surv., vol. ix, p. 791.

Fulix collaris.

(78) P. R. R. Surv., vol. ix, p. 792; (87) Mex. Bound. Surv., vol. ii, p. 27.

Fulix marila.

(78) P. R. R. Surv., vol. ix, p. 791.

Fulmarus glacialis.

(78) P. R. R. Surv., vol. ix, p. 825.

Fulmarus Rodgersi.

(129) Chicago Acad. Sci., 1869, p. 323.

Galbulidae.

(115) Review of N. A. Birds, Aug., 1864, Part I, p. 165.

Galeoscoptes.

(115) Review of N. A. Birds, June, 1864, Part I, p. 5; (632½) Birds of N. A., 1874, vol. i, p. 51; (115) Review of N. A. Birds, July, 1864, Part I, p. 54.

GALEOSCOPTES CAROLINENSIS.

(115) Review of N. A. Birds, July, 1864, Part I, p. 54; (632½) Birds of N. A. 1874, vol. i, p. 52, pl. iii, fig. 5 (cuts, p. 52).

Gallinago Wilsonii.

(78) P. R. R. Surv., vol. ix, p. 710; (87) Mex. Bound. Surv., vol. ii, p. 29.

Gallinula (Gallinula) galeata.

(78) P. R. R. Surv., vol. ix, p. 752.

Gallinula galeata.

(87) Mex. Bound. Surv., vol. ii, p. 26.

Gallinula martinica.

(78) P. R. R. Surv., vol. ix, p. 753.

- Gambetta flavipes*.

HELMINTHOPHAGA LUCLE.

(115) Review of N. A. Birds, Apr., 1865, Part I, p. 178; (632½) Birds of N. A., 1874, vol. i, p. 200, pl. xi, fig. 9; *Ibid.*, App., p. 504.

HELMINTHOPHAGA PEREGRINA.

(78) P. R. R. Surv., vol. ix, p. 258; (115) Review of N. A. Birds, Apr., 1865, Part I, p. 178; (632½) Birds of N. A., 1874, vol. i, p. 205, pl. xi, figg. 10, 11; *Ibid.*, App., p. 504.

HELMINTHOPHAGA PINUS.

(78) P. R. R. Surv., vol. ix, p. 254; (115) Review of N. A. Birds, Aug., 1864, Part I, p. 174; (632½) Birds of N. A., 1874, vol. i, p. 195, pl. xi, fig. 1.

HELMINTHOPHAGA RUFICAPILLA.

(78) P. R. R. Surv., vol. ix, p. 256; (115) Review of N. A. Birds, Aug., 1864, Part I, p. 175; (632½) Birds of N. A., 1874, vol. ii, p. 196, pl. xi, figg. 7, 8 (cut, p. 191).

HELMINTHOPHAGA VIRGINLE.

(104) Birds of N. A., 1869, p. 249, pl. lxxix, fig. 1; (115) Review of N. A. Birds, Apr., 1865, Part I, p. 177; (632½) Birds of N. A., 1874, vol. i, p. 199, pl. xi, fig. 12; *Ibid.*, App., p. 504.

Helmitherus.

(115) Review of N. A. Birds, Apr., 1865, Part I, p. 179; (632½) Birds of N. A., 1874, vol. i, p. 186.

HELMITHERUS SWAINSONI.

(78) P. R. R. Surv., vol. ix, p. 252; (115) Review of N. A. Birds, Apr., 1865, Part I, p. 180, (632½) Birds of N. A., 1874, vol. i, p. 190, pl. x, fig. 9; *Ibid.*, App., p. 504.

HELMITHERUS VERMIVORUS.

(78) P. R. R. Surv., vol. ix, p. 252; (115) Review of N. A. Birds, Apr., 1865, Part I, p. 179; (632½) Birds of N. A., 1874, vol. i, p. 187, pl. x, fig. 10 (cuts, p. 186); *Ibid.*, App., p. 504.

Helospiza Lincolnii.

(78) P. R. R. Surv., vol. ix, p. 482.

Helospiza palustris.

(78) P. R. R. Surv., vol. ix, p. 483.

Herodias egretta.

(78) P. R. R. Surv., vol. ix, p. 666; (87) Mex. Bound. Surv., vol. ii, p. 24.

Herodias egretta californica.

(78) P. R. R. Surv., vol. ix, p. 667.

Hesperiphona.

(632½) Birds of N. A., 1874, vol. i, p. 448.

HESPERIPHONA VESPERTINA.

(78) P. R. R. Surv., vol. ix, p. 469; (632½) Birds of N. A., 1874, vol. i, p. 449, pl. xxii, figg. 1, 4 (cuts, pp. 448, 459).

Hesperiphona vespertina montana.

(632½) Birds of N. A., 1874, App., p. 508.

Hesperocichla.

(115) Review of N. A. Birds, June, 1864, Part I, p. 12; *Ibid.*, p. 32.

Heterorhina.

(115) Review of N. A. Birds, Aug., 1864, Part I, p. 94; *Ibid.*, 115 (95, 114).

Heterorhina griseicollis.

(115) Review of N. A. Birds, Aug., 1864, Part I, p. 117.

Heterorhina leucophrys.

(115) Review of N. A. Birds, Aug., 1864, Part I, p. 118.

Heterorhina prosthelena.

(115) Review of N. A. Birds, Aug., 1864, Part I, p. 116.

Heterorhina pasilla.

(115) Review of N. A. Birds, Aug., 1864, Part I, p. 119.

HETEROSCELUS BREVIDES.

(78) P. R. R. Surv., vol. ix, p. 734; (104) Birds of N. A., 1869, p. 734, pl. lxxxviii.

Hierofalco candicans.

(78) P. R. R. Surv., vol. ix, p. 13.

HEROFALEO GYRFALCO CANDICANS.

(632½) Birds of N. A., 1874, vol. iii, p. 111 (cut, p. 112).

HEROFALEO GYRFALCO ISLANDICUS.

(632½) Birds of N. A., 1874, vol. iii, p. 113 (cut, p. 114).

Hierofalco gyrfalco labradora.

(632½) Birds of N. A., 1874, vol. iii, p. 117.

HEROFALEO GYRFALCO SACER.

(632½) Birds of N. A., 1874, vol. iii, p. 115 (cut, p. 110).

Hierofalco islandicus.

(78) P. R. R. Surv., vol. ix, p. 13.
